Work Outfits

Office-appropriate skirts and shoes underline the businesslike character of these outfits. Tops may be more casual, such as tee shirts, but also include the black blouse and the classic button-front shirt.

Cardigans may be worn open over other tops, creating slimming lines and a hint of authority, and they may also be buttoned up and worn as tops on their own.

Mix and match these tops and skirts for eighteen unique outfits. That's not counting the outfits with an open cardigan added on top of another shirt!

Home Outfits

Home is where we relax, but it's also where we encounter lovable, messy children, pets, and projects. Clothes for home demand comfort and washability, but we still want to look (and if possible feel) pleasant.

Mix and match these tops and skirts to get nine different outfits. This is a great category in which to have multiple tee shirts and to add tees in additional colors.

Sabbath Outfits

We dress for this most important day every seven days, and our outfits should be nicer than the rest of the week. The dressier capsule items, plus nicer accessories, easily become Sabbath-worthy. Mix and match these tops and skirts to create nine different outfits.
