

Voice Logistics Co. provides dispatch services for independent owner-operators and small carriers.

Our services include load search, rate negotiation, broker communication, and paperwork coordination. Voice Logistics works on behalf of carriers to secure freight opportunities that align with their preferred lanes and equipment.

Dispatch services are provided under a percentage-based agreement. Our introductory dispatch rate for new carriers is 6%.

Carriers remain fully responsible for their own authority, insurance, compliance, and transportation operations. Voice Logistics acts solely as a dispatch service and does not operate as a freight broker or motor carrier.

Dispatch fees are calculated as a percentage of the gross load rate and are due upon completion of each load. Payment arrangements and invoicing details will be outlined during carrier onboarding.

TERMINATION

Either party may terminate the dispatch service agreement at any time with written notice.

For full service details and agreements, carriers will receive documentation during the onboarding process.
