# Introducing RespiPep™ Innovative PEP (Positive Expiratory Pressure) Therapy Devices

PEP therapy is proven to enhance lung volume, reduce hyperinflation, improve oxygenation and aid in secretion removal.<sup>1, 2</sup>

Our Oscillating PEP device is compact and portable, featuring an adjustable resistance dial that can be tailored to each patient's individual needs. It is designed to be used alongside a small-volume nebuliser, providing versatile respiratory therapy options.

Our RespiPEP Therafizz blow bottle PEP device is distinguished by its cutting-edge safety features, prioritising infection control and patient safety. With tailored customisation that allows for adjustable resistance levels, RespiPEP Therafizz is engineered to meet the unique respiratory therapy needs of every patient.

## RespiPep™ - Better Breathing for All.

**TheraFizz and Theravance meet rigorous safety standards, having undergone testing to ensure efficacy, patient safety and stringent infection control.**

**When used in combination, RespiPEP™ enhances the effectiveness of physiotherapy.**

**Disclaimer:** RespiPEP devices are not intended to diagnose, treat, cure, or mitigate medical conditions. Always use these devices under the instructions and supervision of a healthcare professional, and in accordance with the instructions for use leaflet provided.
