WE ARE MOVING FORWARD! DISTANCE LEARNING

The worldwide pandemic, Covid, change the lives of people all over the world. The social, physical, educational, and spiritual component of life shifted. As Christians, it is our responsibility to reach out and make the gospel of Jesus Christ known to the whole world. We do this by listening to the voice of the Holy Spirit and using the tools available to us, tools like technology.

Technology has expanded at a very fast pace and it has changed the way we function in our every day lives. Take for example our schools, because of social distancing students

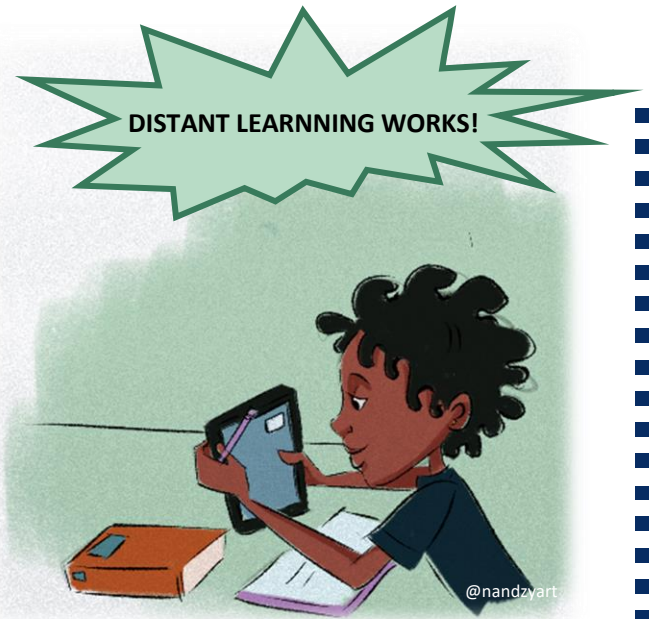

had to be educated differently. Distance-learning has taken centerstage in education not only in more developed countries but also in developing countries. As an educator, I spent practically the whole school year of 2020 teaching school via the internet. I was able to communicate with my students through a computer screen, from class lectures to team lesson competitions. I believe God gave me that opportunity so that I could learn and use these new skills and methods in my mission school in Haiti.

The pandemic has not been the only problem facing the people of Haiti. There has been political unrest, kidnapping, rioting in the streets, random killing, lawlessness. All these have made it impossible to function normally. The children suffered the most. That is why we must rethink our method of reaching them. The use of technology will help us be more effective and also give us the ability to reach a larger group of children.

“The use of technology will help us be more effective and also give us the ability to reach a larger group of children.”

We intend to take advantage of this open door. Other countries are using this method effectively and I believe it will also be effective in Haiti. We hope to include distance learning in our school to help those who would like to serve but are not able to travel overseas. Your gifts and knowledge can be well served and fulfill the Great Commission. As construction continues in Morne Pele, we will continue to pray and research how distance learning can work for us. We also ask for your prayers and your ideas in bringing this into fruition. This effort will involve us getting the right tools to make it happen. We will discuss distant learning in future newsletters as we continue to grow and make distance learning a reality in our school.

GET INVOLVED

- Make a donation today
- Help develop a community in need
- Help get the well installed
- Support the construction of a classroom
- Support the construction of the library
- Support the construction of a Computer Room
