

# The Edge-to-Cloud Company

## Delivering Exceptional Experiences with a Differentiated Portfolio

HPE delivers unique, open and intelligent technology solutions as a service – spanning Cloud Services, Compute, High Performance Computing & AI, Intelligent Edge, Software, and Storage – with a consistent experience across all clouds and edges, helping customers develop new business models, engage in new ways, and increase operational performance.

## Strategic partner to accelerate digital transformations

HPE helps organizations drive outcomes by unlocking value from all of their data, everywhere, with businesses aligned to customer needs

**Compute:** Offers both general purpose servers for multi-workload computing and workload optimized servers to deliver the best performance and value for demanding applications.

**Storage:** Transforms the customer experience with storage as-a-service and cloud data services with portfolio offerings like primary storage, hyper-converged infrastructure, disaster and ransomware recovery, big data solutions, management offerings, and storage for unstructured data and analytics workloads, plus traditional tape, storage networking, and disk products.

**HPE Services:** Advises on digital transformation, designs IT solutions and helps businesses consume IT as-a-service.

**HPC & AI:** Delivers standard and custom hardware, software, and data-management solutions designed to support supercomputers, high-performance compute, converged edge systems, and data-intensive workloads like data analytics and artificial intelligence applications.

**Intelligent Edge:** Operates platforms and services at network edges, connecting devices and applications via Aruba solutions such as wired and wireless local area network, campus and data center switching, software-defined wide area networking, and network security.

**HPE GreenLake Cloud Services:** Provides customers with a consistent cloud experience for all applications and data wherever they live: at the edge, data center, colocation facility or across public clouds.

**HPE Financial Services:** Serves as the financial engine behind HPE's offerings to provide financial solutions including leasing offers, asset management, and asset upcycling.
