

Tharseo IT Has Extensive Oracle Cloud Experience

Capability Statement

Tharseo IT is a “pure play” Oracle Cloud company specializing in assisting Federal, State & Local agencies move workflows, applications and data to the Oracle cloud. We have in-house expertise in the entire Oracle infrastructure stack including Application developers, IAM, SOA, Weblogic, and DB. Tharseo IT will analyze existing systems or applications, determine the best migration strategy, then pair existing agency resources with our Oracle cloud certified architects to quickly and efficiently migrate portions of a system or entire enterprise systems to the Oracle cloud. Tharseo IT also provides Oracle cloud operations and maintenance support to ensure long term stability and viability.

Core Competencies

- Project Management
- Oracle Cloud Migration Strategy & Planning
- Oracle Cloud Network Topology Design
- Oracle IaaS, PaaS, and SaaS migration, integration & support
- High Availability Architecture
- Disaster Recovery Design & Implementation
- Automated Testing
- Automated Infrastructure Provisioning
- Conduct an assessment for the 6-Rs of Oracle cloud migration – re-host, re-platform, re-architect, re-purchase, retire or retain.
