TASTING EXPERIENCE**

*"Our
gorgeous
honey frame
was the
focal point
of our
charcuterie
board and
the talk of
our
reception!"
- JF*

**A FARM-TO-TABLE HONEY
TASTING EXPERIENCE**

THE HONEY

Local, raw, unprocessed honey in the comb is the crème-de-la-crème of the farm-to-table experience. From the honey itself to the waxy comb, everything inside our frames is not only edible and delicious, but is naturally nourishing. With notes that range from flowery to fruity, earthy to herby, citrusy to spicy and more, raw honey is the loveliest complement to a wide variety of cheeses, meats, fruits, breads, hors d'oeuvres and confections. Rest assured that our bees are the happiest and healthiest around, which makes our honey even sweeter.

THE DISPLAY

Our honey frames are beautifully displayed in hand-crafted stands which can be customized to your theme or brand. Guests can experience our honeycomb from both sides of the display, allowing our honey frames to become the centerpiece for any edible arrangement, and expanding the area available for grazing table accompaniments. From rustic to refined, every event can be enhanced by the sweetness of nature. Look no further for the perfect centerpiece of your grazing table display.

THE EXPERIENCE

Honey in the comb is a rustic luxury that few people have had the opportunity to experience. Our frames come directly from the hive to your grazing table, so when your guests carve honey from the comb, they are participating in the freshest, most authentic honey tasting experience available. This alone means that our frames provide something new and unexpected for your guests to enjoy. Give your guests the sweet taste of nature and leave them with something to talk about.
