

EasyStart™ Breeze Soft Starter For RV and Marine

Starting an RV or Boat air conditioner or heat pump can be a challenge. This is especially true when attempting to use a portable generator in remote, hot conditions.

Our EasyStart™ Breeze Soft Starter makes this possible without worry and eliminates the need for a large and expensive generator.

Enjoy boondocking with an RV or trailer in remote areas or even on the water while sailing—our EasyStart™ works with every RV air conditioner and nearly all Marine air conditioning systems.

“Just installed EasyStart on a 2016 Keystone Cougar with a 15,000 BTU Dometic air conditioner. After the easy install, I hooked it up to my 9-year old Honda and Presto. The generator handles it fine and I even left it on ECO mode. Thanks to Micro-Air, we are boondocking in comfort!”

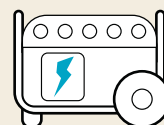

-Steve

Model # Description	Voltage	Transparent Enclosure	Harness
ASY-399-X20	100-125VAC 50-60Hz	146Lx 89Wx 51H mm 5.75L x 3.50W x 2.00H in	40 in (1m)

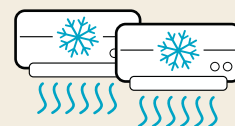

Additional Features

- Perfect power solution for small to medium-sized generators.
- Real time advanced fault production for ultimate compressor motor protection, which is not found in any other soft starter.
- Self-optimizing learning process for a smooth and gentle start-up, a true smart soft starter.
- Superior hardware design and components for ultimate durability.
- Water-resistant and UV-protected enclosure with a small footprint
- Supports 115V RV AC motors and 230V Marine AC motors.
- Best in class at startup current reduction.

How Will EasyStart™ Help Your Next Adventure?

Start your AC without a second generator or inverter

Run 2 air conditioners on a 30-Amp cord*

Silences the bumps in the night—sleep with less noise

Start your AC while using more appliances
