

## **BEST PRACTICE GUIDE: USING AN AIRGUN**

Never point a weapon at anyone, even in jest.

Never leave an airgun unattended.

Never leave an airgun loaded during periods of non-use.

Always apply the safety catch (if fitted), until the airgun is about to be operated.

Never rely on the safety catch to make you airgun safe, they may fail.

Always declare whether an airgun is loaded or empty when handing over to a second party.

In cases of an unloaded airgun, this should be proven to the second party.

Always be aware of the direction the barrel is pointing.

Never fire an airgun unless you are sure it is safe to do so.
