

Transforming Healthcare, Enhancing Lives!

Providing Solutions for Healthcare Professionals to Treat their Patients!

Too many reps. Too many portals. Too many headaches.

If you're tired of juggling multiple salespeople and tissue companies just to get the grafts your patients need, you're not alone.

MD3 Solutions makes it simple!

With a single point of contact and access to multiple, trusted skin substitutes, you get the support you need without the runaround. No more bouncing between reps or logging into different systems.

One call, one relationship, one partner → MD3 Solutions!

Simplify your wound care sourcing. Partner with MD3 Solutions and make your life easier.

SKIN SUBSTITUTES

Skin substitutes are advanced wound care solutions designed to support the body's natural healing process in chronic and complex wounds. Made from human, animal, or synthetic materials, they provide a protective barrier and promote tissue regeneration. Backed by FDA clearance, skin substitutes help clinicians accelerate healing, reduce complications, and improve patient outcomes.

Item #	Skin Substitute	Description
Q4356	Abiomend	Abiomend Membrane is a single layer chorion-free amniotic membrane.
Q4355	Abiomend Xplus	Abiomend Xplus Membrane is an advanced, crosslinked, chorion-free amniotic tissue designed to support wound healing and tissue regeneration. Crosslinking process is useful in longer-term wound coverage.
Q4316	AmchoPlast™	AmchoPlast is a sterile minimally manipulated, dehydrated, human amnion, chorion membrane allograft intended for homologous use.
Q4368	AmchoThick™	Dehydrated Human Amnion Chorion Amnion Membrane Allograft intended for the repair, reconstruction, replacement, or supplementation of a patient's injured tissue.
Q4239	Amnio-Maxx®	Two layers of amniotic tissue provides 2x growth factors and proteins that stimulate the body's own healing mechanism, reducing pain, inflammation, and scar tissue.
Q4238	Derm-Maxx™	Derm-Maxx Dermal Matrix is an acellular human dermis graft retaining the three-dimensional intertwined multidirectional fibers and mechanical properties of the native tissue.
Q4345	Matrix HD	Matrix HD Dermal Fenestrated Matrix is an acellular human dermis that is provided with on-the-shelf storage and has a five-year shelf life.
Q4205	Membrane Wrap™	Membrane Wrap is a human tissue allograft derived from the amniotic membrane that provides structural tissue for use as a wound and protectant covering.
A2032	Myriad Matrix™	Myriad Matrix™ is an engineered extracellular matrix (ECM) for soft tissue repair, reinforcement and complex wounds.
Q4102	Oasis® (Wound Matrix)	A single layer of fenestrated naturally derived ECM for the shortest timeline to complete integration.
Q4341	Simplimax	Placental tissue allograft composed of dual layer Amnion.
