

Liposana[®]: The Complete Fat Solution for Structural Support in the Foot

A native adipose allograft for total tissue repair.
Not just volume, but **true biological integration.**

How It Works

Ready-to-use and free from synthetic agents, our native adipose allograft provides immediate cushioning to support complete tissue repair in areas of adipose defects.

Relevant Applications

- Metatarsalgia
- Morton's neuroma
- Calcaneal bursitis
- Post-surgical corrections
- Fat pad atrophy

Why It Stands Out

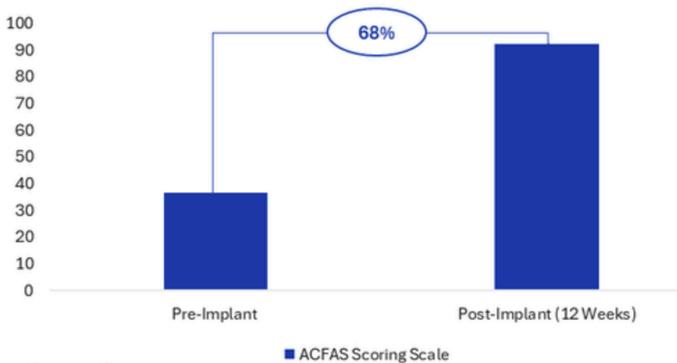

- The only product that retains the structure and properties of native adipose tissue
- Available on-demand
- Prolonged storage
- Minimally invasive implantation

See the Difference Instantly.

Clinical Outcomes

- No product-related adverse events
- Significant improvement in functionality and pain
- Durability for 18+ months (follow-up ongoing)

Median Score Improvement

Data on File
