Effective Therapy

Effective Therapy Resulting in Positive Outcomes

Delivers Consistent Positive Outcomes

1. ProMedTek. (2022). A Retrospective Examination of Patient Results after Replexa+ Treatment.

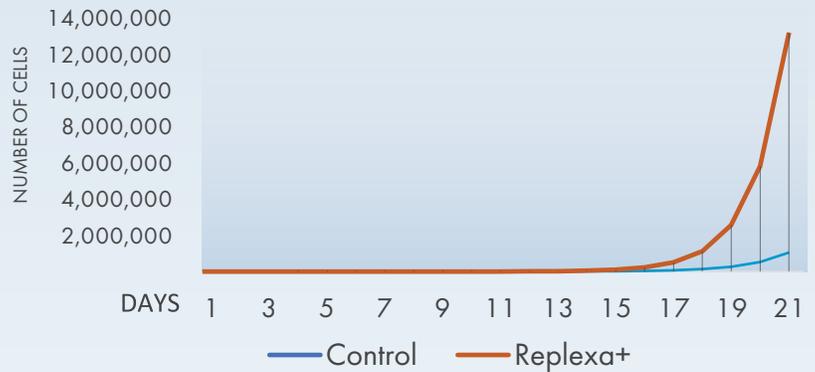

Supporting Data

Scientific Research & Real-World Efficacy

Enhanced Cellular Activity

- » Replexa+ stimulates cellular activity.
- » Fibroblast cells treated with Replexa+ showed a statistically significant increase in the rate of mitosis over the control ($p < 0.001$)¹.

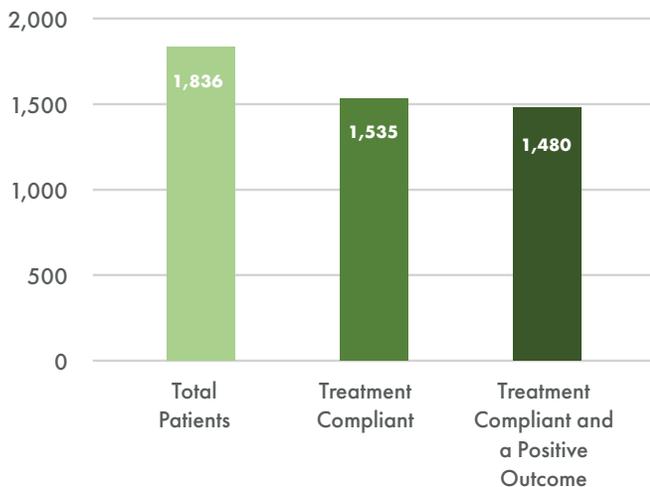

In Vitro Cellular Replication Rate Over Time

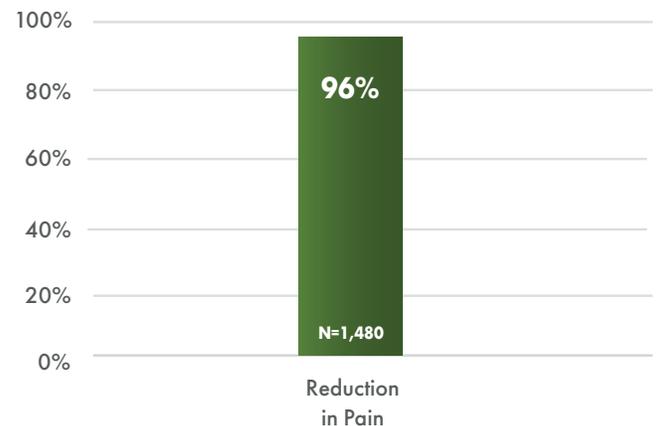

1. ProMedTek. (2009). Replexa+ Cellular Data Report: In Vitro Study.

2018 -2020 Retrospective Analysis²

Treatment Compliance

Positive Outcomes

84% of patients (N=1,535) were treatment compliant

96% of compliant patients (N=1,480) reported a positive outcome

Treatment compliant patients experienced one or more positive outcomes: a reduction in pain, improvement in mobility, increased activity levels, and quality of life.

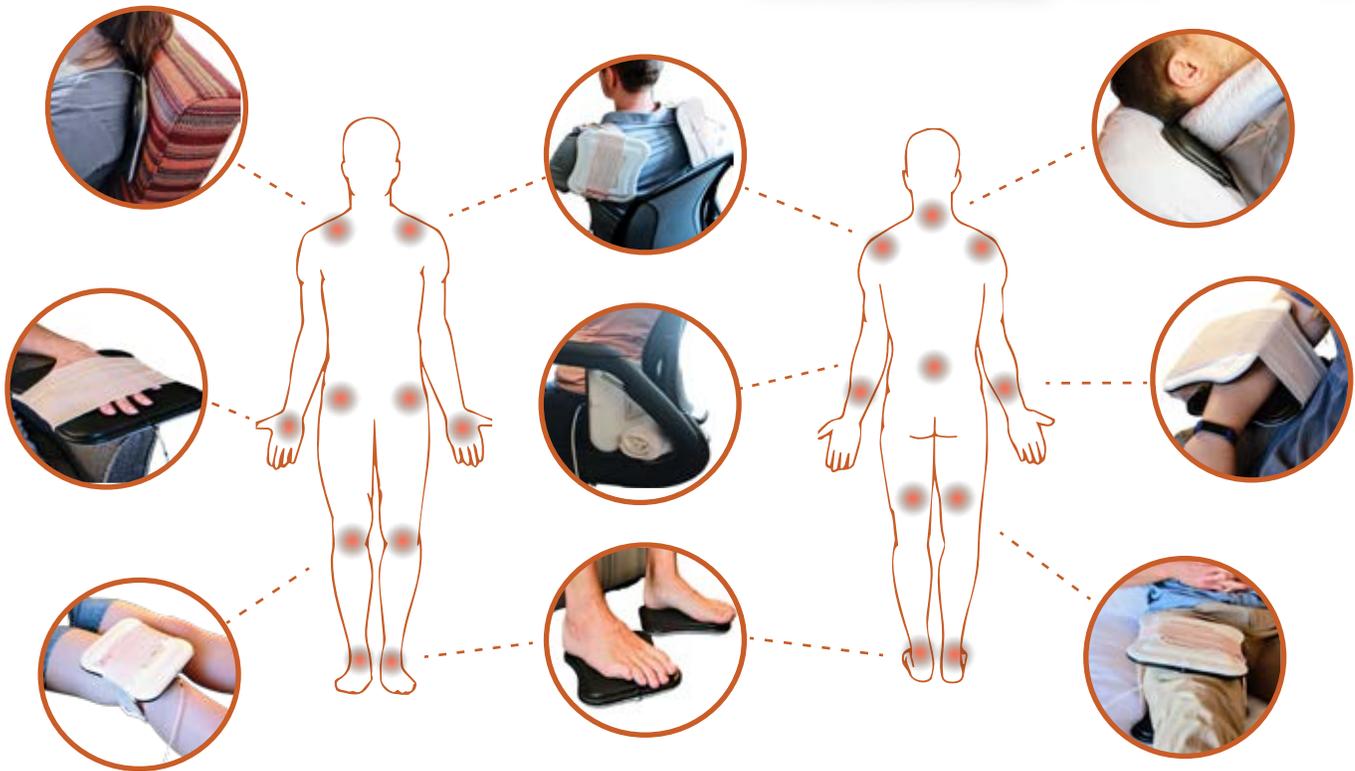

2. ProMedTek. (2022). A Retrospective Examination of Patient Results after Replexa+ Treatment.

Product & Application

Comfortable Options for Multiple Treatment Sites

Easy, One-Touch Operation:

- » Either one or two applicators can operate at the same time.
- » Color screen shows treatment progress.
- » Chime signals the end of the treatment session and automatically stops.

Replexa+ FDA 510(k) Indications for Use

The Replexa+ Shortwave Diathermy device delivers energy in the radio band of 27.12 MHz to provide deep heating therapeutic effects to body tissues. When shortwave diathermy is delivered to the body at intensities capable of generating a deep tissue temperature increase, it can be used to treat selected medical conditions such as:

Relieving pain

Increasing range of motion of contracted joints using heat and stretch techniques

Reducing muscle spasm

Increasing blood flow to tissues in the treatment area

Prior to use, please see the Replexa+ Instruction Manual to learn more about indications for use, contraindications, warnings, precautions, and how to use the device.
