ADVANTAGES

Benefit

Always carry your vehicle key with you. Your vehicle recognizes your digital key without the need to unlock your mobile device. The key functions are available even when the battery is empty and without an internet connection.

Installation

- Less than 15 minutes installation
- Totally plug & play device
- NO Tampering/cutting the original wiring harness insulation.
- Fitment will not disturb the original instrument panel wire. No need to access to panel wire
- Normal operation and Synchronized with the OEM Key Fob
- Vehicle operates normally
- NO Risk of fire hazards and NO tampered wiring harness.
- NO Risk of other malfunction involving electrical/electronic components

Share

Share your digital key with up to five friends via a simple text message. The recipient uses a smartphone from a different manufacturer or with a different operating system? No problem. The digital key can be shared across platforms.

Digital Key

Have you ever thought of entering your car without key? Well, the Digital Key Solution will make it possible and allows one to operate the car with phone.

About this app

Introducing Digital Key with a Digital Key-enabled vehicle and will be customized with your company logo if needed etc., Can quickly access and control your vehicle using your smartphone via Network, Bluetooth and NFC if necessary, Also allows you to remote control the vehicle and easily create, share and manage digital keys to give friends or family access to your vehicle.
