Re: Lead-based Paint Renovation, Repair and Painting (RRP) Training Program  
Accreditation, Renovator Initial and Refresher Courses, Application T567891

Dear Mr. Smith:

The U.S. Environmental Protection Agency, Region 5 has completed its review of your training program application to conduct training for the RRP program pursuant to 40 CFR Part 745, Subpart L, for the following disciplines:

- Renovator Initial Course (English) (NAT-RV-I-22516-3-EN)
- Renovator Refresher Course (English) (NAT-RV-R-22516-3-EN)

at the following sites:

- 1) The permanent training facility identified in your application located at 650 Eva Avenue, Akron, Ohio.
- 2) Other non-specified, non-permanent training facilities that comply with the site selection criteria described in your application.

Your application consists of the original application dated February 10, 2010, and includes all supplemental information, amendments and materials submitted after that date, including your application for re-accreditation dated February 16, 2018.

I am pleased to inform you that your training program is accredited to offer the above courses for professionals who work in all states, territories, and Indian tribes that do not have an authorized RRP program. The certificate of accreditation for each course is enclosed.

The accreditations are valid for a period of 4 years, and will expire on September 9, 2022. However, if any state, territory, or Indian tribe obtains RRP program authorization at any time during the term of your accreditation, your accreditation may no longer be valid in that newly authorized jurisdiction. A current listing of EPA-authorized programs can be found on EPA's website at "<https://www.epa.gov/lead/getcertified>."

- 7) Accredited training programs that have certified that EPA-recommended model training materials will be used to conduct their RRP courses must use the most current version of the EPA-recommended model training materials. Once a revised EPA model course has been finalized, previous versions are no longer valid EPA-recommended model training materials.

Be advised that this accreditation does not otherwise affect your responsibility as a training provider to comply with TSCA, 15 U.S.C. § 2601 et seq., and other applicable federal, state, and local laws, nor do they affect the rights of EPA or the United States to pursue appropriate injunctive or other equitable relief or criminal sanctions for any violations of law.

Thank you for your interest in providing accredited training services under EPA's RRP program. If you have questions or need assistance, please contact Emma Avant, of my staff, at (312) 886-7899, and refer to Application T567891.

Sincerely,

A handwritten signature in blue ink that reads "Mardi Klevs". The signature is fluid and cursive, with a long horizontal stroke at the end.

Mardi Klevs
