Preserving Reliability

## CONSTRUCTION SITE SECURITY & LOGISTICS

We at JAR Site Solutions Ltd specialise in providing quality security solutions to the Construction Industry. In the current economic climate, unprotected sites and properties, fall prey to pilferage and unauthorised entry, offering easy targets to the growing number of criminally minded who live among us.

Last year, theft and vandalism within the UK's Construction industry cost contractors over £800m, which is a conservative figure considering some crimes go unreported.

Our carefully selected and comprehensively trained Site Security Officers prove the ultimate deterrent.

As one of the largest suppliers of Security Operatives in the UK, we have years of experience and have established our position within the market place through a combination of hard work and putting our clients first. Our consultants know the Industry inside and out and can offer first-hand knowledge on work standards and invaluable assessments of candidate suitability for the job.

JAR Site Solutions' experienced consultants will work closely with your management team to identify and supply Security Guards suitable to your requirements.

Our Guards are fully conversant with the current Health & Safety regulations in force within the construction industry and all hold valid CSCS Cards.

### Training

Our Staff are constantly being assessed and developed. As such we have some of the best people in the industry flying our flag. As a Highfield Approved Training Centre we are also capable of delivering quality training to both our staff and our Clients; including Counter Terrorism awareness, Fire Marshall, First Aid and many more. With our investment in personnel, we have a team dedicated to providing quality to our clients no matter where they are.

## LOGISTICS PACKAGES

JAR Site Solutions Ltd has quickly established itself as one of the leading suppliers to the Construction Industry for Logistics Staff. JAR Site Solutions Ltd delivers its services in different ways, each dependent on the needs of our clients. Regardless of the service required, our clients can be assured that they will always receive quality and professionalism from our staff, no matter where the contract.

We will manage vehicular and pedestrian traffic to ensure your site operates safely and efficiently. We can also provide Traffic Marshall and Banksman personnel to control goods in and out from site, as well as to act as safety coordinators for pedestrians.

### Electronic Security

Working closely with partner companies, we can provide a number of access control options, CCTV and intruder Alarms, each one supporting our guards in ensuring the control of access to your site.

### Traffic Management Plans

Vehicles being reversed should be avoided wherever possible, as reversing is a major cause of fatal accidents. Our traffic management plans encourage one-way systems to reduce this risk, or a turning circle so that vehicles can turn without reversing. Our trained and competent Banksmen/Signallers are provided to direct all vehicle movements safely. Traffic Marshalls and our Security Guards will clearly identify cross-over points and marshal deliveries and pedestrian movement across the site.

JAR Site Solutions has a large resource pool in excess of 2000 staff, and can provide logistics teams including the following:

- Logistics Manager
- Gangerman
- Banksman
- Forklift Ops
- Traffic Marshalls
- Hoist Ops
- Security Guards
- Fire Marshalls
- Welfare Ops
- General Ops
