Back to School

Write it down

One tree can make over 170,000 pencils!

One tree can make over 8,300 sheets of paper!

color it in

Some crayons are made from soy beans

One acre of soybeans can produce 82,368 crayons.

The average parent spends \$122 on back to school supplies per child

Almost anywhere you look around the classroom, you can find products that come from agriculture!

or eat it up

Gelatin comes from the connective tissues of the beef animal, or commonly referred to as "beef byproducts"

Other products that contain gelatin might include jello, gum, fruit snacks like gummy bears, and marshmallows.

**ONE COW HIDE
CAN PRODUCE**

25 footballs

144 Baseballs

12 Baseball Gloves

18 Soccer balls

MUSIC

Today, gut strings can most commonly be found on very expensive tennis rackets, guitars, violins, and other stringed instruments

Intestinal strings are the only animal-derived product still commonly used in the creation of musical instruments.

Even today, some piano manufacturers use hooves, horns, and bones of a variety of animals to make piano keys.

Violin strings are often made from horse hairs!
