

## TECHNICAL INFORMATION

# Bona Sport® Recommended SPORT FLOOR MAINTENANCE

### PREVENTATIVE MAINTENANCE

1. Place proper walk-off mats in doorways to keep out dirt and grit.
2. Install floor protectors on tables and chairs used on hardwood floors.
3. Avoid excess moisture from tracked in water, leaks, or over-maintenance such as wet mopping.

### DAILY MAINTENANCE

1. Sweep or dust mop with Bona SuperCourt® Microfiber Dry Dusting Pad (untreated mop only) daily to remove dust, grit, or other abrasive particles. NOTE: Only use Bona SuperCourt Athletic Floor Care (AFC) Cleaner Concentrate diluted 1 part cleaner to 128 parts water (1:128 ratio) for dampening the pad. DO NOT USE ANY DUST MOP TREATMENTS. Replace soiled microfiber pads as necessary. Continued use of soiled pads will cause streaking.
2. Damp wipe all spills or spots with Bona SuperCourt AFC Cleaner Concentrate diluted at the 1:128 ratio.

### WEEKLY MAINTENANCE

1. Dilute 1 part Bona SuperCourt® AFC Cleaner Concentrate to 128 ounces of water for a tacking solution. Wet tack with the Bona SuperCourt Microfiber Wet Cleaning Pad. Be sure to rinse or wash cleaning pad as necessary. Continued use of a soiled cleaning pad will cause streaking.
2. Shoe marks and scuffs can be removed by using a Bona SuperCourt AFC Microfiber Scrubbing Pad and buffer (150-175rpm) with a (1:128) solution of Bona SuperCourt AFC Cleaner Concentrate. Lightly mist floor with the solution as you buff.
3. Make sure all residues from the Bona SuperCourt AFC Microfiber Scrubbing Pad buffing/cleaning procedure are removed from floor surface, by immediately tacking the surface with water-dampened SuperCourt AFC Microfiber Wet Cleaning Pad. Or, use an automatic scrubbing machine.
4. When using an automatic scrubber, be sure that the vacuum is functioning properly and that the machine is never unattended while it is on the wood sport floor. Use only Bona SuperCourt AFC Cleaner Concentrate mixed 1:128. Use only white polishing pads or Bona SuperCourt Microfiber Scrubbing Pads on the machine. Set the machine with a "light" flow rate of liquid. The pads need only to be damp in order to clean properly. **NOTE:** MFMA does not recommend the use of auto scrubbers on maple wood floors.

**NOTE:** A 1 gallon jug of Bona SuperCourt AFC Cleaner Concentrate will yield 128 gallons of cleaning solution. A 14,000 square-foot floor will need 14 gallons of solution per week. One gallon of concentrate will last approximately 2 months if the floor is cleaned once per week.

### PRECAUTIONS

1. Do not wet mop floor. Excessive water causes wood to expand and may possibly damage the flooring. Finishes are to protect the surface of the wood and are not waterproofing products.
2. Do not use water or Bona SuperCourt AFC Cleaner Concentrate for at least 10 days or until the floor is thoroughly cured after the final coat of finish is applied.
3. Do not put plastic over newly finished floors as it may interfere with the curing process.
4. Do not use any wax or wax products. Use a scrubbing machine that is dedicated to the wood floor only. This will help avoid the introduction of contaminants to the floor.
5. **Do not use a dust mop treatment** as they may interfere with recoating.
