pureAir 1500 Small Home Air Purification

Using advanced technologies including our proprietary form of photocatalytic oxidation, active radiant catalysis (ARC®), activated oxygen (ozone), and bipolar ionization, pureAir 1500 significantly reduces odors caused by bacteria, mold and mildew, as well as other odors including those from pets, cooking, and smoking.

Unlike passive filters that affect only air that passes through them, pureAir 1500 projects purifying solutions to the sources of pollution inside your home, continuously removing odors and airborne particles. Set your desired level of cleaning for while you are home or run a deep clean while you are away and come home to pure freshness!
