Top stories of the week

- Marine fuel sales in Singapore, the world's largest bunkering hub, reached 4.48 million metric tonnes in May 2026, down 7.4% from the previous year but up 3.9% from April's volume, according to data from the Maritime and Port Authority of Singapore. The total remained below March's 4.72 million tonnes when the Iran war boosted bunker demand. VLSFO sales reached 2.29 million tonnes, down 6.5% year-on-year but up 4.7% monthly, while HSFO sales totaled 1.79 million tonnes, down 5.2% annually. Distillate sales surged 28.2% monthly to 328,200 tonnes as MGO prices eased from the highs seen at the start of the Iran war. Biofuel blends declined for the third consecutive month to 60,800 tonnes, the lowest since January, though B100 sales hit a record 12,800 tonnes. LNG bunker sales jumped 56.2% year-on-year to 70,300 tonnes, the highest since January 2023, while no methanol or ammonia sales were recorded. Bunker calls rose 1.5% year-on-year to 3,690, with the average stem size at 1,214 tonnes. Singapore's average VLSFO price was $825 per tonne versus $511 last year. Sales over the first five months reached 23.3 million tonnes, up 5% annually, though prices may come under pressure following the US-Iran agreement to reopen the Strait of Hormuz.

OVERVIEW

This report contains the parameters of fuel prices and is intended to provide information regarding the two primary used fuels in marine fuel bunkering tasks. The prices presented in this weekly report reflects the most strategic areas and hot spots that acts as a guiding line for the fuel prices all over the world.
