

I Buy Scrap or Unwanted Vehicles for Safe Affordable Housing

Hello,

My name is Mario. I've been in the construction industry for over 30 years.

I will no longer be taking on extremely large projects in order to dedicate more time to a cause that I am very passionate about, which is safe affordable housing for individuals suffering from alcohol, drug addiction and other mental health illnesses. This housing is to be provided for those who have gone through rehab and are now drug or alcohol free, and who are working with a medical professional to stay that way. Having a place to live will help them go back to school, or back into the workforce, and will help to allow them to put their lives back together one day at a time.

Hope Housing for Humanity is a non-profit organization, funded entirely by me at this time. I do this by taking on smaller projects that allow me to support myself as well as keeping Hope Housing for Humanity moving forward. To help support this project, I am alerting the public that I would like to purchase scrap or unwanted cars, trucks, vans or other unwanted vehicles of any kind.

Visit HopeHousingForHumanity.com

Learn more about this project, get involved, support our on-line petition for safe, affordable housing that will go to all levels of government. This would mean the world to me. Think of what it would mean to those who suffer every day because of the lack of affordable housing.
