

Adopted Rules related to Refuse & Recycling in Haile Village Center Owners Association, Inc.

Published Online, Click Below:

https://engage.goenumerate.com/s/hailevillagecenter/hoapage.php?page=gen_8_6562

1. No trash or cardboard may be placed on the ground at any time. Owners are responsible for immediately disposing of all waste in a designated location. No trash should be left outside for any period of time.

2. All items for disposal must be placed inside a container.

Do not leave items you wish to dispose of *near a can* because it may not fit inside. Find an appropriate type of can that is not full; there are several cans and dumpsters in Haile Village Center to choose from. Owners may have to drive to a nearby Designated Refuse & Recycling location or dispose of the items at a location outside of HVCOA.

3. All cans must remain where they were placed and as indicated on the site map and included the corresponding photos. Do not relocate any HVCOA trash or recycle can somewhere that is more convenient for you or your business. If your business requires a special can, to be placed in a special location, contact GFL and sign a contract for private trash collection services. Request a GFL Service here: <https://gflenv.com/request-service/>

4. Collection sites *not* listed on the Designated Refuse & Recycling Areas map require HVCOA board and/or ARB approval.

The ARB form is available on the hailevillagecenter.com owner portal under Residents and Online Forms.

5. All issues with GFL should be directed to GFL. To contact your customer support team, visit gflenv.com/support and enter your address to send a message to your local branch. FAQ: <https://gflenv.com/frequently-asked-questions/>

Many businesses in Haile Village also currently contract privately with GFL for private trash and recycle collection. Collection sites not listed on the Designated Refuse & Recycling Areas map require HVCOA board and/or ARB approval. The ARB form is available on this owner portal under Residents and Online Forms.

Owners and Renters with private GFL dumpsters, grease containers, and other private refuse services are responsible for the following:

a) Provide a replacement trash surround when requested to do so, maintain the existing dumpster surround and/or fence materials that exist now.

(b) Providing signage related to refuse collection within 30 days when requested by management.

(c) Maintaining the cleanliness and/or integrity of the refuse location, which includes the concrete pad and enclosure.

(d) Providing pest control and maintaining potential infestations when requested by management.

(e) Privately owned dumpsters must remain closed and locked.

(f) Immediately disposing of all waste in a designated location. No trash should be left outside any unit owner's door for any period of time.

(g) Providing all governing docs for HVCOA, including rules and their occasional revisions, to their renters. www.hailevillagecenter.com has many community pages that are available to the public without a login. Landlords may consider requiring their renters to acknowledge receipt of HVCOA governing docs, rules and regulations. Renters should be encouraged to subscribe to association news alerts.
