

Arthur Machinery-Florida offers 5-Axis Machining from SMART CNC Machines

Tampa, Florida – Arthur Machinery in partnership with Jacore Technologies represents the SMART CNC full line of Machining Centers and Turning Centers.

SMART VX-350-5AX Trunnion 5-Axis Machining Centers feature an advanced industry leading design, yet they are also an economical 5-Axis tool. SMART builds heavy, robust cast iron bases and columns to ensure stability and long term accuracy. This construction combined with Hybrid-Ceramic spindle bearings and cartridge type design ensures vibration-free operation and accuracy during the heaviest or fastest of cutting operations. All SMART spindles feature the "dual-contact" system.

Fanuc controls, servo motors and spindle motors give the customer unquestioned reliability along with power and accuracy. FANUC continues to be the standard in CNC controls.

The VX-350-5AX Trunnion machine meets or exceeds many of today's machining requirements. Their versatility virtually guarantees a truly job-shop or production 5-Axis machine.
