

PURSUE YOUR GOALS

Optimum Market Portfolios

**Optimum Market
Portfolios**

DEPTH, PERSONALIZATION, INTELLIGENCE

THE OPTIMUM MARKET PORTFOLIOS PROVIDE INVESTMENT STRATEGIES THAT ARE DESIGNED TO HELP YOU PURSUE YOUR GOALS BY MANAGING RISK, OFFERING SERVICES BY PROFESSIONAL MONEY MANAGERS, AND PROVIDING OBJECTIVE INVESTMENT RESEARCH.

Made up of a diverse series of mutual funds, the portfolios feature 10 or more money managers who are typically employed by institutional investors—large organizations that make multimillion-dollar investments. In one comprehensive approach, the Optimum Market Portfolios give you access to professional money management at a low entry point, as well as asset allocation models that feature:

Depth

The funds are managed by highly experienced money managers in the industry who were selected based on the extensive expertise they have in the asset classes they represent.

Personalization

The portfolios utilize independent, objective research—providing a straightforward way to build a professional asset allocation strategy that is designed for your individual goals, risk tolerance, and time horizon.

Intelligence

Applying strategies that are consistent with your goals, but can also keep your investments on track, is essential to the success of your long-term objectives. Optimum Market Portfolios use dynamic strategies that not only help you work toward your plans and capture market opportunities, but also aid in reducing risk when possible.

Discover how bringing depth, personalization, and intelligence to your portfolio can help you pursue your financial goals.

DEPTH OF EXPERIENCE, DEPTH OF OPTIONS

THESE PORTFOLIOS USE OPTIMUM FUNDS, WHICH ARE MUTUAL FUNDS DISTRIBUTED BY DELAWARE DISTRIBUTORS, L.P., A COMPANY KNOWN FOR ITS EXPERIENCED AND SAVVY MANAGERS.

Delaware Distributors, L.P., is an affiliate of Macquarie Investment Management, which provides investment services to some of the nation's largest institutional entities. The firm also deploys an approach commonly used by institutions and investment consultants: hiring multiple money managers within an asset class to take advantage of each manager's unique expertise, investment approach, and characteristics.

Each fund has two money managers with complementary investment styles to create a unique allocation designed to bring about a specific outcome that is aligned with your goals in mind. Instead of just one perspective, you get multiple, so you're not just diversified at the asset level, but also at the manager level.

These managers and their teams research thousands of companies to identify the most promising and financially stable organizations before choosing which to bring into the funds. Macquarie Investment

Management and LPL Research evaluate and monitor the money managers in charge of the funds to ensure they are fulfilling their commitments and stated objectives.

The players

Your portfolio isn't put together by one single person. A team of experienced individuals work together to build your investment strategy.

Player 1

Your Advisor

As your advisor, I'll work with you to determine your goals and risk preferences and then select a personalized investment strategy for your unique situation.

Player 2

LPL Research

LPL Research assesses the money managers and provides recommendations to Macquarie Investment Management. The Research team also evaluates trends in asset classes, analyzing each one's returns and risk characteristics over time and throughout different market environments. Based on their assessments, LPL Research adjusts the asset allocation available in the Optimum Market Portfolios.

Player 3

Macquarie Investment Management

Macquarie Investment Management monitors and evaluates mutual fund money managers to ensure their decisions are in line with the stated objectives for each portfolio. Macquarie Investment Management also oversees all administrative responsibilities associated with the Optimum Mutual Funds.

Player 4

Money Managers

The individual money managers build the actual investment models inside the portfolios. They stay within the stated asset allocations designed by LPL Research and Macquarie Investment Management, but choose the individual investments that will go into the funds.

THOUGHTFULLY PERSONALIZED

THE PORTFOLIOS WERE DESIGNED FOR A FULL SPECTRUM OF INVESTORS. WHETHER YOU BELIEVE IN MORE OF A CONSERVATIVE INVESTING STYLE OR FAVOR A GROWTH-ORIENTED APPROACH, THERE'S A PORTFOLIO DESIGNED FOR YOU. TOGETHER WE'LL SELECT ONE OF THE FOLLOWING INVESTMENT OBJECTIVES BASED ON THE BEST STRATEGY FOR YOUR GOALS AND RISK PREFERENCES:

- **Aggressive Growth:** This portfolio is designed to pursue maximum capital growth, and is ideal for investors who have no need for current income and can handle high levels of risk over a long investment horizon.
- **Growth:** This portfolio seeks to grow investments over time and is ideal for investors who do not require much current income, and are comfortable with higher levels of risk.
- **Growth with Income:** While this portfolio seeks modest amounts of growth, there is some focus on current income. It uses equity, fixed income, and cash equivalent securities.
- **Income with Moderate Growth:** This portfolio seeks to provide current income, while still pursuing some moderate growth. It is designed for investors who prefer less risk.
- **Income with Capital Preservation:** This portfolio is designed for investors who desire minimal risk—it seeks to provide current income and prevent loss, and is ideal for investors with very short investment horizons.

¹ Target equity allocation of portfolio. Actual portfolio model allocations may vary from target. Please see the Optimum Market Portfolios Models & Managers brochure for details. There is no guarantee that the Optimum Market Portfolios will attain their stated investment objectives. No strategy assures success or protects against loss.

While OMP provides a great deal of depth, the multifaceted strategies are delivered in five investment objectives that can be customized based on your own preferences.

COMPELLING MECHANICS, POWERFUL STRATEGY

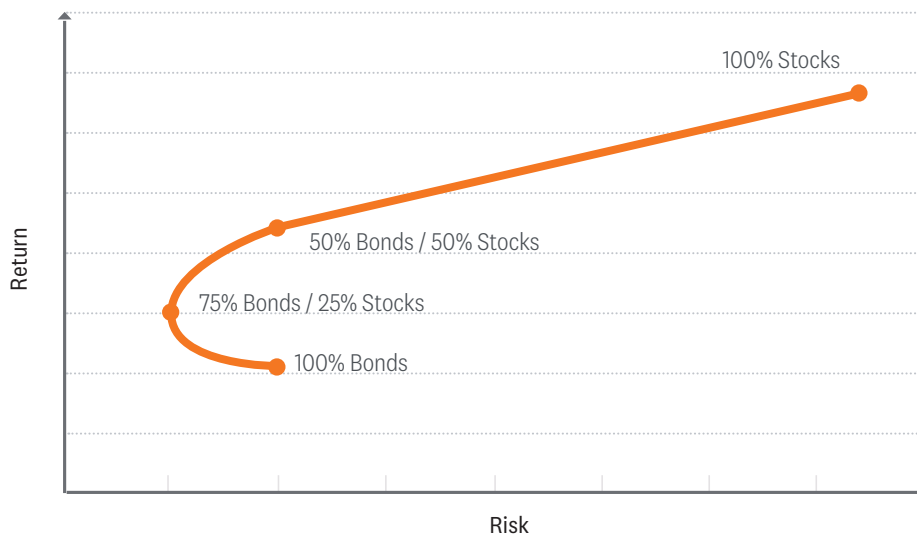

**RISK MANAGEMENT STRATEGIES ARE LEVERAGED
TO HELP YOU WORK TOWARD YOUR GOALS.**

Asset allocation

Asset allocation—the process of spreading your investment dollars across different asset classes—is one of the most effective risk-management strategies you can use. This is best demonstrated by the Efficient Frontier, as illustrated below, showcasing various blends of stocks and bonds plotted in terms of their historical risk and return levels. A portfolio of 100% stocks would historically give you the highest return potential, but also expose you to the greatest amount of potential risk. A portfolio of 75% bonds / 25% stocks would put you at the other end of the risk spectrum, but offer a lower return potential.

Based on your specific risk preferences and goals, Optimum Market Portfolios attempt to determine the best mix of assets for your situation—one that seeks the returns you need without exposing you to more risk than you would prefer.

The efficient frontier

Diversification

In Optimum Market Portfolios, asset allocation is further refined through diversification in specialized categories within stocks and bonds. By diversifying your individual investments within your personalized portfolio, you can take advantage of developing opportunities in the market, while minimizing the impact of any one investment on your portfolio.²

Because the markets for stocks, bonds, and cash equivalents do not all move in the same direction or to the same degree, a portfolio that diversifies across different investment categories may help you achieve your return goals with lower volatility. These portfolios help you diversify among investment style, company size, and geographic region.

Rebalancing

Once you have established a strategy to pursue your long-term financial goals, it's crucial that you have the tools to keep that strategy on track. Portfolios that aren't adjusted on a regular basis to maintain their original allocation tend to drift away from their established strategy. As a result, your portfolio could move into unintended—and unacceptable—levels of risk that could have an impact on meeting your financial goals.

Through the automatic rebalancing feature available in Optimum Market Portfolios, you have just the tool needed to keep your portfolio in line with your target allocations. Based on your preferences, investments within your portfolio are adjusted as needed on a quarterly, semi-annual, or annual basis. This type of automatic rebalancing aims to remove emotion from the investment process and keep you aligned with your financial goals.³

² There is no guarantee that a diversified portfolio will enhance overall returns or outperform a non-diversified portfolio. Diversification and asset allocation do not ensure against market risk. Stocks and bonds will experience market fluctuations and may be worth more or less upon sale.

³ Rebalancing a portfolio may cause investors to incur tax liabilities and/or transaction costs and does not assure a profit or protect against a loss.

IT'S TIME TO PURSUE YOUR GOALS— GET STARTED TODAY

About LPL Financial

LPL Financial was founded on the principle that the firm should work for the advisor, and not the other way around. Today, LPL is a leader* in the markets we serve, supporting more than 17,000 financial advisors, 800 institution-based investment programs and 450 independent RIA firms nationwide. We are steadfast in our commitment to the advisor-centered model and the belief that Americans deserve access to objective guidance from a financial advisor. At LPL, independence means that advisors have the freedom they deserve to choose the business model, services, and technology resources that allow them to run their perfect practice. And they have the freedom to manage their client relationships, because they know their clients best. Simply put, we take care of our advisors, so they can take care of their clients.

*Top RIA custodian (Cerulli Associates, 2019 U.S. RIA Marketplace Report); No. 1 Independent Broker-Dealer in the U.S. (Based on total revenues, *Financial Planning* magazine June 1996-2020); No. 1 provider of third-party brokerage services to banks and credit unions (2020-2021 Kehler Bielan Research & Consulting Annual TPM Report)
