Drawing on our 40-year relationship, we will offer our skills and personal life experience deeply living the teachings of the Pathwork Guide.

We will create embodied experiences working with the Guide's lectures on relationship to self, to others (like us and not), and to God or Spirit.

These will include meditations, breathing exercises, group process and more—all with respect for self and collective responsibility and authenticity.

With opportunities for creativity, music, ritual and fun, we'll explore:

- How do we nourish ourselves- physically, emotionally, mentally?
- Do we access our positive intentionality and activate our love or get stuck in negativity?
- How do we reach for help and guidance from our spiritual center?
- In despair, do we only ask in crisis?
- Do we nourish this spiritual connection for the sake of love/union?
- What will we do with this bounty? Give it all away or limit giving our life energies in fear of scarcity, rejection?

Together, we will co-create a healing container to explore and learn from each other as we delve into the Guide's teachings on relationship.

With excitement we come to Philadelphia in midsummer to dream!
