Area of excellence

ODC Cargo and Project Cargo

Experience counts when it comes to handling complex projects and movements of oversized and heavy-lift cargoes. Managing complex transportation for large scale projects requires experienced, intelligent and knowledgeable personnel who are committed to researching all options, investigating each detail, surveying and identifying potential obstacles, physical and non-physical, and reacting to extraordinary circumstances with quick and decisive actions.

Our approach is to break down project logistics and transport into essential elements, and then to assign direct supervision over each. Advance trips by our Projects Operations Specialist to the key points in the project corridor ensure that Globalink Logistics has the first-hand knowledge required to "make things happen".
