2018 PATROLLERS

The 2018 Patroller-2 and Patroller-4 are highly versatile and maneuverable vehicles having very low centers of gravity able to cross obstacles 9" high, climb curbs, cross medians, drive on sidewalks if needed, maneuver between traffic and able to turn within a single traffic lane. The Patroller's are designed to provide for continuous 8 hours of operation without the need to refuel their 8.5 gallon fuel tank while providing the operator with a fully enclosed heated and air-conditioned cab, enabling the operator to perform their job in rain or shine and hot or cold weather conditions. The Patroller's are the vehicles for school crossings, around school campuses, shopping centers, resorts, parking patrol, special events, traffic congestion and more.
