

***INDIANA TEAMSTERS PENSION PLAN***

***Actuarial Valuation Report  
For Plan Year Commencing  
January 1, 2022***

December 19, 2022

Board of Trustees  
Indiana Teamsters Pension Plan

Dear Trustees:

We have been retained by the Board of Trustees of the Indiana Teamsters Pension Plan to perform annual actuarial valuations of the pension plan. This report presents the results of our actuarial valuation for the plan year beginning January 1, 2022. The valuation results contained herein are based on current plan provisions summarized in Appendix A, the actuarial assumptions and methods listed in Appendix B and on financial statements audited by Katz, Sapper & Miller, LLP. Participant data was provided by AlaTek, LLC. While we have reviewed the data for reasonableness in accordance with Actuarial Standards of Practice No. 23, we have not audited it. The data was relied on as being both accurate and comprehensive.

This report has been prepared in order to (1) assist the Trustees in evaluating the current actuarial position of the plan, (2) determine the minimum required and maximum deductible contribution amounts under Internal Revenue Code §431 and §404, (3) provide the fund's auditor with information necessary to comply with Accounting Standards Codification 960, and (4) document the plan's certified status under Internal Revenue Code §432 for the current year and provide the basis to certify such status for the subsequent year. In addition, information contained in this report will be used to prepare Schedule MB of Form 5500 that is filed annually with the IRS and could be used to calculate employer withdrawal liability. We are not responsible for the use of, or reliance upon, this report for any other purpose.

We have prepared this report in accordance with generally accepted actuarial principles and practices and have performed such tests as we considered necessary to assure the accuracy of the results. The results have been determined on the basis of actuarial assumptions that, in my opinion, are appropriate for the purposes of this report, are individually reasonable and in combination represent my best estimate of anticipated experience under the plan. Actuarial assumptions may be changed from previous valuations due to changes in mandated requirements, plan experience resulting in changes in expectations about the future, and/or other factors. An assumption change does not indicate that prior assumptions were unreasonable when made. For purposes of current liability calculations, assumptions are prescribed by regulation or statute. By relying on this valuation report, the Trustees confirm they have accepted the assumptions contained in the report.

The results are based on my best interpretation of existing laws and regulations and are subject to revision based on future regulatory or other guidance.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions, changes in economic or demographic assumptions, increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an

amortization period or additional cost or contribution requirements based on the plan's funded status), and changes in plan provisions or applicable law.

United Actuarial Services, Inc. does not provide, nor charge for, investment, tax or legal advice. None of the comments made herein should be construed as constituting such advice. I am not aware of any direct or material indirect financial interest or relationship that could create a conflict of interest that would impair the objectivity of our work.

The previous year's funding standard account projection graph was revised to reflect removing the zero dollar floor for negative UAL values. This change was made based on the potential for anomalous results under Revenue Ruling 81-213 and this alternative approach, which has been accepted by the IRS.

The undersigned actuary meets the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained in this report. I am available to respond to any questions you may have about this report.

| <i>Actuarial</i>                            | 76,185      | 67,466      | 59,621      | 53,867      | 49,366      |
| Accum. ben. (\$ 000)                        | 64,409      | 57,278      | 50,652      | 45,934      | 40,391      |

The chart displays three data series over a five-year period (2018-2022). The Y-axis represents values in thousands of dollars, ranging from 0 to 90,000. The X-axis represents the years. The legend indicates: Assets (Actuarial) in blue, Assets (Market) in green, and Accumulated Benefits in red with diamond markers. Both asset values and accumulated benefits show a consistent downward trend over the period.

| Year | Assets (Actuarial) | Assets (Market) | Accumulated Benefits |
|------|--------------------|-----------------|----------------------|
| 2018 | 49,366             | 49,668          | 40,391               |
| 2019 | 53,867             | 53,867          | 45,934               |
| 2020 | 59,621             | 61,113          | 50,652               |
| 2021 | 67,466             | 70,147          | 57,278               |
| 2022 | 76,185             | 80,534          | 64,409               |

**5 - YEAR SUMMARY OF DEMOGRAPHICS**

---

***CHANGES FROM PRIOR STUDY***

---

***Changes in Plan Provisions***

The plan provisions underlying this valuation are the same as those valued last year.

***Changes in Actuarial Assumptions and Methods***

The actuarial assumptions and methods used in this valuation differ from those used in the prior valuation in the following respects:

- The assumed mortality rates were adjusted from 100% of the PRI-2012 Blue Collar Mortality Table for males and females to 95% of the PRI-2012 Blue Collar Mortality Table for males and females. The mortality projection scale was updated from MP-2020 to MP-2021. These changes were made (1) to incorporate credible plan experience into expected mortality, and (2) because we wanted to reflect the latest mortality improvement data available.
- We increased the assumed daily/hourly/weekly contribution rates to reflect negotiated increases in the year.
- The expense load on ASC 960 liabilities was changed from 8.00% to 7.75% based on recent plan experience.
- The current liability interest rate was changed from 2.08% to 1.91%. The new rate is within established statutory guidelines.

Additionally, the projection assumptions used in this valuation differ from those used in the prior valuation in the following respects:

- The future hours assumption used for projection purposes was increased from 1,635,000 for all years to 1,700,000 for all years. This reflects input from the Trustees regarding future industry activity as used for the 2022 PPA certification.
- Current year projections reflect the increase in the PBGC premium to \$35 per participant in 2023. The increase to \$52 per participant in 2031 is already projected.

**HISTORY OF MAJOR ASSUMPTIONS**

| <i>Second year</i>                        | 1,700                                   | 1,635       | 1,550       | 1,318       | 1,248       |
| <i>Third year &amp; later</i>             | 1,700                                   | 1,635       | 1,575       | 1,318       | 1,248       |

\* Actual average derived from application of assumptions specified in Appendix B.

**EXPERIENCE VS. ASSUMPTIONS**

*Comparing the prior year's experience to assumptions provides indications as to why overall results may differ from those expected*

Actuarial assumptions are used to project certain future events related to the pension plan (e.g. deaths, withdrawals, investment income, expenses, etc.). While actual results for a single plan year will rarely match expected experience, it is intended that the assumptions will provide a reasonable long term estimate of developing experience.

The following table provides a comparison of expected outcomes for the prior plan year with the actual experience observed during the same period. This display may provide insight as to why the plan's overall actuarial position may be different from expected.

| <i>Plan Year Ending<br/>December 31, 2021</i>               | <i>Expected</i> | <i>Actual</i>  |
|---|-----------------|----------------|
| <b>Decrements</b>   |                 |                |
| <i>Terminations (net of rehires)</i>                        | 134.2           | 154            |
| <i>Active retirements</i>                                   | 20.8            | 17             |

\* Expected average based on the average for the total group of participants.

**PLAN MATURITY**

*Measures of plan maturity can play a part in understanding risk and a plan's ability to recover from adverse experience*

When a new pension plan is first established, its liabilities are typically limited to active plan participants. However, as people become vested and retire, a plan begins to develop liabilities attributable to nonactive participants (retirees and inactive vested participants). The process of adding nonactive liabilities (often referred to as "maturing")

is a natural outgrowth of the operation of the plan. As a plan matures, its liabilities tend to balloon in relation to its contribution base, making it more difficult to correct for adverse outcomes by increasing contribution rates or reducing future benefit accruals.

Headcount ratios show the number of retiree or inactive participants supported by each active participant. While there is no hard and fast rule, we generally consider a plan to be mature if each active is supporting more than 1 retiree or more than 2 nonactives. A negative net cash flow (benefits payments and expenses greater than contributions) can also be an indicator of a mature plan. A negative cash flow, when expressed as a percentage of assets, in excess of the assumed rate of return on fund assets may not be sustainable in the long term.

\* Actuarial value.

**CONTRIBUTION ALLOCATION**

*These graphs show how the contributions are being spent*

The following allocation charts illustrate how the expected contribution rate for the coming plan year will be “spent” to pay for benefits being earned in the current year, plan expenses, and to provide a margin against future adverse experience.

**Contribution Allocation as of January 1, 2022**  
**Total Average Expected Contribution Rate \$3.73**

**Contribution Allocation as of January 1, 2021**  
**Total Average Expected Contribution Rate \$3.54**

**FUNDING STANDARD ACCOUNT PROJECTION**

*The funding standard account projection is a major driver of PPA status*

The funding standard account (FSA) was established by ERISA as a means of determining compliance with minimum funding standards. The FSA is hypothetical in the sense that it does not represent actual assets held by a custodian.

Rather, a positive FSA balance (called a “credit balance”) means that the plan has exceeded minimum funding standards on a cumulative basis, while a negative balance (called a “funding deficiency”) means that the plan has fallen short of such standards.

Actuaries must project the plan’s FSA each year in order to determine PPA status. If a funding deficiency is projected in a future year, the plan could be forced into yellow (endangered) or red (critical) status depending how far into the future the first projected funding deficiency is. The plan’s FSA projection appears below. These projections are based on the assumptions summarized in the “Actuarial Assumptions used for Projections” section of Appendix B.

As a rule of thumb, UAS recommends in non-Critical status year that plans maintain a projected credit balance of at least one year’s contributions (shown as an orange dotted line in the graph below) in each future year. Maintaining a “cushion” in the Funding Standard Account helps minimize the risk of a surprise funding deficiency at the end of a non-Critical status plan year. Such a deficiency could trigger an excise tax payable directly by employers. If the Plan is in Critical status at the start of plan year, it is protected from these excise taxes so long as scheduled progress has been satisfied in at least one of the past three plan years.

An additional blue dashed line has been added to illustrate the impact of a lower potential short-term assumed return of 6.00% for the next 10 years.

**FUNDED RATIO PROJECTION**

*The plan's funded ratio is a major driver of PPA status*

The funded ratio is defined as the actuarial value of plan assets divided by the plan's liabilities for accrued benefits. Along with the funding standard account projection, funded ratio is one of the two major drivers of PPA funded status. In order for a plan to enter the green zone (also called "safe" or "not endangered or critical") the funded ratio must be at least 80%. An insolvency, which is the plan year when the plan would run out of money, occurs if the funded ratio is projected to be 0%. In order for a plan to enter critical and declining status, an insolvency needs to be projected within 20 plan years of the PPA certification (it may need to be within 15 years under certain conditions). The projection of the funded ratio appears below. These projections are based on the assumptions summarized in the "Actuarial Assumptions used for Projections" section of Appendix B.

An additional blue dashed line has been added to illustrate the impact of a lower potential short-term assumed return of 6.00% for the next 10 years.

## PPA STATUS PROJECTIONS

*A plan that is not in green (i.e. safe) zone is subject to additional requirements and restrictions*

The following graphs show *deterministic* and *stochastic* projections of PPA status based on the assumptions summarized in the “Actuarial Assumptions used for Projections” section of Appendix B. The

deterministic projection shows the expected status for each future year. The stochastic projection shows the estimated probability of being in each status in each future year. The projections are based on the current plan and do not assume any changes in plan provisions or contribution rates, even if the plan moves to a worse PPA zone.

### Projected PPA Status – Deterministic Projection

### Projected PPA Status – Stochastic Projection\*

\* Distribution of returns based on the mean and standard deviation of the Plan's investment portfolio. Mean for years 1-10 based on short-term expectations, years 11-20 based on long-term expectations.

### SENSITIVITY ANALYSIS AND SCENARIO/STRESS TESTING

*Sensitivity analysis along with scenario and stress testing can help Trustees gauge a plan's key risks*

*Sensitivity analysis* studies the funding impact to the plan when a given assumption changes. *Scenario testing* studies the funding impact from actual experience for one or more possible outcomes. *Stress testing* studies the funding impact from poor experience. The sensitivity analysis

along with the scenario and stress testing below can be used to gauge a plan's key risks from investments and hours.

Currently, the plan is over 100% funded and projects no funding deficiencies. In the table below we use these results to perform scenario and stress testing on the investment return assumption by assuming asset returns for the 2022 plan year of -3.30%, -8.30%, and -13.30%. The -8.30 % return represents the estimated year-to-date asset return of -8.86% through November 30, 2022 combined with a return at the expected 7.00% annual rate for the rest of the year. We also perform sensitivity analysis on the future hours assumption by showing the effect of varying it by  $\pm 10\%$ . We also examine the impact of an asset return closer to the median of 6.00% for the next 10 years at the baseline hours. Lastly, we determined the minimum return necessary that would project the plan to be at least 100% funded in the next 20 years.

| <i>Assumptions</i> | <i>Funding Stats</i> | <i>Scenario Testing:<br/>Return for 2022 (7.00%<br/>thereafter)</i> |        |         | <i>Minimum<br/>2022<br/>Return to<br/>Remain at<br/>Least<br/>100%<br/>Funded<br/>for 20<br/>Years.</i> |

**RATE OF RETURN ON FUND ASSETS**

**Historical Rates of Net Investment Return**

The following table shows average rates of return over various periods calculated on a geometric average basis. These statistics may not be appropriate for evaluating a Plan's rate of return assumption as such assumption is forward-looking whereas the statistics are historical. Furthermore, these statistics do not reflect the internal rate of return actually experienced by the Fund over these periods.

**Average Rates of Net Investment Return (geometric average)**

| Period   | Return on Market Value     |       | Return on Actuarial Value  |       |
|----------|----------------------------|-------|----------------------------|-------|
|          | Period Ending December 31, |       | Period Ending December 31, |       |
|          | 2021                       | 2020  | 2021                       | 2020  |
| One year | 11.10%                     | 9.73% | 9.11%                      | 8.02% |
| 5 years  | 9.00%                      | 7.84% | 6.82%                      | 6.27% |
| 10 years | 7.92%                      | 6.98% | 7.17%                      | 6.95% |
| 15 years | 6.44%                      | 6.43% | 6.57%                      | 6.58% |
| 20 years | 7.25%                      | 5.83% | 6.45%                      | 5.94% |

| Interest rate used to value benefits   | 7.00%         | 7.00%         |

***FUNDING PERIOD***

The funding period is the approximate number of years that would be required to completely fund the unfunded entry age normal actuarial liability if future plan experience occurs according to the assumptions. The funding period is an indicator of the long term financial soundness of the plan. Historically, funds often targeted a maximum funding period of up to 20 years. Today, asset losses are being paid off over a maximum of 15 years and are the primary driver for ERISA minimum funding. An ultimate target of no more than 10 years is recommended. A lower, more conservative funding period target can be chosen. As the funding period drops, the risk of having future funding issues also diminishes.

| <b><i>Funding Period Calculation</i></b>       |                    |                    |

***CURRENT LIABILITY***

Current Liability is determined in a manner similar to the value of accrued benefits, but using an interest rate assumption within an acceptable range determined by the IRS. The current liability is used in the determination of the maximum deductible employer contribution and full funding limit under the Internal Revenue Code. For plans in critical status, it may also be used to determine eligibility for financial assistance under the America Rescue Plan. This alternative measure of liabilities is also a “low default risk” measure. Such a measure could match a lower risk investment strategy, which would provide more benefit security if it can be adequately funded.

***MAXIMUM DEDUCTIBLE CONTRIBUTION***

The maximum amount of tax-deductible employer contributions made to a pension plan is determined in accordance with Section 404(a) of the Internal Revenue Code. For a multiemployer pension plan, Section 413(b)(7) of the Internal Revenue Code and IRS Announcement 98-1 provide that, if anticipated employer contributions are less than the deductible limit for a plan year, then all employer contributions paid during the year are guaranteed to be deductible. If anticipated employer contributions exceed the deductible limit, the Trustees have two years from the close of the plan year in question to retroactively improve benefits to alleviate the problem.

***Maximum Deductible Contribution  
Plan Year Beginning January 1, 2022***

|  |        |                 |
|--|--------|-----------------|
| Preliminary deductible limit   |        |                 |
| <i>Normal cost (including expenses)</i>                                | \$     | 3,567,699       |
| <i>10-year limit adjustment (using "fresh start" alternative)</i>      |        | 781,359         |
| <i>Interest to end of plan year</i>                                    |        | 304,434         |
|  |        | 4,653,492       |
| <br>Full funding limit   |        | <br>56,260,997  |
| <br>Maximum deductible contribution override                           |        |                 |
| <i>140% of vested current liability projected to December 31, 2022</i> |        | 185,319,857     |
| <i>less: Actuarial value of assets projected to December 31, 2022</i>  |        | 78,414,878      |
|  |        | 106,904,979     |
| <br>Maximum deductible contribution*                                   | <br>\$ | <br>106,904,979 |
| <br>Anticipated employer contributions                                 | <br>\$ | <br>6,278,527   |

\* Equals the lesser of the preliminary deductible limit and the full funding limit, but not less than the maximum deductible contribution override.

\* Actuarial value.

\*\* Liabilities and assets reflect the merger with Local 364 beginning December 31, 2009

***Example of Calculation of Employer Liability Upon Withdrawal***

|                        |  |
|------------------------|--|
| <u>Years</u>           | <u>Ratio of Withdrawing Employer's<br/>Contributions to Total Employer Contributions</u> |
| 1-1-2017 to 12-31-2021 | 1.0%   |

Employer withdraws during 1-1-2022 through 12-31-2022 plan year:

Withdrawal Liability = (\$ 0) x 1.0% = \$0

Withdrawal Liability after De Minimis = \$0

***TERMINATION BY MASS WITHDRAWAL***

---

If all employers were to cease to have an obligation to contribute to the plan, the plan would be considered “terminated due to mass withdrawal.” In this event, the Trustees would have the option of distributing plan assets in satisfaction of all plan liabilities through the purchase of annuities from insurance carriers or payment of lump sums. If assets are insufficient to cover liabilities, a special actuarial valuation pursuant to Section 4281 of ERISA would be performed as of the end of the plan year in which the mass withdrawal occurred. If the Section 4281 valuation indicates the value of nonforfeitable benefits exceeds the value of plan assets, employer withdrawal liability would be assessed.

The ERISA Section 4281 valuation described above uses required actuarial assumptions that are typically more conservative than those used for valuing an on-going plan. In order to illustrate the impact of the mass withdrawal assumptions, we performed an illustrative Section 4281 valuation as if mass withdrawal had occurred during the prior plan year. The value of assets used below is market value without any adjustments for outstanding employer withdrawal liability claims.

As required by regulation, interest rates of 2.40% for the first 20 years and 2.11% for each year thereafter and the GAM 94 Basic Mortality Table projected to 2031 were used.

***Illustrative Section 4281 Valuation  
as of December 31, 2021***

---

|   |    |  |             |
|---|----|--|-------------|
| Value of nonforfeitable benefits                                      |    |  |             |
| <i>Participants currently receiving benefits</i>                      | \$ |  | 33,191,352  |
| <i>Inactive vested participants</i>                                   |    |  | 24,093,983  |

## *APPENDICES*

---

***PLAN HISTORY***

---

***Origins/Purpose***

The Indiana Teamsters Pension Fund was established effective September 1, 1989 pursuant to an Agreement and Declaration of Trust and plan document for the stated purpose of providing retirement benefit to Chauffeurs, Teamsters, Warehousemen and Helpers Local Union No. 135.

The Pension Plan is managed under the provisions of the Labor Management Relations Act by a Board of Trustees consisting of an equal number of representatives from Labor and from Management.

The purpose of the Pension Plan is to provide Normal and Early Retirement Benefits, Joint and 50% Survivor Benefits, Optional Retirement Benefits, Vested Benefits and Death Benefits.

***Merger of Local 364 Sales Drivers and Industry Pension Fund***

The Local 364 Sales Drivers and Industry Pension Fund merged into this Fund on October 31, 2009. The pre-merger benefits for Local 364 participants are preserved under the eligibility and accrual provisions immediately prior to the merger. These provisions include the following service accrual, eligibility requirements, and early retirement adjustments:

Contributions and pension credits are reported and based on weeks worked.

| <u>Weeks<br/>Worked</u> | <u>Pension<br/>Credits</u> |
|-------------------------|----------------------------|
| 0-21                    | 0.00                       |
| 22-26                   | 0.50                       |
| 27-39                   | 0.75                       |
| 40+                     | 1.00                       |

The accrued benefit immediately prior to the merger was \$60 per pension credit.

Normal retirement age for benefits accrued immediately prior to the merger is the earlier of age 65 and 5<sup>th</sup> anniversary of participation.

Early retirement age for benefits accrued immediately prior to the merger is age 50 and 15 pension credits. The reduction for early retirement benefits is 7/12ths of 1% for each month prior to age 57 down to age 56 plus 1/3<sup>rd</sup> of 1% for each month prior to age 56.

*Appendix A - Plan Provisions  
Indiana Teamsters Pension Plan  
January 1, 2022 Actuarial Valuation*

**EMPLOYER CONTRIBUTIONS**

The Pension Plan is financed entirely by contributions from the employers as specified in the Collective Bargaining Agreement. Following is a listing of pension contribution rates.

| <i>ER#</i> | <i>Employer</i>                 | <i>Contribution Rate as of 1/1/2022</i> | <i>Next Rate Change</i> |                  |
|------------|---------------------------------|---|-------------------------|------------------|
|            |                                 |   | <i>Rate</i>             | <i>Eff. Date</i> |

\* Moves to weekly rate of \$163.90 effective 4/1/2022.

\*\* Class 2 \$250.00/week, Class 3 \$200.00/week, Class 4 \$150.00, Class 5 \$100.00

***SUMMARY OF PLAN PROVISIONS***

|   |   |
|---|---|
| <b>Participation</b>                                    | Any employee for a qualifying employer for whom contributions have been made to the plan  |
| <b>Year of service</b>                                  | Plan Year with at least 1,000 hours   |
| <b>Break in service</b>                                 | Plan Year less than 501 hours.  |
| <b>Normal retirement benefit<br/><i>Eligibility</i></b> | Age 65 and 5 years of plan participation<br><br>Benefits for Local 364 participants earned prior to November 1, 2009 are subject to eligibility rules as described in the plan history.   |
| <i>Monthly amount</i>                                   | Local 135 participants: Past service benefit, if any, plus 3.0% of contributions made or due September 1, 1989 through December 31, 2009, plus 2.0% of contributions made or due on or after January 1, 2010.<br><br>Local 364 participants: Accrued benefits payable prior to the plan merger as described in the plan history, plus 1% of contributions made or due November 1, 2009 through December 31, 2013, plus 2% of contributions made or due on or after January 1, 2014.<br><br>Payable for life with 5 years certain. |
| <b>Early retirement benefit<br/><i>Eligibility</i></b>  | Age 57 and 10 years of service, unless service prior to January 1, 2001, then age 55 and 10 years of service<br><br>Local 364 benefits earned prior to November 1, 2009 are subject to early retirement eligibility rules as described in the plan history.   |
| <i>Monthly amount</i>                                   | Normal reduced by 1/2% for each month prior to age 65. Payable for life with 5 years certain.<br><br>Local 364 early retirement reduction for benefits earned prior to November 1, 2009 are subject to early retirement reductions as described in the plan history.  |

***SUMMARY OF PLAN PROVISIONS (CONT.)***

|                                       |  |
|---------------------------------------|--|
| <b>Vested benefit</b>                 |  |
| <i>Eligibility</i>                    | 5 years of service, termination of employment  |
| <i>Monthly amount</i>                 | 100% of normal commencing at age 65. Payable for life with 5 years certain.  |
| <b>Optional forms of payment</b>      | Qualified joint and 50% survivor annuity<br>Qualified joint and 75% survivor annuity   |
| <b>Pre-retirement death benefit</b>   |  |
| <i>Eligibility</i>                    | Death of vested participant with surviving spouse  |
| <i>Monthly amount</i>                 | 50% of participant's qualified joint and 50% survivor annuity payable to spouse over spouse's lifetime commencing at participant's earliest retirement date. |
| <b>Lump sum retiree death benefit</b> |  |
| <i>Eligibility</i>                    | Death of retired Local 364 participant retired from active status between November 1, 1998 and October 31, 2009.   |
| <i>Lump sum amount</i>                | \$5,000 payable to designated beneficiary.   |

***HISTORICAL PLAN MODIFICATIONS***

---

|                               |   |
|-------------------------------|---|
| <b>Vesting schedule</b>       |   |
| <i>Effective date</i>         | January 1, 1999   |
| <i>Provisions</i>             | Participants who have at least one hour of service on or after January 1, 1999 are 100% vested at 5 years of service.   |
| <b>Normal form of benefit</b> |   |
| <i>Effective date</i>         | January 1, 1999   |
| <i>Adoption date</i>          | November 13, 2001   |
| <i>Provisions</i>             | Normal form of benefit was changed from life annuity to life with 5 year certain annuity.   |
| <b>Optional form</b>          |   |
| <i>Effective date</i>         | January 1, 2008   |
| <i>Adoption date</i>          | December 15, 2008   |
| <i>Provisions</i>             | An optional 75% joint and survivor annuity was added.   |
| <b>Plan merger</b>            |   |
| <i>Effective date</i>         | October 31, 2009  |
| <i>Adoption date</i>          | August 31, 2009   |
| <i>Provisions</i>             | The Local 364 Sales Drivers Industry Pension Fund was merged into this fund.  |
| <b>Future service benefit</b> |   |
| <i>Effective date</i>         | November 1, 2009  |
| <i>Adoption date</i>          | August 31, 2009   |
| <i>Provisions</i>             | Future service benefit multiplier for Local 364 participants under this plan was established to be 1% of contributions for work performed on or after November 1, 2009. |

***HISTORICAL PLAN MODIFICATIONS (CONT.)***

|                               |  |
|-------------------------------|--|
| <b>Future service benefit</b> |  |
| <i>Effective date</i>         | January 1, 2010  |
| <i>Adoption date</i>          | August 31, 2009  |
| <i>Provisions</i>             | The future service benefit multiplier for Local 135 participants was changed from 3.0% to 2.0% of contributions for work performed on or after January 1, 2010.                                |
| <b>Future service benefit</b> |  |
| <i>Effective date</i>         | January 1, 2014  |
| <i>Adoption date</i>          | August 12, 2014  |
| <i>Provisions</i>             | The future service benefit multiplier for Local 364 participants under this plan was increased from 1% of contributions to 2% of contributions for work performed on or after January 1, 2014. |

**ACTUARIAL ASSUMPTIONS**

---

The following assumptions are used throughout this report except as specifically noted herein.

|   |  |
|---|--|
| <b>Valuation date</b>                                 | January 1, 2022  |
| <b>Interest rates</b>                                 |  |
| <i>ERISA rate of return used to value liabilities</i> | 7.00% per year after investment expenses   |
| <i>Unfunded vested benefits</i>                       | 7.00% per year net of investment expenses  |
| <i>Current liability</i>                              | 1.91% (in accordance with Section 431(c)(6) of the Internal Revenue Code).   |
| <b>Operational expenses</b>                           |  |
| <i>Funding</i>  | \$159,650 for the 2022 plan year, excluding investment expenses. Expenses are assumed to increase 3% each year.  |
| <i>ASC 960</i>  | A 7.75% load was applied to the accrued liabilities for 2022 (8.00% for 2021).   |
| <b>Loading for reciprocity</b>                        | 7.0% of liabilities for active Local 364 participants assumed to withdraw in the future and for current Local 364 inactive vested participants.  |
| <b>Mortality</b>                                      |  |
| <i>Assumed plan mortality</i>                         | 95% of the PRI-2012 Blue Collar Mortality Tables for employees and healthy annuitants projected forward using the MP-2021 projection scale.  |
| <i>Current liability</i>                              | Separate annuitant and non-annuitant rates based on the RP-2000 Mortality Tables Report developed for males and females as prescribed by Section 431(c)(6) of the Internal Revenue Code. |

**ACTUARIAL ASSUMPTIONS (CONT.)**

**Withdrawal**

T-10 Turnover Table from The Actuary's Pension Handbook (less GAM 51 mortality) with 3 year select rates - specimen rates shown below:

| <u>Withdrawal Rate</u> |                  |                 |
|------------------------|------------------|-----------------|
| <u>Age</u>             | <u>Years 1-3</u> | <u>4+ Years</u> |
| 20                     | .25              | .1794           |
| 25                     | .25              | .1722           |
| 30                     | .25              | .1621           |
| 35                     | .25              | .1486           |
| 40                     | .25              | .1310           |
| 45                     | .25              | .1084           |
| 50                     | .25              | .0792           |
| 55                     | .25              | .0440           |
| 60                     | .25              | .0120           |
| 63                     | .25              | .0013           |

No Withdrawal assumed after participant reaches early retirement age.

**Future retirement rates**  
*Active lives*

According to the following schedule:

| <u>Age</u> | <u>Retirement Rate</u> |
|------------|------------------------|
| 55-60      | .02                    |
| 61         | .05                    |
| 62-64      | .15                    |
| 65         | .30                    |
| 66         | .25                    |
| 67-68      | .40                    |
| 69         | .15                    |
| 70+        | 1.00                   |

Resulting in an average expected retirement age of 65.5.

*Inactive vested lives*

Local 135: Age 65 or current age if older  
Local 364: Earliest age pre-merger benefit unreduced

**Timing of decrements**

Middle of year

**ACTUARIAL ASSUMPTIONS (CONT.)**

|  |  |
|--|--|
| <b>Future hours worked</b>                             | <p><b>Local 135 Participants:</b><br/> <i>Vested</i> 1,800 hours, 0 after assumed retirement age<br/> <i>Non-vested</i> 1,300 hours, 0 after assumed retirement age</p> <p><b>Local 364 Participants:</b><br/> <i>Vested</i> 50 weeks, 0 after assumed retirement age*<br/> <i>Non-vested</i> 40 weeks, 0 after assumed retirement age*</p> <p>* Converted to hours based on 45 hours per week<br/> Days converted to weeks based on 5 days per week</p> |
| <b>Future vesting credits</b>                          | All active participants are assumed to earn one year of vesting credit each year.  |
| <b>Future hourly contribution rate</b>                 | Average negotiated rate by employer for the current plan year. If an employer has more than one rate, the rate best matching the experience for the year is assumed.   |
| <b>Late retirement</b>                                 | Proper notices assumed to be sent to active participants at normal retirement age so no late retirement factors are applied for active participants assumed to retire after normal retirement age.   |
| <b>Age of participants with unrecorded birth dates</b> | Based on average entry age of participants with recorded birthdates and same vesting status  |
| <b>Marriage assumptions</b>                            | 100% assumed married with the male spouse 3 years older than his wife  |
| <b>Optional form assumption</b>                        | All non-retired participants assumed to elect the life and five year certain form of benefit.  |
| <b>Inactive vested lives over age 74</b>               | Continuing inactive vested participants age nearest 74 and older are assumed deceased and are not valued. Participants assumed deceased under age 74 prior to January 1, 2020 are still assumed to be deceased.  |
| <b>QDRO benefits</b>                                   | Benefits to alternate payee included with participant's benefit until payment commences  |

**ACTUARIAL ASSUMPTIONS (CONT.)**

---

|   |  |
|---|--|
| <b>Section 415 limit assumptions</b>                            |  |
| <i>Dollar limit</i>   | \$245,000 per year   |
| <i>Assumed form of payment for those limited by Section 415</i> | Qualified joint and 75% survivor annuity   |
| <b>Benefits not valued</b>                                      | None   |
| <b>Benefits Vested</b>  | No death benefits are vested.<br>Early retirement subsidies are considered vested when participant reaches early retirement eligibility. |

***RATIONALE FOR SELECTION OF ACTUARIAL ASSUMPTIONS***

---

The non-prescribed actuarial assumptions were selected to provide a reasonable long term estimate of developing experience. The assumptions are reviewed annually, including a comparison to actual experience. The following describes our rationale for the selection of each non-prescribed assumption that has a significant effect on the valuation results.

|   |  |
|---|--|
| <b>ERISA rate of return used to value liabilities</b> | <p>Future rates of return were modeled based on the Plan's current investment policy asset allocation and composite, long-term capital market assumptions taken from Horizon Actuarial's 2020 survey of investment consultants.</p> <p>Based on this analysis, we selected a final assumed rate of 7.00%, which we feel is reasonable. This rate may not be appropriate for other purposes such as settlement of liabilities.</p>  |
| <b>Mortality</b>                                      | <p>The PRI-2012 Blue Collar Mortality Tables for employees and healthy annuitants projected forward using the MP-2021 projection scale was chosen as the base table for this population.</p> <p>The blue collar table was chosen based on the industry of plan participants.</p> <p>Finally, a 95% multiplier was applied in order to more closely match projected deaths to actual post-retirement death experience. The period of actual data studied to develop this multiplier was from January 1, 2016 to December 31, 2021 for this plan, the results were then adjusted for credibility based upon the plan size.</p> |
| <b>Retirement</b>                                     | <p>Actual rates of retirement by age were last studied for this plan for the period January 1, 2015 to December 31, 2019. The assumed future rates of retirement were selected based on the results of this study. No adjustments were deemed necessary at this time.</p>  |
| <b>Withdrawal</b>                                     | <p>Actual rates of withdrawal by age were last studied for this plan for the period January 1, 2015 to December 31, 2019. No adjustments were deemed necessary at this time.</p>   |
| <b>Disability</b>                                     | <p>Disability decrement is not valued as no disability benefits are payable and we believe the withdrawal rates reasonably reflect terminations due to disability.</p>   |
| <b>Future hours worked</b>                            | <p>Based on review of recent plan experience.</p>  |

**ACTUARIAL ASSUMPTIONS USED FOR PROJECTIONS**

The assumptions used for the credit balance, funded ratio and PPA zone projections are the same as used throughout the report with the following exceptions.

|                                      |   |
|--------------------------------------|---|
| <b>Assumed return on fund assets</b> |   |
| <i>Current year projections</i>      | 7.00%   |
| <i>Prior year projections</i>        | 7.00%   |
| <b>Expenses</b>                      |   |
| <i>Current year projections</i>      | \$159,650 for the 2022 plan year, excluding investment expenses, increasing 3.0% annually. Additional increases are reflected in 2023 and 2031 to account for the scheduled PBGC premium rate increases to \$35 per participant and to \$52 per participant respectively.   |
| <i>Prior year projections</i>        | \$155,000 for the 2021 plan year, excluding investment expenses, increasing 3.0% annually. An additional increase is reflected in 2031 to account for scheduled PBGC premium rate increase to \$52 per participant.   |
| <b>Future total hours worked</b>     |   |
| <i>Current year projections</i>      | 1,700,000 hours in all future years   |
| <i>Prior year projections</i>        | 1,610,000 hours in 2021,<br>1,635,000 hours each year thereafter  |

***ACTUARIAL ASSUMPTIONS USED FOR PROJECTIONS (CONT.)***

---

**Stochastic modeling**

1,000 trials. Future returns are modeled using an expected return of 6.62% for the first 10 years and 7.49% thereafter and a standard deviation of 12.20%, which is representative of the plan's investment portfolio. The preceding expected returns are one year values which are not representative of longer-term geometric average returns as considered when setting the ERISA return assumption.

**ACTUARIAL METHODS**

---

|   |   |
|---|---|
| <p><b>Funding method</b><br/><i>ERISA Funding</i></p>           | <p>Individual entry age normal with costs spread as a level dollar amount over service</p>  |
| <p><i>Funding period</i></p>                                    | <p>Individual entry age normal with costs spread as a level dollar amount over service</p>  |
| <p><b>Population valued</b><br/><i>Actives</i></p>              | <p>Eligible employees with at least one hour during the preceding plan year.</p>  |
| <p><i>Inactive vested</i></p>                                   | <p>Vested participants with no hours during the preceding plan year.</p>  |
| <p><i>Retirees</i></p>  | <p>Participants and beneficiaries in pay status as of the valuation date.</p>   |
| <p><b>Asset valuation method</b><br/><i>Actuarial value</i></p> | <p>Smoothed market value with phase in effective January 1, 2000. Gains and losses are amortized over a period of 5 years. The actuarial value can be no less than 80% nor more than 120% of the market value as of the determination date.</p> |
| <p><i>Unfunded vested benefits</i></p>                          | <p>For the rolling 5 method, actuarial value, as described above, is used</p>   |

**SUMMARY OF PPA AND MPRA RULES**

**Background**

All multiemployer pension plans in effect on July 16, 2006 are required to engage an actuary to annually certify their status under the Pension Protection Act of 2006 (“PPA”). Such certification must be filed with the government by the 90<sup>th</sup> day of the plan year.

This Appendix D provides a high-level summary of some of the rules related to PPA, which were further modified in 2015 by the Multiemployer Pension Reform Act of 2014 (“MPRA”). Please seek advice from your actuary or Fund Counsel for more detailed information.

**PPA Status Criteria**

The table below summarizes the criteria for each PPA status. Projected deficiencies are calculated as of the last day of each plan year and are based on contribution rates codified in bargaining agreements and, if applicable, wage allocations.

| <b>PPA Status</b>                    | <b>Getting In</b>  | <b>Getting Out</b>   |
|--------------------------------------|--|--|
| Safe (“green zone”)                  | A plan is safe if it is not described in any of the other statuses. Generally, a plan that is at least 80% funded and has no projected funding deficiencies in the current year or next 6 years is safe.   | A plan leaves safe status when it is certified as being in another status  |
| Safe (“green zone”) special rule     | Beginning in 2015, a plan that would otherwise be endangered, but was safe for the prior year, remains safe if it is projected to return to safe within 10 years   | A plan leaves safe status when it is certified as being in another status  |
| Endangered (“yellow zone”)           | A plan is endangered if it is <u>not</u> in a worse status <u>and</u> it is described in one of the following: <ul style="list-style-type: none"> <li>• Funded percentage is less than 80%, or</li> <li>• Projected funding deficiency in the current year or next 6 years.</li> </ul>                 | A plan leaves endangered status when it no longer meets the requirements to be classified as endangered or when it enters a worse status |
| Seriously endangered (“orange zone”) | A plan is seriously endangered if it is <u>not</u> in a worse status <u>and</u> it meets <u>both</u> of the following: <ul style="list-style-type: none"> <li>• Funded percentage is less than 80%, <u>and</u></li> <li>• Projected funding deficiency in the current year or next 6 years.</li> </ul> | A plan leaves seriously endangered status when it no longer meets both of the requirements listed or when it enters a worse status       |

**SUMMARY OF PPA AND MPRA RULES (CONT.)**

| <b>PPA Status</b>            | <b>Getting In</b>  | <b>Getting Out</b>   |
|------------------------------|--|--|
| <p>Critical (“red zone”)</p> | <p>A plan is critical if it is not in critical and declining status and is described in one or more of the following:</p> <ul style="list-style-type: none"> <li>• Projected funding deficiency (<u>not</u> recognizing extensions) in the current year or next 3 years (next 4 years if funded at less than 65%), or</li> <li>• Funded percentage is less than 65%, <u>and</u>, inability to pay nonforfeitable benefits and expenses for next 7 years, or</li> <li>• (1) Contributions are less than current year costs (i.e. “normal cost”) plus interest on any unfunded past liabilities, <u>and</u>, (2) value of vested benefits for non-actives is greater than for actives, <u>and</u>, (3) projected funding deficiency (<u>not</u> recognizing extensions) in the current year or next 4 years, or</li> <li>• Inability to pay all benefits and expenses for next 5 years.</li> </ul> <p>A plan with a 5-year amortization extension under IRC Section 431(d) that previously emerged from critical status in 2015 or later will re-enter critical status <u>only</u> if it is described in one of the following:</p> <ul style="list-style-type: none"> <li>• Projected funding deficiency in the current year or next 9 years (<u>including</u> amortization extensions), or,</li> <li>• Projected insolvency within the next 30 years</li> </ul> <p>If a plan is certified as safe or endangered status but projected to be critical within the next 5 years, the Trustees have the <u>option</u> of electing to have the plan treated as critical status immediately.</p> | <p>A plan emerges from critical status when it meets all of the following:</p> <ul style="list-style-type: none"> <li>• No longer meets any of the critical status tests, and,</li> <li>• No projected funding deficiencies in the current year or next 9 years, and,</li> <li>• No projected insolvencies in the next 30 years</li> </ul> <p>A plan with a 5-year amortization extension under IRC Section 431(d) emerges from critical status when it meets both of the following:</p> <ul style="list-style-type: none"> <li>• No projected funding deficiencies in the current year or next 9 years, and,</li> <li>• No projected insolvencies in the next 30 years</li> </ul> |

**SUMMARY OF PPA AND MPRA RULES (CONT.)**

| <i>PPA Status</i>                        | <i>Getting In</i>  | <i>Getting Out</i>   |
|--|--|--|
| Critical and declining (“deep red zone”) | Beginning in 2015, a plan is in critical and declining status if: <ul style="list-style-type: none"> <li>• It satisfies one or more of the critical status criteria, and,</li> <li>• It is projected to become insolvent within the next 15 years (20 years if the plan has a ratio of inactive participants to active participants that exceeds 2 to 1 or if the funded percentage of the plan is less than 80%)</li> </ul> | A plan leaves critical and declining when it no longer satisfies the criteria. Status cannot change to safe, endangered, or seriously endangered unless the plan also meets the critical status emergence rules (see above). |

***Restrictions for Non-Safe Zone Plans***

The Trustees of a plan that is not in safe zone face a number of restrictions in plan improvements that can be adopted and bargaining agreements that can be accepted.

| <i>Period</i>  | <i>Endangered/Critical Restrictions</i>   |
|--|---|
| Date of first certification through adoption of funding improvement/rehabilitation plan (“plan adoption period”)   | <ul style="list-style-type: none"> <li>• No reduction in level of contributions for any participants</li> <li>• No suspension of contributions</li> <li>• No exclusion of new or younger employees</li> <li>• No amendment that increases the <u>liabilities</u> of the plan by reason of any increase in benefits, change in accrual, or change in vesting unless required by law</li> </ul>                                     |
| After adoption of a funding improvement/rehabilitation plan until end of funding improvement/rehabilitation period | <ul style="list-style-type: none"> <li>• Cannot be amended so as to be inconsistent with funding improvement/rehabilitation plan</li> <li>• No amendment that increases benefits, including future accruals, unless actuary certifies as being paid for with contributions not contemplated in funding improvement/rehabilitation plan and still expected to meet applicable benchmark after considering the amendment</li> </ul> |

**Additionally, critical, and critical and declining status plans cannot pay benefits greater than the single life annuity once the initial red zone notice is sent unless the benefit is eligible for automatic cash-out.**

---

***SUMMARY OF PPA AND MPRA RULES (CONT.)***

---

***Employer Surcharges for Critical Status Plans***

When a non-critical plan enters critical status, employers must pay the plan a surcharge equal to 5% of their bargained contributions (the amount increases to 10% after the end of the plan year). The surcharges cannot be used to accrue benefits. Surcharges will generally commence about 5 months into the initial critical plan year.

Once the Trustees have adopted a rehabilitation plan, each set of bargaining parties is asked to adopt one of the schedules contained in such rehabilitation plan. Surcharges cease to apply to contributions made under a CBA where the bargaining parties have adopted a schedule. If this can be accomplished within the first 5 months of the initial critical year, then surcharges can be avoided altogether.

***Special Critical/Critical and Declining Status Tools***

The Trustees of a plan that is in critical status have the ability (as the result of collective bargaining) to cut “adjustable benefits” that, for the most part, cannot be reduced under other circumstances. Adjustable benefits include early retirement subsidies, optional forms of payment, disability benefits, and death benefits. Normal retirement benefits are never adjustable benefits.

The Trustees of a critical and declining plan may apply to the Treasury Department for approval to suspend certain payments under MPRA (suspensions are benefit cuts that will be restored once they are no longer needed). The suspensions may affect even those participants who are already in pay status. However, certain protections apply to participants who are age 75 or older or are disabled. Furthermore, no one’s benefit can be reduced below 110% of the amount guaranteed by the PBGC. While not officially repealed with ARPA (see below), benefit suspensions have taken a backseat to the special financial assistance program.

## **SUMMARY OF ARPA RULES**

---

### **Overview**

The American Rescue Plan Act (ARPA) was passed in March 2021 with an interim final rule in July, 2021 and a final rule in July, 2022. ARPA provides options for eligible multiemployer plans to receive special financial assistance and all multiemployer plans to elect funding relief. The PBGC premium is also scheduled to increase to \$52 in 2031.

### **Special Financial Assistance**

A multiemployer plan is eligible for the special financial assistance program if:

- The plan is in critical and declining status in any plan year beginning in 2020 through 2022 using 2020 certification assumptions;
- A suspension of benefits has been approved with respect to the plan under MPRA as of the date of the enactment of the law;
- The plan is certified to be in critical status, has a current liability funded percentage of less than 40%, and has a ratio of active to inactive participants which is less than two to three in any plan year beginning in 2020 through 2022; or
- The plan became insolvent after December 16, 2014, and has remained insolvent and has not been terminated as of the date of the enactment of the law.

The PBGC has given priority consideration for special financial assistance to eligible plans that will become insolvent soon, have more than \$1 billion liability, or suspended benefits.

An eligible plan must submit an application to the PBGC for special financial assistance by December 31, 2025. Plans without priority consideration may have to wait until as late as March 11, 2023 before they can apply.

The amount of special financial assistance to be provided by the PBGC shall be the amount required for the plan to pay all benefits due through the last day of the plan year ending in 2051 without any further reductions. This amount will be the best of three different calculations for plans with a MPRA suspension. For this determination, the actuary will use the assumptions from the plan's 2020 PPA certification except interest rate limits may apply. The special financial assistance will be paid by the PBGC in a single, lump sum payment as soon as practicable upon approval of the application and does not have to be paid back.

Several restrictions do apply for plans receiving special financial assistance including:

- Up to 33% of the special financial assistance can be invested in publicly traded equities or high yield bonds. The rest must be invested in investment-grade bonds;
- The plan will be deemed in critical status through the 2051 plan year end;
- Contribution decreases are not permitted unless it would lessen the risk of loss;
- For the first ten years, only future benefits can be improved if they are paid for with new contributions. Then, past or future increases can be made with PBGC approval if they do not create a projected insolvency;
- Use mass withdrawal interest for EWL for ten years or when SFA runs out, if later; and

A statement of compliance must be annually filed with the PBGC.

---

***SUMMARY OF ARPA RULES (CONT.)***

---

***Funding Relief Provisions***

There are a few options for funding relief which are available to every multiemployer plan.

**Temporary Delay of PPA Status**

Multiemployer plans are allowed to temporarily delay the plan's certification of endangered, critical or critical and declining status. The plan sponsor of a multiemployer plan can choose to designate to have its zone status remain the same for the first plan year beginning on or after March 1, 2020 or the next succeeding plan year. A notice of this election is required unless this election places the plan in safe status.

If a plan was in endangered or critical status for the plan year preceding the plan year for which it has chosen to delay updating its zone status, it will not be required to update its funding improvement plan or rehabilitation plan until the following plan year.

**Temporary Extension of Funding Improvement and Rehabilitation Periods**

A plan which is in endangered or critical status for a plan year beginning in 2020 or 2021 (after applying any elected delay in PPA status) can elect to extend its funding improvement or rehabilitation period by five years.

**Adjustments to the Funding Standard Account Rules**

The plan may elect one or both of the following if, as of February 29, 2020, it is projected to have sufficient assets to pay expected benefits and expenses through the end of the applicable extended period:

- Extend select experience losses in either or both of the first two plan years ending after February 29, 2020 from 15 years to 30 years from the year in which the loss occurred. Such losses must be attributable to investment experience, contribution shortfall, employment reduction or retirement rate experience; and
- Extend the smoothing of the loss attributable to the investment losses in either or both of the first two plan years ending after February 29, 2020 from five years to up to ten years for the determination of the actuarial value of assets. The actuarial value of assets, however, cannot exceed 130% of the market value.

The Treasury must rely on plan sponsors' calculations of plan losses unless calculations are clearly erroneous. Restrictions on plan amendments that increase benefits apply.

***PBGC Premium***

The PBGC premium will increase to \$52 per participant for the plan year beginning in 2031 and increased each year thereafter by a wage inflation rate.

## **GLOSSARY OF COMMON PENSION TERMS**

---

### **Benefits**

**Accrued Benefit:** A benefit that an employee has earned (or accrued) through past participation in the plan. It is the amount payable at normal retirement age.

*Why it matters: Under the law, Accrued Benefits generally may not be reduced by plan amendment (note that special rules allowing for limited reduction and/or suspension of accrued benefits apply to critical status, critical and declining status and insolvent plans).*

**Actuarial Equivalence:** Given a set of actuarial assumptions, when two different sets of payment scenarios have an equal present value.

**Early Retirement Reduction Factor:** A retirement benefit that begins before normal retirement age may be reduced. The plan document defines the amount of the reduction by formula or a table of factors. This reduction may or may not be actuarially equivalent, but its present value can be no less than actuarially equivalent to the benefit payable at normal retirement age.

**Benefit Crediting (Accrual) Rate:** A general reference to the calculation of the amount of monthly retirement benefit earned per dollar contributed or per year or hour worked.

### **Assets**

**Market Value of Assets:** This is the fair value of all assets in the fund on an accrued, not cash basis. The market value of assets matches the value in the plan audit.

**Actuarial Value of Assets:** The amount of assets recognized for actuarial valuation purposes. Recent changes in market value may be partially recognized (there are variations allowed on the exact recognition). Generally the actuarial value is limited to not be less than 80% or more than 120% of the market value.

*Why it matters: Many funding calculations use this “smoothed” asset value method to lessen the impact of volatility in the market value of plan assets.*

**Assumed Rate of Return:** Long term assumption of the rate of return on assets based upon the diversification mix of invested assets.

*Why it matters: This assumption is used in calculating the present values discussed in the Liabilities section below. The Assumed Rate of Return has an inverse relationship with plan liabilities. In other words, a lower Assumed Rate of Return increases liabilities, while a higher Assumed Rate of Return decreases plan Liabilities.*

---

## **GLOSSARY OF COMMON PENSION TERMS (CONT.)**

---

### **Liabilities**

**Present Value of Accrued Benefits:** The discounted value of benefit payments due in the future but based only on the current Accrued Benefits of each participant. The value is based on actuarial assumptions including an assumed rate of investment return.

*Why it matters: This liability is one of the primary factors in determining a plan's annual PPA funded status (see Funded Ratio).*

**Present Value of Vested Benefits:** The discounted value of Accrued Benefits that are considered vested (non-forfeitable). Benefits that are not vested include those of participants who have not satisfied the plan vesting requirement (usually five years of service). In addition under the law some death and temporary disability benefits are also considered non-vested regardless of service because they are not considered protected benefits.

*Why it matters: This liability is the primary driver of a plan's Employer Withdrawal Liability.*

**Actuarial (Accrued) Liability:** For inactive members this is the same as the Present Value of Accrued Benefits above. For active members this depends on the cost method selected by the actuary. Under the accrued benefit or traditional unit credit cost method this is also the same as the Present Value of Accrued Benefits. Under other cost methods (including most commonly entry age normal) this represents an alternate allocation of projected benefit cost over the working lifetime of active members. Under the entry age normal cost method, the active Actuarial Liability is larger than the Present Value of Accrued Benefits.

**Unfunded Actuarial Liability:** The Actuarial Liability less the Actuarial Value of Assets.

**Current Liability:** This is similar to the Present Value of Accrued Benefits, but uses a statutory, significantly lower, interest rate (equivalent to an expected rate of return on a bond only-type portfolio) and statutory mortality tables. The lower interest rate means that Current Liability tends to be significantly higher than the Present Value of Accrued Benefits. This number has very little impact on multiemployer plans.

**Normal Cost:** The present value of all benefits that are expected to accrue or to be earned under the plan during the plan year. The way in which a benefit is considered to be earned varies with the actuarial cost method.

**Risk:** The potential of future deviation of actual results from expectations derived from actuarial assumptions.

---

## GLOSSARY OF COMMON PENSION TERMS (CONT.)

---

### Funding

**Funded Ratio (Funded Percentage):** Actuarial Value of Assets divided by the Present Value of Accrued Benefits. This is one of two key measures used to determine a plan's annual PPA funded status. This may also be referred to as PPA Funded Ratio. This must be greater than 80% to avoid endangered status.

**Credit Balance:** The accumulated excess of actual contributions over legally required minimum contributions as maintained in the funding standard account. The funding standard account is maintained by the actuary in the valuation process and reported annually in schedule MB to the Form 5500 filing. A negative credit balance is known as an accumulated funding deficiency. Prior to PPA, an accumulated funding deficiency caused an immediate excise tax (waiver under PPA if certain conditions are met). After PPA, a current or projected funding deficiency is one of the key measures used in determining the annual PPA status. It can eventually trigger an excise tax levied on contributing employers.

### Withdrawal Liability

**Unfunded Vested Benefits (UVB):** Present Value of Vested Benefits less the value of plan assets determined on either an actuarial or market value basis. The selection of asset measurement is part of the withdrawal liability method of the Plan.

**Employer Withdrawal Liability (EWL):** An employer that withdraws from a multiemployer plan is liable for its proportionate share of Unfunded Vested Benefits, determined as of the date of withdrawal.

*Why it matters: If a contributing employer leaves the plan while it has Unfunded Vested Benefits liability, that employer's allocated share of Employer Withdrawal Liability is either assessed, as applicable, or reallocated among the plan's remaining active employers if the presumptive method is used. A construction employer withdrawing from a construction industry plan will not be assessed unless they continue performing work within the jurisdiction of the CBA or restart such work within a period of 5 years. Small amounts (under \$150,000) are generally reduced or eliminated pursuant to the "de minimis rule."*
