## VERTICAL ROOF RECOMMENDED FOR ALL BUILDINGS OVER 35' LONG

The Regular style carport has rounded corners with horizontal roof panels and is considered the most basic and economical design.

The Boxed Eave style carport has an "A-frame" design with horizontal roof panels and includes 4"-6" of overhang on all four sides. The roof is trimmed on all four sides as well. An upgrade from the Regular style carport.

The Vertical style carport has an A-frame design with vertically running ribs that direct rain and snow off the building more quickly. The roof panels are trimmed for a clean, finished look and include a 4"-6" overhang on all four sides. With an enhanced appearance, increased strength, reduced maintenance needs and an extended service life, the Vertical style is the superior option for your carport.
