Fund Overview

The Alpha Diversified fund focuses on building and maintaining a low volatility, multi-manager hedge fund portfolio that seeks to have low correlation to the broader debt and equity indices. The fund's investment objective is capital appreciation with limited variability of returns. The fund attempts to achieve this objective by allocating capital among several pooled entities, each managed by an independent investment adviser who invest in a variety of asset classes.

Process

- Manager due diligence covers alternative asset classes, sourced through our extensive network and reach within the investment community, as well as the broader investment bank capital introduction network.

- Many of the strategies employed by outperforming fund managers simply do not work at scale. If funds grow too large, they are forced to operate outside of their strategy in order to deploy capital. Therefore, we focus on sourcing Managers who are limiting their capital raising efforts to ensure effective execution of their underlying strategies.

- Our portfolio of funds is optimally diversified broadly among these boutique managers.
