ALPHA WEALTH FUNDS

Alpha Diversified Fund

As of 12/31/2022

ALPHA WEALTH FUNDS

Founded in 2010, our services include emerging hedge funds, separately managed accounts, financial planning, estate & trust services, private placements and in-house concierge services for high net-worth individuals, families and businesses.

ALPHA DIVERSIFIED FUND

- The fund focuses on building and maintaining a low volatility, multi-manager hedge fund portfolio that seeks to have low correlation to the broader debt and equity indices.
- The fund's investment objective is capital appreciation with limited variability of returns. The fund attempts to achieve this objective by allocating capital among several pooled entities, each managed by an independent investment adviser who invest in a variety of asset classes.

MANAGER SELECTION

Network

Manager due diligence covers a variety of alternative asset classes, sourced through our extensive network and reach within the investment community, as well as the broader investment bank capital introduction network.

Boutique

Many of the strategies employed by outperforming fund managers simply do not work at scale. If funds grow too large, they are forced to operate outside of their strategy to deploy capital. Therefore, we focus on sourcing Managers who are limiting their capital raising efforts to ensure effective execution of their underlying strategies.

Optimized

We optimally diversify broadly among these boutique managers to position the portfolio to have low correlation to systematic risk exposure and to deliver superior risk adjusted returns.

CASE FOR BOUTIQUE MANAGERS

- Boutique hedge fund managers are often overlooked by the institutional investor community.
- They are deemed too small to make an impact on the bottom line and too risky in terms of institutional mandate and consultant reputation.
- This reluctance to invest in these funds can provide opportunities for investors to capture excess returns.
- Potential Advantages
  - Boutique manager's small size may allow them to be much nimbler, enabling them to respond much more efficiently to market changes as compared to their larger counterparts.
  - Boutique funds may be able to tap into market niches, which could allow them to exploit market inefficiencies.

MANAGER EVALUATION PROCESS – WHAT WE LOOK FOR

Qualitative Attributes

- High-integrity management aligned with clients
- Strong pedigree and history of success
- Superior depth and quality of research
- Prudent portfolio management and risk controls

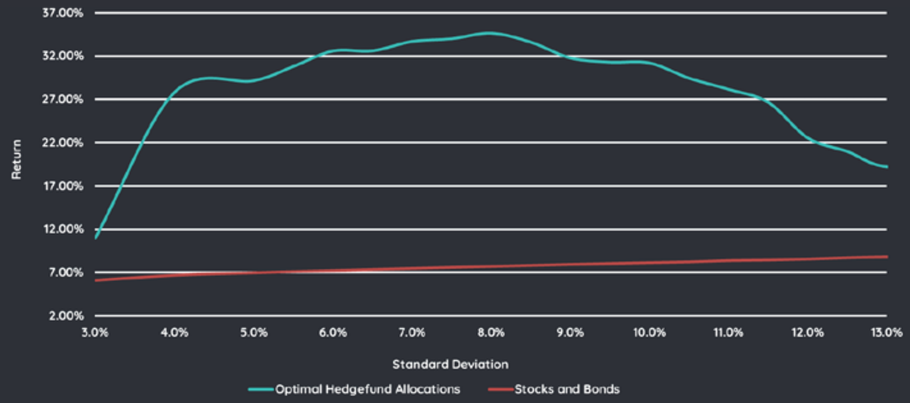
Quantitative Attributes

- Analyze performance to verify manager skill
- Determine key drivers of results
- Conduct detailed portfolio review
- Assess leverage, liquidity, and concentration risk

OPTIMAL PORTFOLIO CONSTRUCTION

- Boutique hedge fund managers can individually introduce idiosyncratic risks to an overall allocation.
- Optimally combining a diverse set of strategies each with their own source of alpha and risk profile can limit these risks.
- Specifically, combining managers that have uncorrelated sources of alpha offset much of the volatility of the individual managers

Efficient Frontier of Optimal Portfolios of Hedgefunds (shown gross of AWF fees as of 12/31/2021)



Alpha Wealth Funds internal research. Efficient frontier of hedge funds followed.

PORTFOLIO CONTRUCTION/MONITORING

Diversification

We take smaller positions in a diverse portfolio of 12-20 managers.

Rebalancing

As managers outperform relatively to others, we closely monitor positioning and review exposures monthly with a minimum 6 month rebalance process.

New Managers

We continue work to identify additional managers to replace those underperforming expectations.

CASE FOR DIVERSIFICATION INTO HEDGE FUNDS

- In the current market environment, the returns profile shown by hedge funds can make them ideal candidates for inclusion in an overall asset allocation. Bond yields in US have been minimal for several years now.* In addition, the potential of default or a rising interest environment represent a risk for bondholders.
- Similarly, equity markets have become more volatile and unpredictable since the start of the 2021. Equity-market volatility is trending higher given ongoing international trade tensions, pandemic and war fears.**
- In these circumstances, increasing numbers of investors are seeking new ways of diversifying their investments by gaining exposure to asset classes that show limited correlation with market movements.
- We focus on hedge funds that use flexible, highly liquid instruments to form investment strategies that show little correlation with equity and fixed-income market while aiming to limit risk.

DISCLOSURES

This material does not constitute an offer or the solicitation of an offer to purchase an interest in Alpha Diversified Fund, LP (the "Fund"), which such offer will only be made via a confidential private placement memorandum (the "Memorandum"). An investment in the Fund is speculative and is subject to a risk of loss, including a risk of loss of principal. There is no secondary market for interests in the Fund and none is expected to develop. No assurance can be given that the Fund will achieve its objective or that an investor will receive a return of all or part of its investment. All statements herein are qualified in their entirety by reference to the Memorandum, and to the extent that this document contradicts the Memorandum, the Memorandum shall govern in all respects.

This material is confidential and may not be distributed or reproduced in whole or in part without the express written consent of Alpha Wealth Funds, LLC (the "Investment Manager"). This material is not intended to provide, and should not be relied on for, tax, legal, or accounting advice. You should consult your own tax, legal, and accounting advisers before engaging in any investment transaction.

The performance data discussed herein do not represent the performance of the Fund, but rather, represent the performance of a composite model portfolio of 12-20 boutique hedge funds selected using the allocator mechanism developed for the Fund. As such, these data represent hypothetical results of the Investment Manager's strategy and are included for informational purposes only. Results generated in the Fund once the Fund is launched could be materially different than those results shown. The results shown under the heading "Alpha Diversified Fund Net (1/10)" reflect the deduction of: (i) an annual asset management fee of 1.0%, charged quarterly; (ii) a performance allocation of 10.0%, taken annually, subject to a "high water mark;" and (iii) transaction fees and other expenses actually incurred. The management fee and performance allocation were applied retroactively and do not reflect actual fees charged. The results shown under the heading "Alpha Diversified Fund Gross" do not reflect the deduction of the afore-mentioned fees and expenses. None of the results shown reflect the deduction of certain organizational and operating expenses common to investment funds, which would serve to decrease profits or otherwise increase losses. Results were achieved using the investment strategies described in the Memorandum.

Hypothetical or back-tested model performance results have inherent limitations, some of which are described below. Back-tested returns do not represent the results of actual trading and are calculated through the retroactive application of the Investment Manager's model portfolio and strategy configurations, designed with the benefit of hindsight. Since back-tested results do not represent actual trading, they may not reflect the impact that material economic and market factors might have had on the decision-making processes of the Investment Manager, if the Investment Manager was actually managing those assets during the back-test period.

NO REPRESENTATION IS BEING MADE THAT THE INVESTMENT MANAGER'S STRATEGY WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FREQUENTLY SIGNIFICANT MATERIAL DIFFERENCES BETWEEN BACK-TESTED PERFORMANCE RESULTS AND PERFORMANCE RESULTS SUBSEQUENTLY ACHIEVED BY FOLLOWING A PARTICULAR STRATEGY.

In addition, back-tested performance does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk in actual trading. For example, the ability to withstand losses or adhere to a particular trading program in spite of trading losses could have material adverse effects on trading results. There are numerous other factors related to the markets and to the implementation of specific investment programs that cannot be fully accounted for in the preparation of back-tested performance results and all of which can adversely affect actual trading results.

The results shown are compared to the performance of the S&P 500 Index, the HFRX Global Hedge Fund Index, and a number of other indexes (collectively, the "Comparative Indexes") for informational purposes only. The Fund's investment program does not mirror any of the Comparative Indexes and the volatility of the Fund's investment program may be materially different from the volatility of the Comparative Indexes. The securities included in the Comparative Indexes are not necessarily included in the Fund's investment program and criteria for inclusion in the Comparative Indexes are different than criteria for investment by the Fund. The performance of the Comparative Indexes reflects the reinvestment of dividends, as appropriate.

Any indices and other financial benchmarks shown are provided for illustrative purposes only, are unmanaged, reflect reinvestment of income and dividends and do not reflect the impact of advisory fees. Investors cannot invest directly in an index. Comparisons to indexes have limitations because indexes have volatility and other material characteristics that may differ from a particular hedge fund. For example, a hedge fund may typically hold substantially fewer securities than are contained in an index.

Except where otherwise indicated, the information contained in this presentation is based on matters as they exist as of the date of preparation of such material and not as of the date of distribution or any future date. Recipients should not rely on this material in making any future investment decision.
