Introducing the "24/7 Freedom Filter" - Our Complete RO w/ Ion Exchange, Remineralization, and pH Blending Valve

by www.WaterFilters247.com

Filtration Stages

5 Micron Filter

Removes sediment, dirt, sand, dust, rust and particulates measuring over 5 microns in size.

KDF / Enhanced Carbon

Removes Chlorine, Heavy Metals, Turbidity, Chloramine (chlorine + ammonia), VOCs, Pesticides, Chemicals, and Bacteria

Reverse Osmosis (RO) Membrane

Removes remaining particulate contaminants as small as .0001 microns in size (bacteria is about 0.5 microns and viruses are near 0.05 microns)

Ion-Exchange

Removes remaining trace contaminants such as acids, and exchanges them with excess hydrogen ions

Remineralization

Using only the highest quality magnesium oxide we aim to create magnesium bicarbonate with the excess hydrogen ions present during the filtration process

Enhanced Coconut Carbon

Provides an enhanced final polish for taste

Features

1. Remineralization / pH Blend Valve
2. Membrane Flush Valve
3. 1:1 Product to Drain Ratio
4. Comes w/ hand-held TDS Meter (HM Digital)

Install Kit

1. 3.2 Gallon Storage Tank
2. Faucet:
Chrome, Brushed Nickel, or Oil Rubbed Bronze
3. Drain Saddle
4. 3/8 Angle Stop Adapter (John Guest)
5. Tubing - color coordinated (see instructions)
