Dear Hiring Manager,

I am excited to apply for the Software Engineer position at your firm. As a Full-Stack Developer with 3+ years of experience Microsoft Dynamics 365 certification, I specialize in building scalable solutions using .NET, Java, React, and cloud technologies. My proactive approach to problem-solving, coupled with my ability to mentor teams and streamline DevOps processes, aligns perfectly with your needs.

At Saudi Global Ports Co. (SGP) I developed and maintained TOS (Terminal Operating System). Integrate TOS with external systems via APIs. Support real-time and historical data processing for terminal operations. Support real-time and historical data processing for terminal operations.

At Alareeb Holding (Riyadh), I designed a client rewards system using Credly API and .NET/SQL, boosting customer engagement. By integrating LaunchDarkly for feature toggling, I reduced rollout risks for financial platforms. Additionally, I modernized legacy jQuery components, enhancing security and performance.

My expertise in CI/CD pipelines (AWS/Jenkins), microservices architecture, and Agile methodologies ensures I can contribute to your team's success. My award-winning project (National Best Quality Software Awards 2022) demonstrates my ability to deliver innovative solutions under tight deadlines.

I would welcome the opportunity to discuss how my skills in full-stack development, cloud integration, and leadership can support your company's goals. Thank you for your time—I look forward to your response.

Best regards,

Nabrees Hasni
