01 Infill House

1 E Gordon St
Savannah, GA 31401

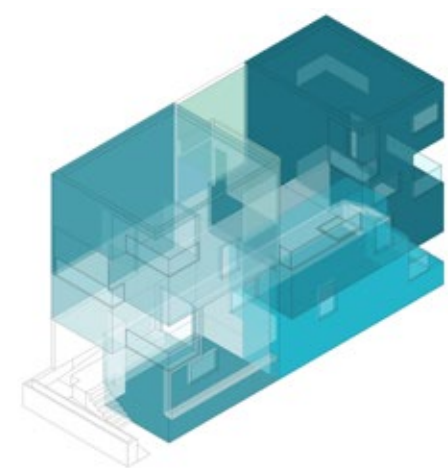

The Project centers on transforming spaces to create comfort and facilitate living within the Savannah urban context. Transparency is key to engage the interior and exterior spaces, while at the same providing a relationship with the surrounding environment. Living Spaces are maximized with built in furniture to accommodate a micro housing lifestyle, while providing spaces that transition from the interior to the exterior such as private balconies, and a rooftop.

02 New World Institute

The Ancient Spanish Monastery
Miami, FL 33160

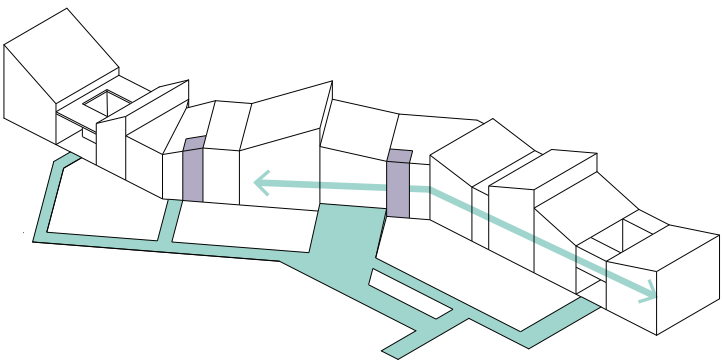

The New World Institute is an annex of the Cilingua Institute located in the Monastery of San Milan in Rioja Spain. It merges the Old World and the New World architecturally, expanding through the site and following along the periphery. The different heights of the project mimic a city scape creating varied experiences as you move throughout the building.

Chapel of Grace

Pigeon Key
Marathon, FL 33050

This project located in the Florida Keys, resides on the North-West periphery of Pigeon Key. The essence of this chapel is to provide an uninterrupted connection between land and sea for meditation and contemplative purposes. Chapel of Grace provides an environment that is tranquil, harmonious and serene.

Langston Hughes Cultural Center

2015 5th Ave
New York, NY 10035

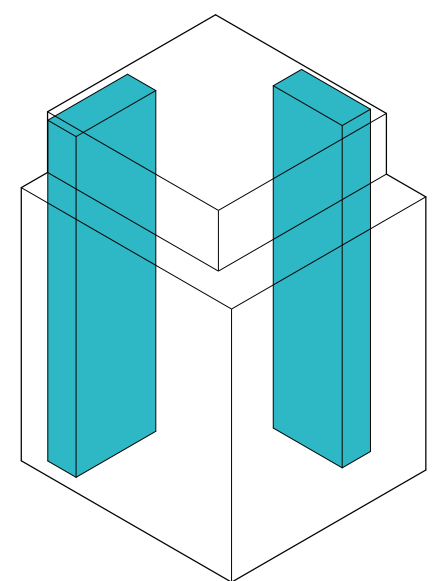

This cultural center promotes art & culture that engages with the urban & historical context of Harlem. On an urban scale, the center communicates with the 125th Ave corridor by having a transparent relationship between the interior and the street. Additionally, it embraces the rich history and culture of Harlem honoring Poet and social activist Langston Hughes. The center pays homage incorporating into the program an archive for his work celebrating his leadership in the Harlem Renaissance.

Seattle Children's Hospital

Seattle, WA

The Seattle Children's Hospital is conceptualized on providing an environment that improves outpatients and inpatients overall health and wellbeing by implementing positive distraction and evidence based design methods. Additionally, multiple zones were designed in the layout of the Children's Wing to provide privacy to the patients.
