

Insect Protein

Made from Black Soldier Fly Larvae: a
SUSTAINABLE PROTEIN SOURCE

Made from Black Soldier Fly larvae converting food and other organic waste into a high-quality protein that is nutrient rich and calorie dense.

NUTRITIONAL VALUE

- High in protein (35%-45%)
- Essential amino acids, lipids, vitamins and minerals
- Healthy fats (omega-3 fatty acids)

FEED FOR FOOD

An environmentally sustainable high quality protein substitute for fishmeal or soymeal used in animal feeds.

SUSTAINABLE

Produced from organic waste which would otherwise end up in landfill.

APPLICATIONS

- Livestock feed
- Poultry feed
- Aquaculture
- Pet food
