

Cyber 2.0

Blocking the spread of cyber-attacks
Including new and unknown ones

What makes us different

Other EDR's / XDR'S / MDR'S

Cyber 2.0

Detection 	<p>100% Detection is not possible because of new and unknown cyber-attacks that are popping up every moment</p> <p>Cyber software will not even try to prevent them from spreading across the network</p> <p>Based on Black List</p>	<p>We bypass the problem We don't miss any new attack since we don't have to identify it first</p> <p>Based on Zero Trust</p>
Prevention 	<p>100% Prevention is not possible because there is no complete detection</p> <p>because once the cyber defense systems have been removed, the organization is no longer protected</p>	<p>We continue protecting the organization even if Cyber 2.0 is removed from the infected computer</p> <p>The malware will be blocked on the receiving computers</p>
The Model 	<p>Is based on vulnerable biological models hence where the terminology virus, anti-virus and mutation, comes from</p> <p>The hackers are always one step ahead</p>	<p>Is based on mathematical chaos model This model can't be breached</p> 
Proof of Concept 	<p>Every cyber company in the world claims its system is the best</p> <p>No one is willing to put its claim to the test of all hackers in the world</p>	<p>We are the only company in the world that invites all hackers to hack its system for a reward of \$ 100,000</p> <p>Since 2018, over 5,500 hackers from 30 countries failed Watch: CBS , NBC</p>

Technology

The Team

Hertzel Ozer - Founder & Chairman

Major General (Res.) Professor Isaac Ben-Israel - Advisory Board

Erez Kaplan Haelion-Founder & CTO

- CEO & Chairman of the Board of a few large companies such as **HOT Telecommunication Systems**
- Founder of **AllJobs** (the leading recruitment company in Israel)

- The initiator of the **National Cyber Authority** at the Prime Minister's Office in Israel
- Head of the **Cyber Center** at Tel Aviv University

- A committee member of the International Organizations of **Cyber ISO Standardization**
- Senior Advisor of **Microsoft**
