The Leading Provider of Real, Actionable Intelligence
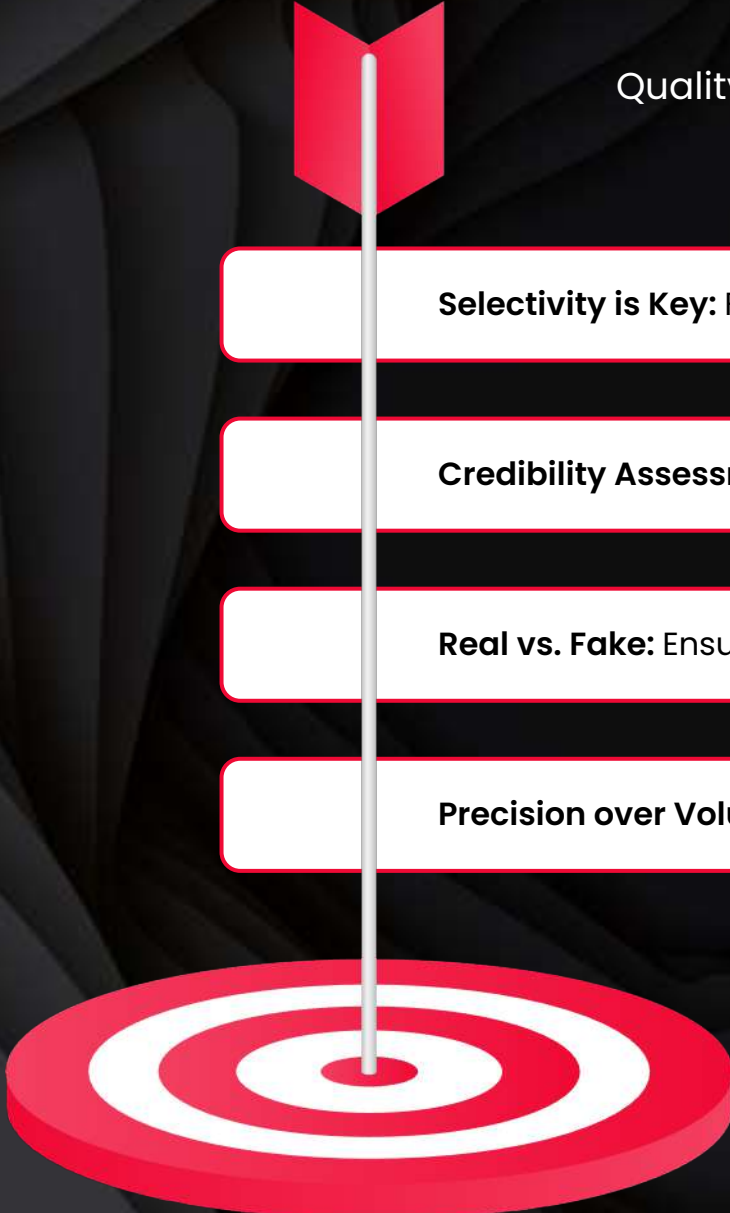

Proactive defense against digital crimes.

Prioritizing Quality Intelligence over Information Overload

Quality is the cornerstone of intelligence in a modern world

Selectivity is Key: Filter out noise and focus on relevant sources

Credibility Assessment: Evaluate the reliability and trustworthiness of each data point

Real vs. Fake: Ensure the authenticity and accuracy of posted data

Precision over Volume: Prioritize spot-on, actionable data over vast amounts of irrelevant information

KELA's Comprehensive Cyber Intelligence Platform

Real, Actionable Intelligence

- Cyber Threat Intelligence
- Law Enforcement & Case Management
- Attack Surface Intelligence
- Third Party Intelligence
- Vulnerability Intelligence
- Fraud Prevention

Monitor, Investigate and Mitigate Threats with Real Intelligence.

Automatically uncover hidden risks by leveraging attackers' views for proactive protection.

KELA's Comprehensive Cyber Intelligence Platform

Empowering security professionals at all levels with four seamless modules for unmatched intelligence

Investigate

Monitor

Technical Intelligence

Identity Guard

Threat Actors

Threat Landscape

KELA's Comprehensive Cyber Intelligence Platform

Investigate

Helps analysts to perform successful threat hunting and deepen their cyber investigations with contextualized intelligence insights as to attackers' TTPs, threat actor profiles and identities, hacking discussions, and more.

Monitor

Supports operational security roles by providing attack surface and asset management capabilities. It alerts on targeted threats specifically aimed at the organization by analyzing the adversary's perspective of the organization's external attack surface.

Technical Intelligence

Available via KELA's API, provides SOC teams with automated detection and monitoring of potentially compromised IPs and domains involved in cybercrime activity.

Identity Guard

Proactive protection against compromised accounts tailored for diverse businesses. Monitors and detects compromised accounts across all organizational domains, subdomains, and SaaS accounts, utilizing data from millions of infected machines. Categorizes incidents based on severity and seamlessly integrates with other security appliances for an immediate response.

Threat Actors

Centralizing comprehensive information on threat actors from diverse web sources, this hub facilitates thorough investigations with links to related actors. Offering deep insights through a user-friendly interface and concise threat actor summaries, it enhances decision-making. Tailored for proactive defense against nation-state attacks, hacktivists, and malicious actors, it serves as a vital intelligence asset for security teams.
Threat Landscape

Offers decision makers high-level intelligence on the ever-changing cybercrime ecosystem, including dashboards of top trends, daily highlights, and finished intelligence feed by KELA's cyber intelligence experts.

We Are KELA

KELA

Company's Mission

Deliver 100% real, actionable intelligence on threats emerging from the cybercrime underground, to support the prevention of digital crimes.

Industry Expertise

The only company with a comprehensive cyber intelligence solution, comprising four modules offering unparalleled intelligence to security professionals at all levels, empowering them to proactively protect their organizations and nations.

Customer Base

Our customers base includes leading enterprises, MSSPs and governments in EMEA, APAC, North America, and LATAM.

Global Presence

100 employees - Headquarters in Israel, with offices in United States, Japan, United Kingdom, Mexico, and Singapore.

Our Competitive Edge

Actionable Asset and Identity Intelligence

Neutralize relevant threats by monitoring and acting on your essential assets.

Unique Security Data Lake

Access KELA's comprehensive data lake which holds a rich bank of processed intelligence, for a clear, easy view of structured data and finished intelligence insights.

Complete Automation

Fully operational, automated, and scalable cyber intelligence platform used daily by Tier 1 security and intelligence professionals worldwide.

Secured and Anonymous Access

Obtain access to raw data straight from KELA's data lake while meeting legal and compliance requirements, and without exposing your scope.

Deep Intelligence Expertise

Cover the entire intelligence life cycle with technology and products designed by Israeli army intelligence professionals and veteran intelligence experts with deep cyber defense expertise.

Our Demonstrated Success

5.0 ★★★★★ Jan 26, 2023

Review Source: ⓘ

We like the product, great search capabilities and great customer service.

Reviewer Function: IT Security and Risk Management

Company Size: 3B - 10B USD

Industry: Energy and Utilities Industry

We had a great experience, since we were surprised with the search capabilities of the product. Even its integrability with other security platform is quite easy and the customer service is great, they're always ready to answer and to help you.

Threat Actors

Identity Guard

Technical Intelligence
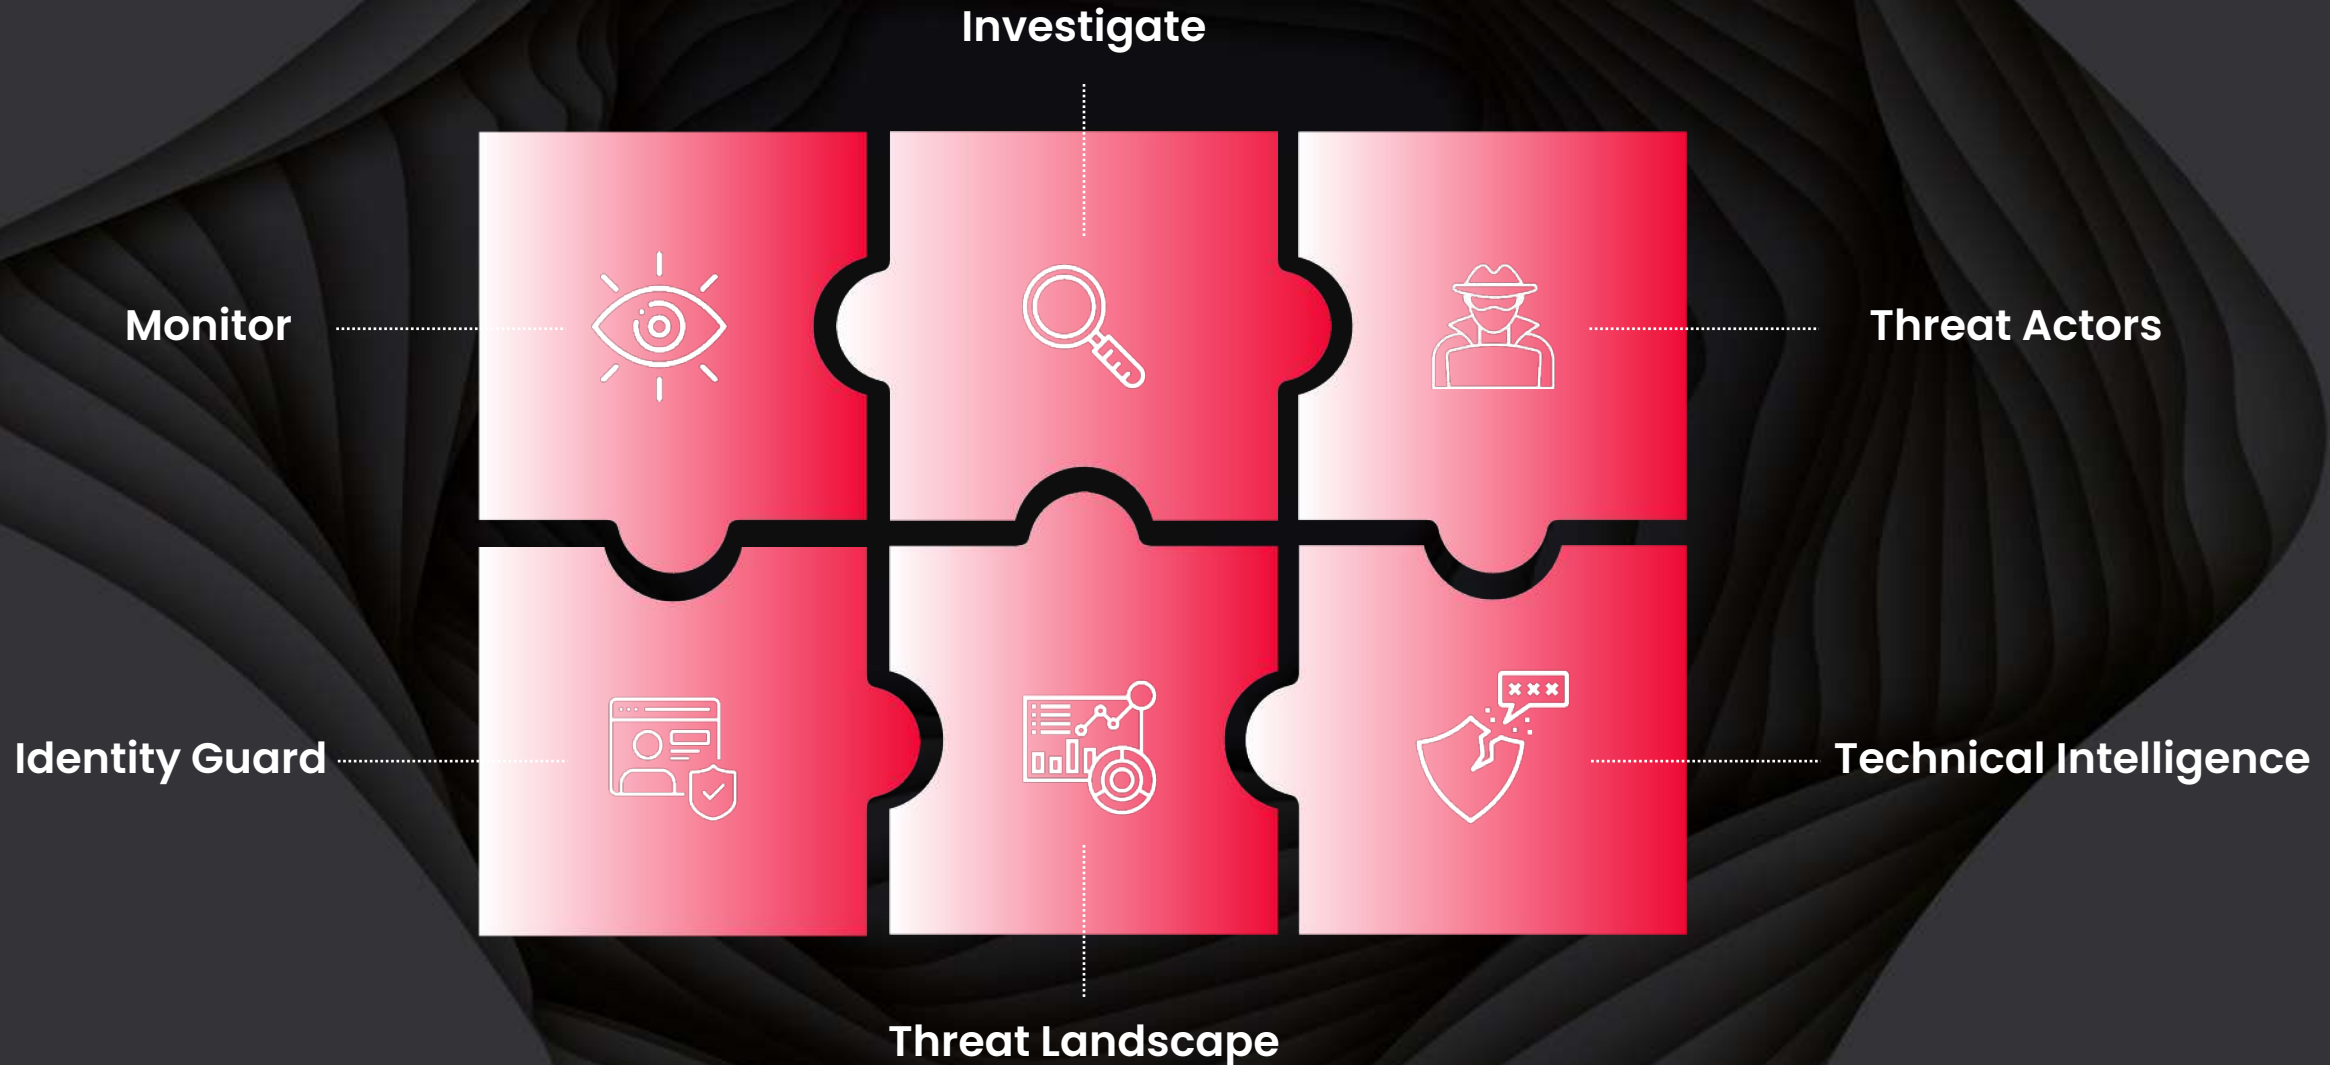

Threat Landscape

Threat Landscape

Stay ahead of the threats with KELA's intelligence insights

- Offers **decision makers** high-level intelligence on the ever-changing cybercrime ecosystem.

- Includes dashboards of top trends, daily highlights, and finished intelligence feed by KELA's cyber intelligence experts.

- Continually informs about ransomware events, network access on sale, leaked databases, and new threats across all industries.

- Includes an "Export" report allowing a simple export of the data to present to different stakeholders.

Monitor

Monitor cybercrime sources for essential assets

Contextualized Intelligence

- Supports **operational security roles**
- Tailored monitoring and alerting
- Automated analysis of relevant collected data
- Real-time targeted alerts
- Machine-readable intelligence reports

Actionable Intelligence

- Intuitive and interactive dashboards
- Specific remediation recommendations for targeted cybercrime threats

Complete Coverage

- Monitors an organization's entire cybercrime attack surface
- Maps the network and watches the perimeter and domains for exposed databases, open ports and other vulnerable technologies

KELA

Investigate

Investigate and analyze threats, targets, topics and groups anonymously and in real-time

In-depth Investigation

- Helps **analysts** to perform successful threat hunting and deepen their cyber investigations
- Intuitive search functionality
- Investigate any data point in real-time
- Perform complex query searches

Security Data Lake

- Access intelligence from database dumps, Telegram groups, botnet markets, hacking chatter and more
- Enables anonymous and safe investigations
- Avoid exposing your scope and obtain access to raw data

Finished Intelligence

- Gain full access to research from KELA's world-class Cyber Intelligence Center.

Technical Intelligence

Detect suspicious IPs and domains involved in cybercrime activities

- Available to consume via API

- Provides **SOC teams** with automated detection and monitoring of potentially compromised IPs and domains involved in cybercrime activity.

- A structured, machine-readable format

- The detected assets, their context, and MRTI properties, such as STIX, are shared with the users via API

- Easily integrates into a SIEM, SOAR, or any other security solution

KELA
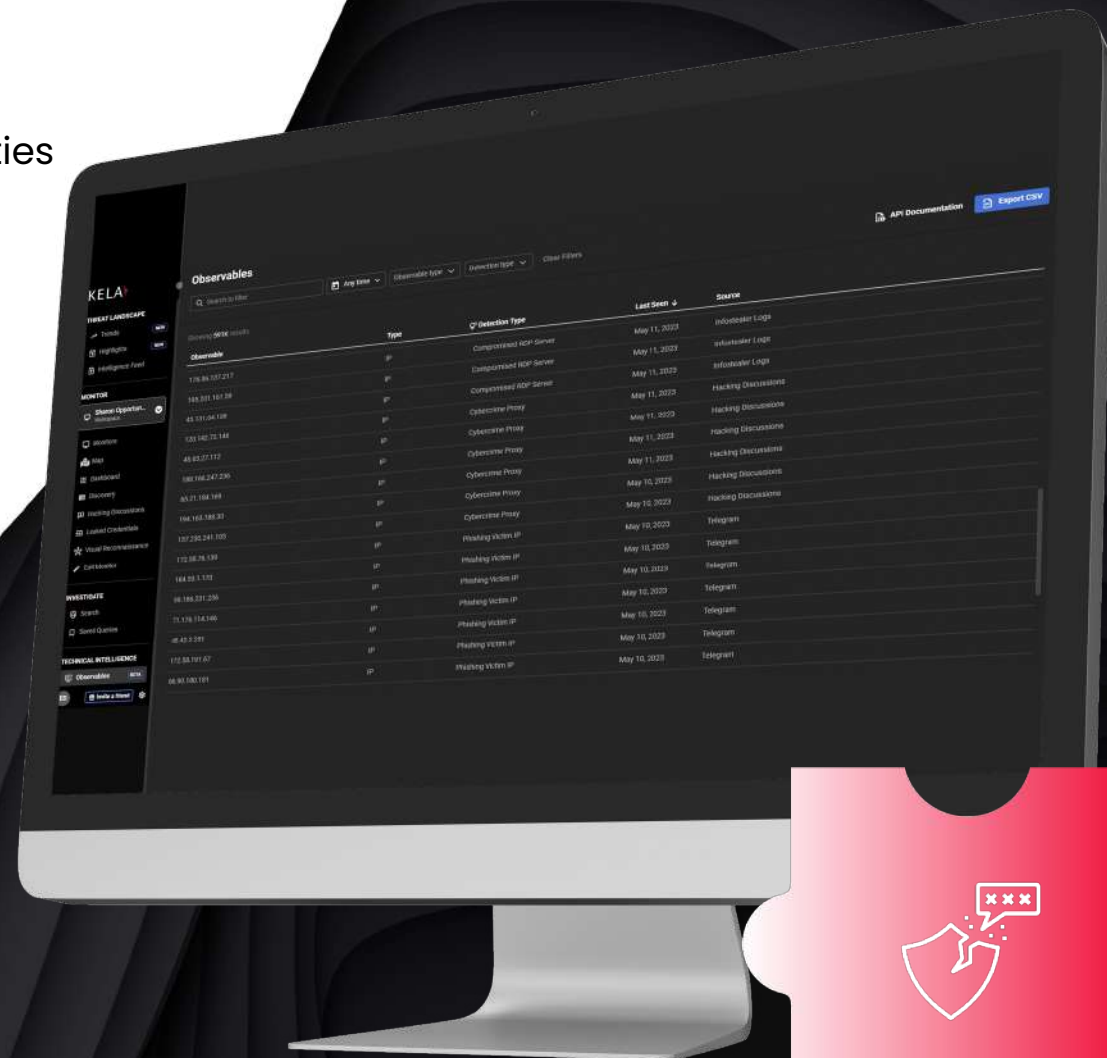

Threat Actors

Discover, Analyze, and Defend Your Organization from Threat Actors with Real, Actionable Intelligence.

Enhanced Search and Filtering

- Utilize advanced filters and targeted search capabilities for specific threat actors.

- Easily search for a threat actor's profile using handles on cybercrime underground sources.

- Search by additional identifying details such as social media accounts, bitcoin wallet numbers, names, etc.

Analyst Recommendations and Proactive Insights

- Leverage KELA's Threat Intelligence Analysts' recommendations for initial investigations.

- Access proactive insights on individual threat actor's overview pages.

- Access consolidated profiles of threat actors based on their personas on different cybercrime underground sources.

- Obtain comprehensive data aggregation and visual graphs to gain a wide-angle view of threat actor profile metrics.

Seamless Integration

- Streamline API integration with in-house security appliances and tools for comprehensive investigations.
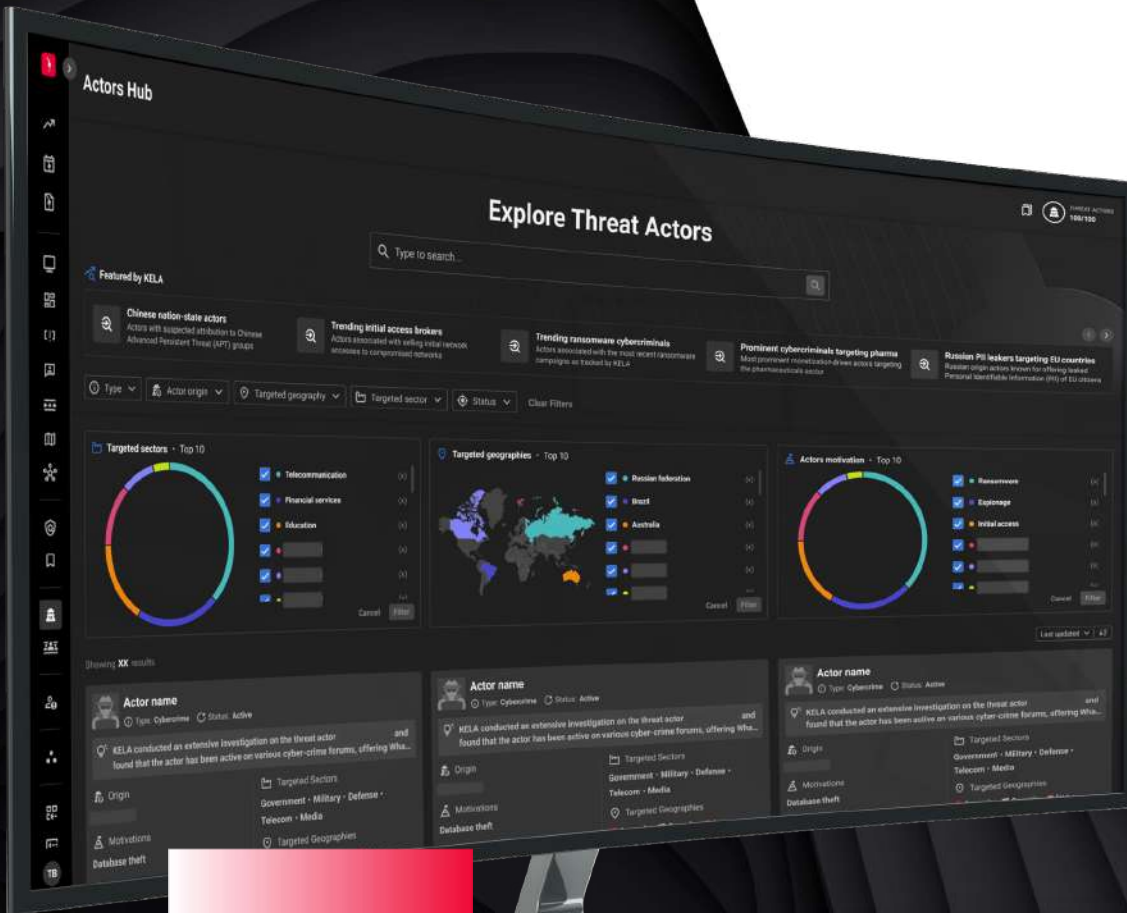

Identity Guard

Proactive Protection Against Compromised Account

Simplified Self-Service Onboarding

- Offers tailored value and capabilities designed to meet the organization's specific needs

Severity-Based Classification

- Includes automatic severity classification for compromised accounts

- Ensures smart prioritization and resource allocation to allow for timely remediation efforts.

**Streamlined Webhook Automation**

- Eliminates the need for complex integrations

- Enabling effortless communication between the module, internal teams, and applications.

- Facilitates seamless initiation of a wide range of workflows through intuitive playbook setup.
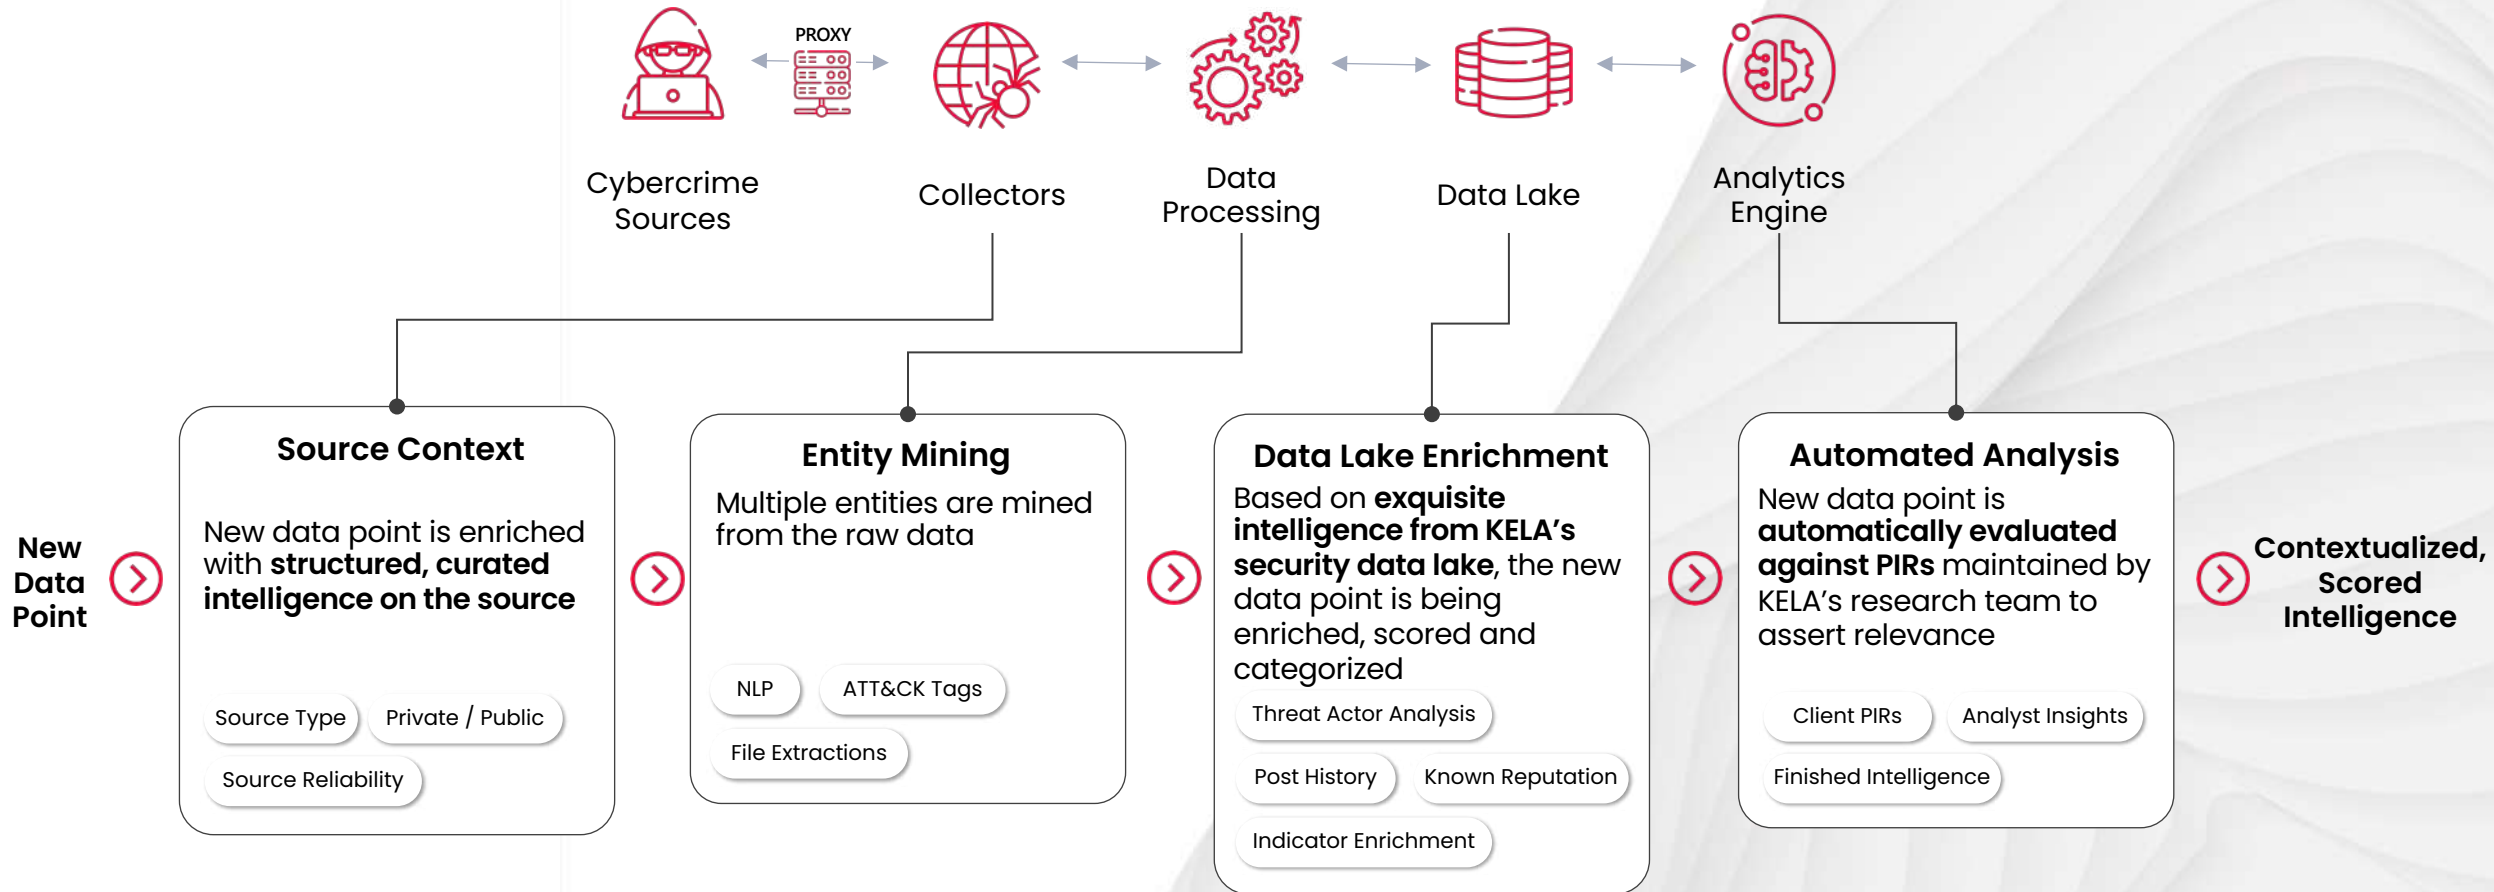

SAAS Protection:

- Enhances the security of the company's accounts across cloud service providers.

KELA's Architecture

KELA's Automated and Scalable Engine

Cybercrime Sources → PROXY → Collectors ↔ Data Processing ↔ Data Lake ↔ Analytics Engine

New Data Point →

Source Context
New data point is enriched with **structured, curated intelligence on the source**

- Source Type
- Private / Public
- Source Reliability

→

Entity Mining
Multiple entities are mined from the raw data

- NLP
- ATT&CK Tags
- File Extractions

→

Data Lake Enrichment
Based on **exquisite intelligence from KELA's security data lake**, the new data point is being enriched, scored and categorized

- Threat Actor Analysis
- Post History
- Known Reputation
- Indicator Enrichment

→

Automated Analysis
New data point is **automatically evaluated against PIRs** maintained by KELA's research team to assert relevance

- Client PIRs
- Analyst Insights
- Finished Intelligence

→ **Contextualized, Scored Intelligence**

KELA

Expand Your Cybercrime Sources

KELA's cybercrime sources are being evaluated for their reliability and scope to provide solely valid and enriched data.
