

The guide and other access information about the platform is sent to the participant during registration.

The learner can access the system for 18 months from the registration date and receive tutor support until the program is completed. User manual and other access information related to the platform is sent to the learner during registration.

#### **Blended course:**

The blended method is a method in which at least two of the face-to-face, virtual classroom and online methods are used together. The participant completes the IG2 training with the online method at the specified time. Afterwards, IG1 training and IG2 mock exam process are completed with face-to-face or virtual classroom method lasting for 5 days. In this way, the participant is prepared for the assessment. The risk assessment project and written exam are standard for all modes of study. The written exam is carried out face to face, the risk assessment project is completed within a defined time and sent to Ege Consulting. In all of the virtual classroom, online and blended courses, tutor support through Whatsapp, e-mail and communication field at LMS continues until the program is completed for each learner.

Learners have the right to have a zoom conversation with tutors for half an hour a week for 6 months starting from the registration date.

In the blended method, as with online method, access to the Ege Consulting online training platform continues for 18 months from the date of registration.

There are five years to complete the process. The five-year period begins on the date of success from the first unit (we call this the "declaration date"). It is necessary to be successful from the other unit within five years after the declaration date. Otherwise, the program ends and it will be required to retake the assessment from the successful unit.

Detailed learner guides for all modes of study are included in the Learner Handbook and the Learner Agreement.

# NEBOSH International General Certificate in Occupational Health and Safety

Helps you  
"know and do" effective health and safety

## It is the best time now to have the NEBOSH International General Certificate!

The most recognized health and safety qualification certificate in its field in the world has been updated by NEBOSH with the help of thousands of leading experts and institutions. In other words, this program, designed to reflect the needs of today's employers, enables participants to learn and apply what they need to make their workplace safer.

**Ege Consulting offers NEBOSH International General Certificate Course program in Turkish and English languages with face-to-face, virtual classroom and online mode of studies.**

### Who is it for?

The NEBOSH International General Certificate Program is designed for managers and chiefs and also for professionals in health and safety management roles in all kinds of workplaces. It is also a great opportunity for those who want to improve their career in health and safety, and it allows you to take an important step towards success.

### What will I know?

NEBOSH International General Certificate Program, which focuses important points in detail, covers the basic skills you will need wherever you are in the world. Among the things you will learn;

- How to manage health and safety effectively.
- How to identify and control common hazards in workplaces.

- How to measure if you are successful.
- Relevant international basic standards.

### What will I be able to do?

Risk assessment is at the center of this qualification. Successful learners will be able to carry out following:

- Can conduct risk assessments safely.
- Can develop and implement detailed action plans.
- Can manage and reduce risks in the workplace.
- Can support and improve the health and safety culture in the organization.

### What does it cover?

Course content with the new syllabus is as following;

#### IG1 Management of health and safety

Element 1: Why should we manage workplace health and safety?

Element 2: How health and safety management systems work and how they look like?

Element 3: Managing risk - Understanding people and processes.

Element 4: Health and safety monitoring and measuring.

#### IG2 Risk assessment

Element 5: Physical and psychological health.

Element 6: Musculoskeletal health.

Element 7: Chemical and biological agents.

Element 8: General workplace issues.

Element 9: Work equipment.

Element 10: Fire.

Element 11: Electricity.

You can find detailed information on the content in the [IGC learner guide](#) prepared by NEBOSH.

### How is it assessed?

This modern qualification combines various activities, learning practices and interactive materials to give you an engaging and participatory experience. It focuses on the basic skills that you will add value to your organization by realizing the information you have learned immediately.

Assessment consists of a two-step process.

- Unit IG1 is assessed by an open book exam where you can complete in 24 hours at any place and

- Unit IG2 is assessed by a practical assessment carried out in learners' workplace (or another suitable workplace) where all parts need to meet minimum requirements.

Exams are held periodically and the dates are published by NEBOSH and shared with Ege Consulting learners simultaneously.

Exam registrations are made approximately 1 month before the exam.

### Transform your career: How will it help me?

The International General Certificate will support your current position and career in the long term, as well as valuable knowledge and skills, and will help you gain a respected qualification all over the world.

Successful participants are able to receive the Level 4 Health and Safety Professional degree under the European Qualifications Framework (EQF), while they are able to upgrade to the Technical Membership category under the Institution of Occupational Safety and Health (IOSH), one of the most recognized health and safety institutions in the world, membership framework.

### Transform your workplaces: Advantages for employers

According to the study of the International Labor Organization (ILO) and the European Agency for Occupational Health and Safety (EU-OSHA), work-related injuries and diseases result in the loss of 3.9% of total gross domestic product worldwide. This rate corresponds to an annual cost of approximately 2,680 billion. The International General Certificate offers key approaches to prevent employers from incurring huge costs thanks to the reduction of occupational accidents and diseases, and to ensure that your employees return to their families safely at the end of the day. Many distinguished organizations around the world preferred the NEBOSH International General Certificate Program for their employees. With this certificate;

- You can reduce occupational accidents and diseases.

- You can increase the welfare of the employees.
- You can increase the success of your company by showing your commitment to health and safety.
- You can improve your health and safety culture.
- You can ensure that your organization has a health and safety expert who creates value.

### The mode of studies available

Ege Consulting offers NEBOSH International General Certificate Program with the blow modes of study;

- Face to face (Classroom course)
- Virtual classroom (Distant learning)
- Online and
- Blended course.

You can find general information about the modes of study below;

#### Face to face:

Face-to-face courses are available in open or closed groups. Training dates open to general participation are announced in our [training calendar](#). Closed group face-to-face courses are scheduled according to the suitability upon request.

Face to face course takes 10 full days. After 10 days of learning, a risk assessment project is given and a written exam is held.

Learners can benefit from tutor support until the program is completed, during the training period.

#### Virtual classroom (Distant learning):

Our virtual classroom courses take place as videoconferencing at the same length and flow as our face-to-face courses. Likewise, they are delivered as open or closed group courses. Click to review detailed information about our [virtual classroom courses](#).

In our virtual classroom courses, workbooks and other supporting documents are shared via e-mail and learners can benefit from tutor support during the virtual classroom training until the program is completed.

#### Online:

Online courses are carried out through [Ege Consulting online training platform](#) where you can follow presentations, textbooks and other supportive materials at any time, provide direct access to instructors and exchange ideas in discussion forums.
