

OUR COMPANY

Following are two organizational charts, showing the various aspects of our company.

We are based out of Shelbyville, Indiana, but have remote office locations in:

Chicago, Illinois

Dallas, Texas

Palm Springs, California

Monterrey, Mexico

In addition, we have consultants, advisors, and subject matter experts located in Connecticut, Michigan, & Belize.

Our Solid Waste Division is currently offering solutions for projects in Mexico, California, and Nevada. These projects involve landfills, waste-to-energy (WtE) with woody biomass, municipal solid waste (MSW), and other waste materials. We are also involved with projects in which we are proposing our newly developed thermal desalinization technology. Our Marine Products Division is offering unique solutions for the removal and destruction of sargasso in the Gulf Coast, Yucatan Peninsula, Belize, other areas of the Caribbean. We have been discussing opportunities for new applications in Israel and Australia.
