

TICK TESTING: COVID-19 UPDATES

As per Upstate Medical University's recommendations, we are shutting down all research activities in the lab, including the Community engaged tick surveillance.

- Before we shut-down the lab, we will process all the ticks that are already sent to the lab.
- If you find a tick on or after March 18, 2020 please do not submit them to the lab. Keep them in the freezer until we are back to normal working conditions.
- The web links to online tick submission forms will be temporarily suspended.
- Updates on when the lab will be open for tick-testing will be posted at this website and on my lab twitter account (@Thangamani_Lab)
