

### BENCHTOP SERIES

### HANDHELD FILLERS

- Easy to set-up & operate
- Dispense wide range of fill volumes
- Compact design with stainless build
- Compressed air not required
- Quick & easy changeover process

### TURNKEY FILLING SYSTEMS

- Complete fill-cap-label systems
- Modular design allows for plug & play setup
- Fills water-like, semi-viscous to viscous products

### PROLINE

### FUSION2

### FULLY AUTOMATED MONOBLOC SYSTEMS

- Fully automated fill-cap-label solutions
- Piston & peristaltic metering options
- HMI: easy-to-use touchscreen controls
- Optional batch records & remote support

### AUTOMATED CARTRIDGE FILLING SYSTEM

- Ability to dispense a variety of oils & distillate recipes
- Multiple levels of heating technology
- No tubing = No wasted product!
- Fills both cartridges & disposable pens

### VERSA5

### CARTRUNNER

### FULLY AUTOMATED CARTRIDGE FILL/CAP SYSTEM

- Ability to dispense a variety of oils & distillate recipes
- Fills a wide range of cartridges & pens
- Capable of screw-on & snap-on caps

## GLOBAL REACH:

## FREQUENTLY ASKED QUESTIONS:

### 1. Do I need an air compressor for your machines?

For most system solutions, you will not need an air compressor. However, it all depends on your application. Even if you need a air compressor, for a specific solution, the requirements are minimal and very managable.

### 2. Are there payment plans or financing available?

There are no payment plans available. However, FILAMATIC works with financing agencies which makes owning your own filling equpment and growing your business easy and less stressful.

### 3. Is your equipment made in the U.S. or manufactured overseas/assembled in the U.S.?

FILAMATIC equipment is 100% designed, engineered, and manufactured in the United States. Our maintenance and service programs are also US based.

### 4. Can your cartridge filling systems fill distillate products?

Yes. FILAMATIC can fill a range of oil recipes and distillate products.

### 5. What is the lead time for a filling system?

FILAMATIC maintans robust levels of spare parts, service, and manufacturing capabilites. Lead times are certainly dependent on the type of equipment and application that you require. However, FILAMATIC has the best and most aggressive lead times within the industry.

### 6. What type of post-sales service can you give me?

FILAMATIC manufactures its own liquid filling systems. so we are able to provide detailed post service and maintence care programs. This service is available for all customers with all levels of purchases.

### 7. Does your equipment come with a warranty?

Yes. FILAMATIC's liquiid filling systems come with a 1 year warranty with post service and maintence program options.
