

## **FOR IMMEDIATE RELEASE**

# **FILAMATIC Announces the Launch of the VERSA5**

[Baltimore, MD May 2022] --

FILAMATIC is excited to announce the launch of the **VERSA5**! This is an amazing addition to a variety of liquid filling solutions FILAMATIC offers as fully automated filling systems.

### **What makes the VERSA5 unique?**

ALL production features can be controlled remotely with Apple and Android devices. Temperature can be controlled, including a wider range up to 200°. This heating element is incorporated into the machine so, it maintains consistent temperature throughout the upper chamber.

**What can it fill?** The VERSA5 can fill cartridges and disposable pen filling.

Notably, the VERSA5 has a fill rate of 80-90 cartridges per minute.

Typically fills volumes from 0.5 to 1 mL for a variety of isolate and distillate products.

**Learn more about the VERSA5 at the FILAMATIC website.**

Get started by contacting our customer support team at 866-258-1914.
