General Instructions:

This works well with one way designs. Double-sided cardstock is nice but not necessary.

1. Cut a piece of cardstock measuring 8” long by 3¼” wide.
2. If your paper has a one-way pattern or text like this vintage piece, turn it sideways so the top of the design rests right against the 0-inch fence. No matter which style score board you use, just make sure the top of your pattern starts at your board's zero mark.
3. Score at 3 1/8” and 6 3/8” (refer to the scoreboard photo below)

4. Punch holes. See page two for template and hole position.
5. On the front, glue reinforcements around each hole.
6. Insert brads from the front.
7. Wrap thread around brad that is on flap.
8. Count 10 sheets of Post-it notes without separating them. Place them in the center of the holder. Do not glue them down so you can easily replace them when finished.
9. Close holder and wrap thread around brad on the bottom flap.
