---------------------	-------------	--	---

All lawn irrigation system installations shall obtain a permit issued by the building inspection department for such installations. Installation requirements must comply with the current city plumbing code and guidelines for the appropriate device found in this article. Interconnections of the potable water supply with an alternate water source are prohibited unless appropriate backflow protection is installed. High hazard backflow protection devices must be installed if any mechanical injection stations are used with the irrigation system or on-site sewage facility is on this property.

Application becomes null and void if all information is not provided within 30 days. If no inspection is made within 90 days of issuance the permit will expire.

A permit becomes null and void if work or construction authorized is not commenced within 180 days, or if construction or work is suspended or abandoned for a period of 180 days at any time after work is commenced. All permits require final inspection.

I hereby certify that I have read and examined this application and know the same to be true and correct. All provisions of laws and ordinances governing this type of work will be complied with whether specified or not. The granting of a permit does not presume to give authority to violate or cancel the provisions of any other state or local law regulating construction or the performance of construction.
