

HACKING EVIDENCE; PART 1

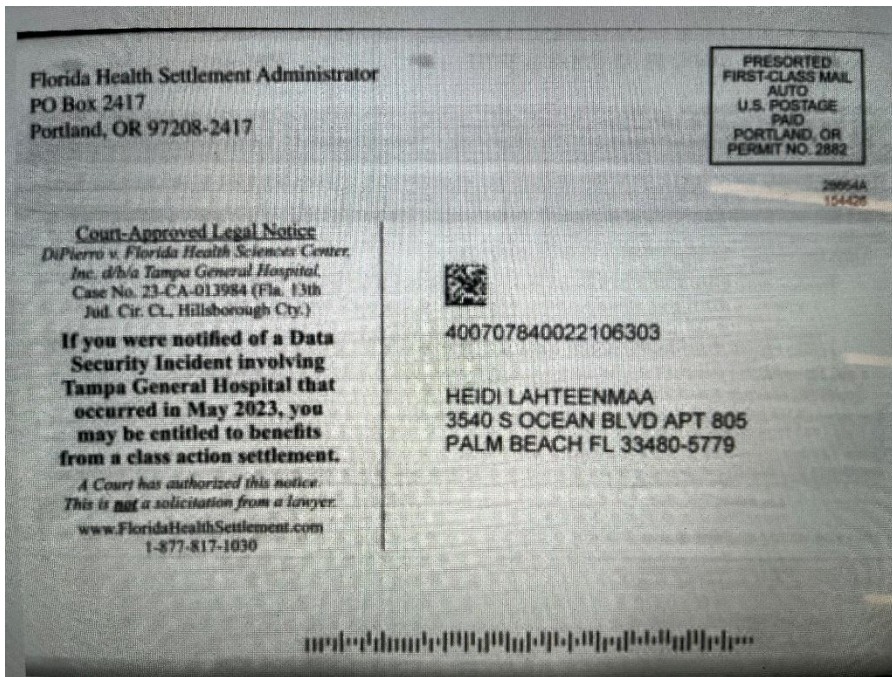

All the evidence in over 4 laptops, 15 phones, ~ 100 000 photos, 5 harddrives and more have been ignored.

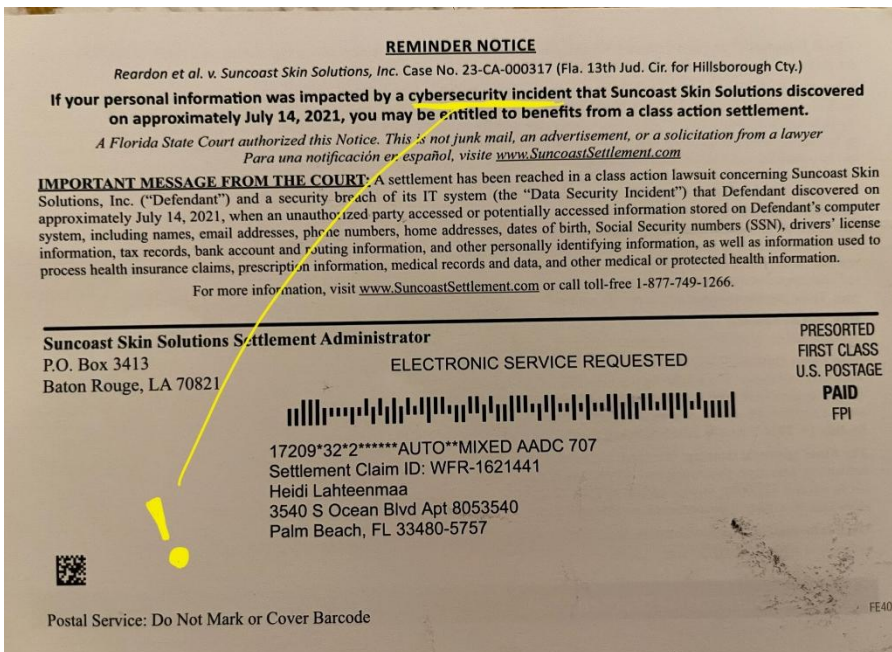

Malware in one of my laptops on 1/31/2023

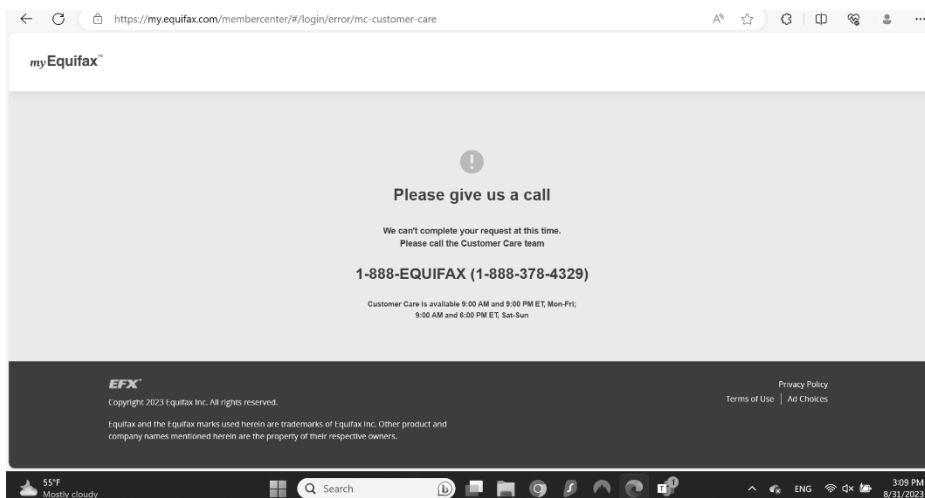

CAQH hacked. Also at some point my laptop screen turned only black and white and remained that way for months. Not sure how this happened? Not sure who added all that info in. Probably the Chinese hackers as Tallahassee is misspelled. Also I never had license in NYC. I believe this has something to do with the Headway hackers/crime gang as I was seeing patients with Headway insurance on Teladoc platform, and they had also marked me as a therapist instead of a psychiatrist

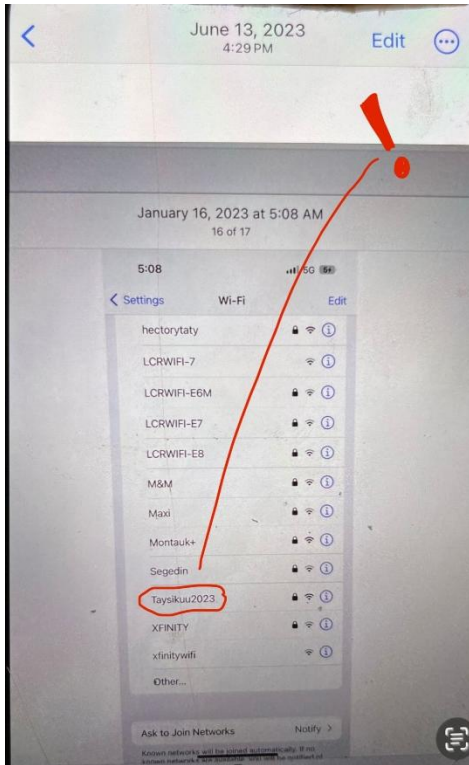

Apparently my account at TGH was compromised. I did rotations there during residency

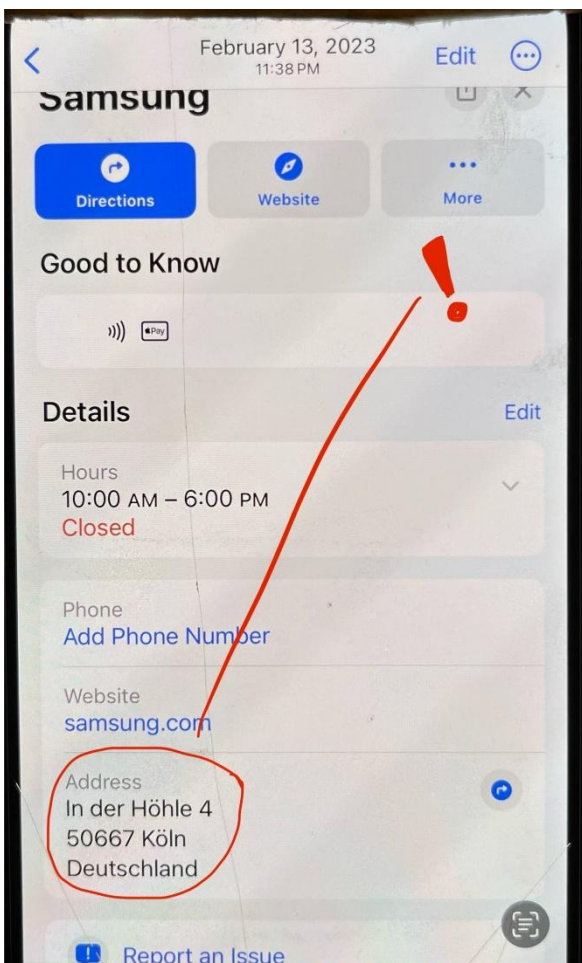

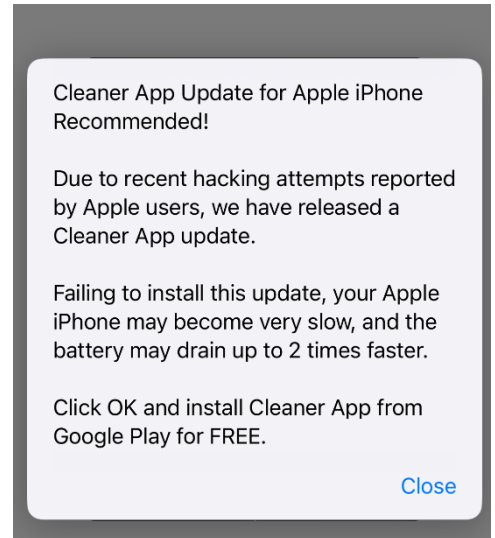

Apparently this place was hacked as well, and my info possibly. I called them but they were clueless.

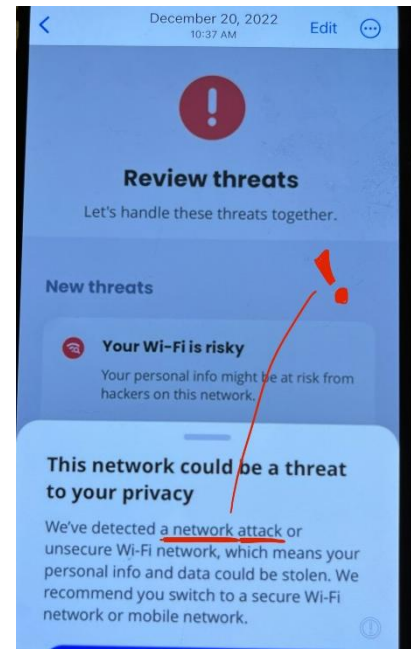

Equifax was hacked for 1.5 years until 08/31/24 I finally got access to it. That being said all of the 3 credit agencies were hacked and I had no access.

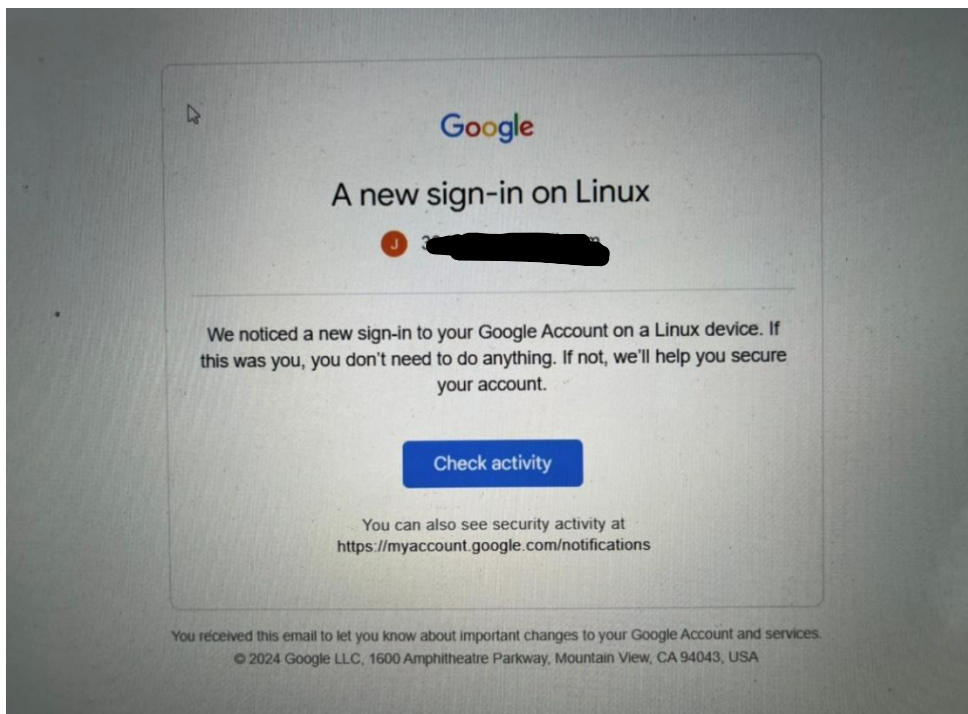

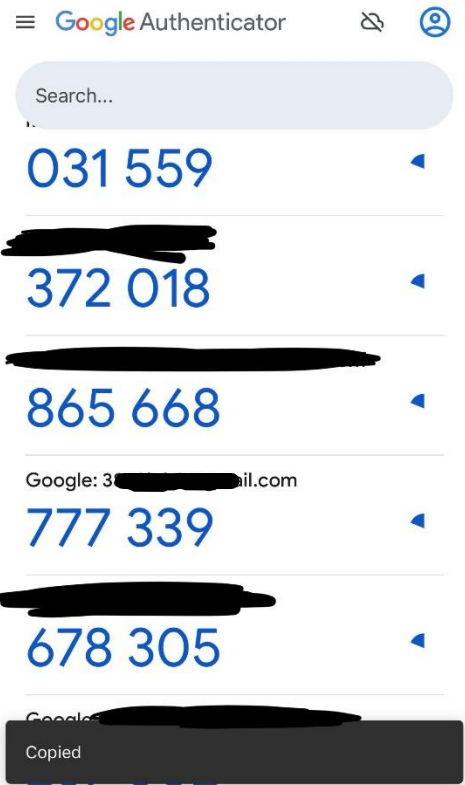

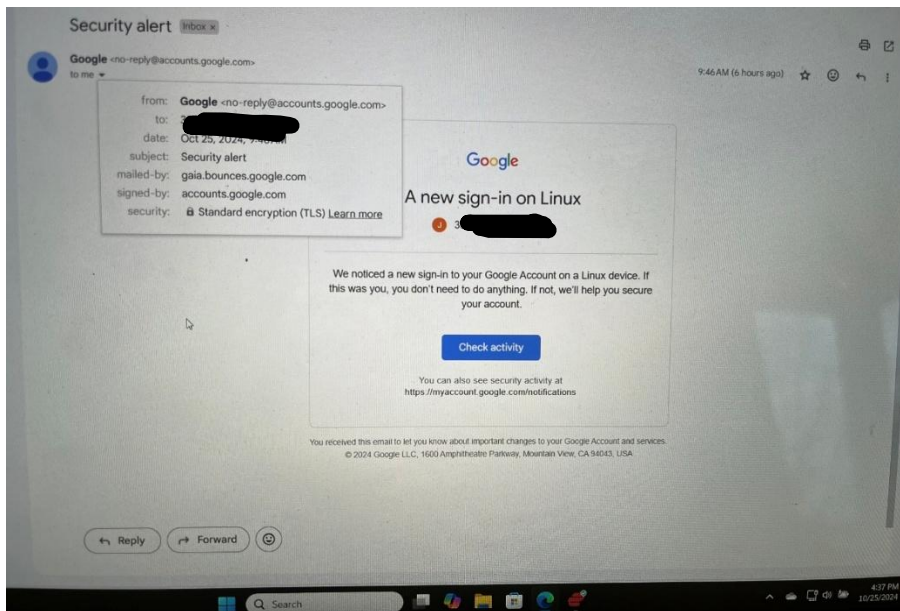

When I was battling with the hacker gangs over my router default password. I called Xfinity to reset it. She punched in the new password to the system, but the hackers heard our phone call and thought it would be funny to set the password I had chosen "Taysikuu2023" as my wifi name.

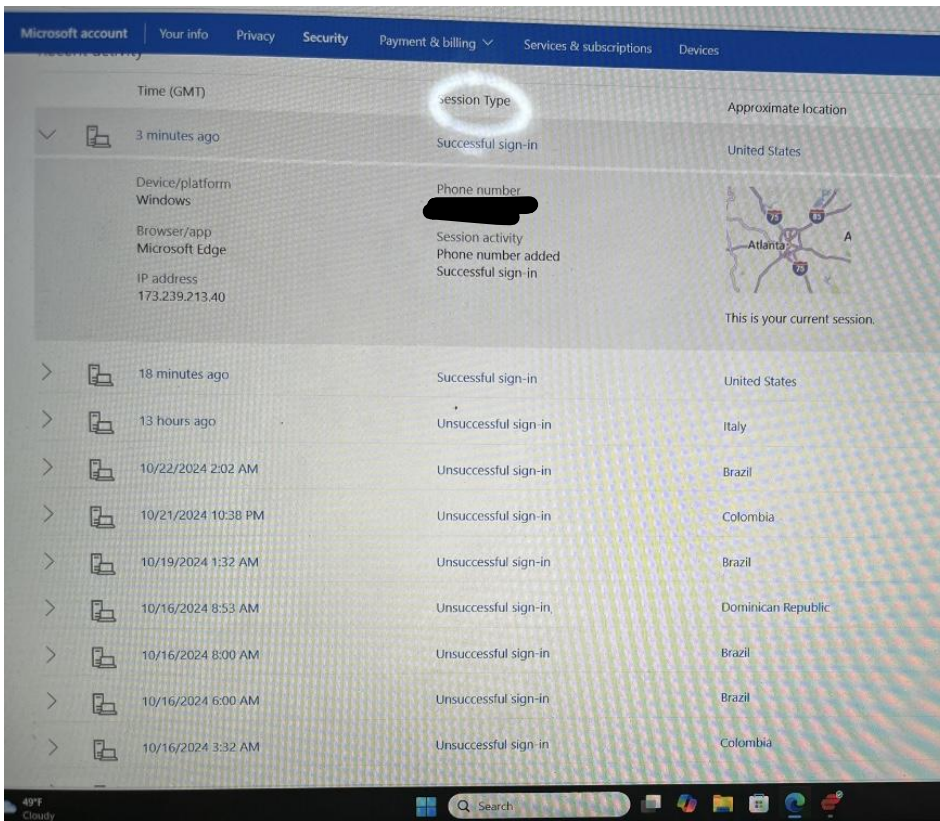

When I tried to get help and find a computer/cyber security place no matter how I searched it, the iPhone maps would not show me anything relevant and would omit businesses close by. They (hackers) also thought it would be fun to place these places to Germany

I never had Linux and I have never used that system. Someone logged into 3[redacted].com when I was in Finland.

Someone who is computer savvy, logged on to my gmail with Linux despite me using G Authenticator for that email

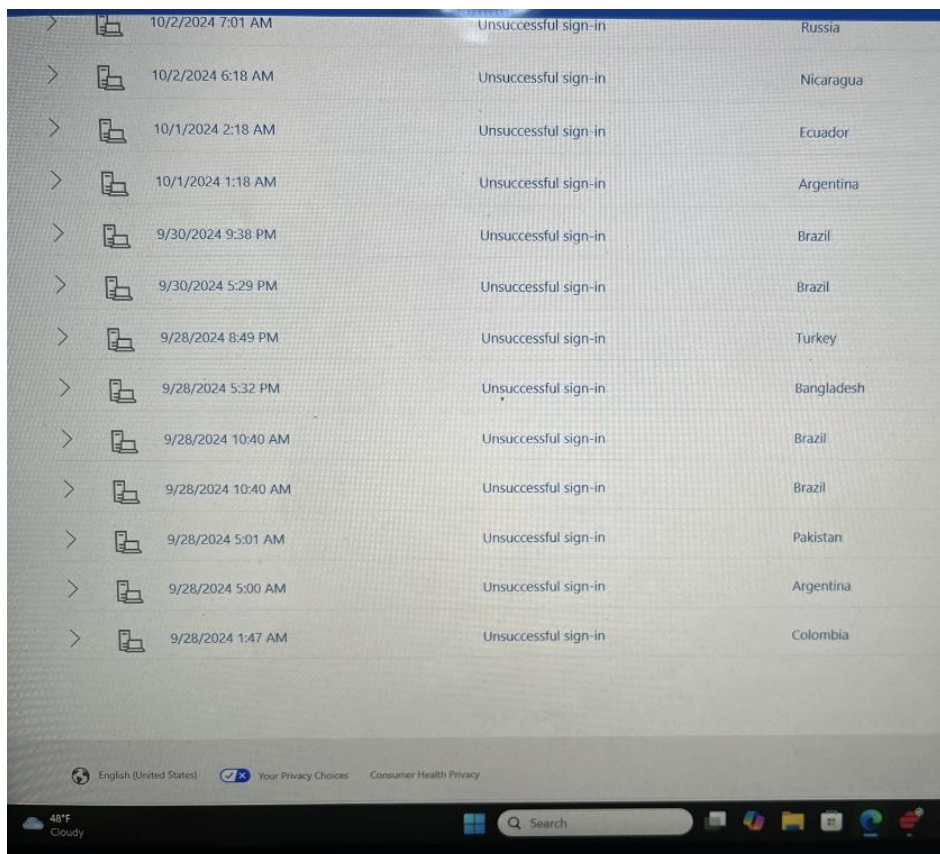

This is my email

[REDACTED]@mail.com or [REDACTED]@com.

Suprisingly, I got access to it after being logged out for about a year I'd say at least, but as you can see it has been bombarded by someone daily trying to login. Are these "Brute Force Attacks?"

I was logged out of one of the accounts above, as Proton stole over 200 passwords from me, after making them anonymous. Their support staff stubbornly continues to refuse to restore access (despite me having the old password) and answer questions.

Not sure who the "Account Owner" suddenly was for my own account at FPL.

It's not my previous German landlord R [REDACTED] as we transferred the account to my name when I moved, and I was able to login just fine afterwards. Then the access got blocked.

He sold me the Bittium Tough Mobile 2, a Finnish secure cellphone. Money left my bank account, I never got the phone, and now he has disappeared. I never got the \$ back.

- This is actually my Amazon account. When I logged into it with my SIM-swapped phone number I personally got from T-Mobile (561-969-8573) it logged on to this Juan's account. Amazon and T-Mobile both refused to take care of it and blamed each other, and told me the other one has to fix it. Not sure what happened to that account. I cancelled the number over a year ago. This criminal gang was using it to torment and isolate me.

don't even think about turning off your phone or resetting it to factory settings. It's pointless. I don't make mistakes, Heidi.

Can you notice something here?

Honestly, those online tips about covering your camera aren't as useless as they seem. I am waiting for my payment..

Hackers emailing me asking for bitcoin. I do not appreciate the comments about restoring my phones and covering the webcam, plus the beach photo as it looks like one that may have come from my iPhone.

victim here.

Other option is to pay me, and be confidential about it. We'll call it my "confidentiality charges". Now let me tell you what will happen if you select this way out. Your secret will remain private. I'll wipe everything clean once you come through with the payment. You'll send the payment via Bitcoins only. I want you to know I'm aiming for a win-win here. I stand by my promises.

Transfer Amount: \$1950

My Bitcoin Address: 1KJohjhX71LTxCQMZP1vAfoEEqms2vRonZ

Or, (Here is your Bitcoin QR code, you can scan it):

Let me tell ya, it's peanuts for your tranquility.

Note: You now have one day in order to sort this out and I will only accept Bitcoins (I have a unique pixel within this email, and right now I know that you've read this message). My system will catch that Bitcoin payment and wipe out all the dirt I got on you. Don't even think about replying to this or negotiating, it's pointless. The email and wallet are custom-made for you, untraceable. If I notice that you've shared or
