RE: Tigard High School Robotics Sponsorship Request

To Whom It May Concern,

The Tigard High School Tech Team provides students with the resources to thrive and succeed, removing all financial barriers by never charging participation fees. However, it costs approximately \$2,500 to support each of our four FIRST teams and about \$200 to support our Game Dev team. These expenses include parts, registrations, team uniforms, competition fields, travel, and other related costs. Since we don't receive funding from participation fees or the school district, we rely on community partners to fund our program. There are many benefits to becoming a sponsor of our Robotics or Game Design teams.

Gain Visibility

We highly value our sponsors and want to recognize your support. For all our sponsors, we will display your logo on our team trifold at competitions and outreach events, social media accounts, and branding on our uniforms for more significant donations. We participate in at least five yearly competitions attended by 300-400 people in the Portland Metro area. This reach increases exponentially if one of our teams progresses to the National competition.

Nurture Talent

Your contribution will directly enable our students to access new parts and cutting-edge resources, empowering them to explore their potential and push the boundaries of innovation.

Inspire the Community

First Tech Challenge isn't just about competition. Our team engages in community outreach events where we share our robot and experiences with younger community members to inspire their futures. As part of our outreach efforts, we regularly visit elementary schools to showcase the exciting capabilities of our robots. Your sponsorship aligns your company with our commitment to inspiring young minds and fostering interest in STEM education.

Respectfully,

Tigard High School Robotics Students
