

PROFESSIONAL RESCUE SERVICES

For the moments when everything is on the line. No hesitation, no excuses — just battle-tested professionals who act decisively, control the chaos, and never leave anyone behind...

RELENTLESS RESCUE

CALM THE CHAOS. DOMINATE THE RISK. MAKE THE GRAB

Relentless Rescue — It's not a slogan. It is a standard of character.

An uncompromising commitment to protecting life, no matter the conditions, no matter the complexity, no matter the pressure.

A formidable mindset of constant readiness and unbreakable resolve — the discipline to prepare without pause and the determination to finish the mission when everything is working against you.

When the environment is unstable, resources are stretched thin, and the situation is deteriorating, Relentless Rescue is what carries us forward.

Because quitting is not an option. And bringing every worker home is the only acceptable outcome.

CONFINED SPACE RESCUE

Our Teams are more than just emergency responders; they are a full-spectrum safety solution. Supporting every phase of the operation with hazard identification and mitigation, documentation assistance, and continuous oversight.

01

PROFESSIONAL CERTIFICATIONS

Built from the highest tier of certified professionals in the industry — including SPRAT, NFPA-Certified Confined Space Technicians, Nationally Registered EMTs, Board-Certified Firefighters, and NFPA HazMat Technicians.

02

HIGHLY EXPERIENCED

Composed of professional firefighters and veteran emergency responders, our rescue teams don't just know the standards — they've lived the work. Every response is driven by experience, precision, and absolute commitment to bringing people home.

03

LATEST EQUIPMENT

Operating with cutting-edge, industry-leading equipment that meets or exceeds current standards. Every tool we use is designed for performance in the most demanding conditions and selected to enhance speed, precision, and responder safety.

HIGH ANGLE RESCUE

Our at-height rescue services provide dependable emergency response for elevated work sites, vertical access spaces, and complex industrial structures. Our teams combine advanced rope systems and specialized techniques to execute safe, controlled, and decisive rescues when access is limited and the risk is extreme.

01

UNLIMITED ACCESS

Our services provide unlimited access to the most challenging work environments—from towers to leading edges. Our capabilities include suspended worker retrieval, work positioning systems, and complex rope access solutions

02

ADVANCED RIGGING CAPABILITIES

Technicians deploy remote systems using concrete anchors, parapets, artificial directionals, and improvised anchoring methods as conditions require. This versatility allows us to establish safe, reliable access in virtually any elevated environment.

03

FALL PROTECTION SYSTEMS

Our team delivers temporary fall protection solutions for elevated work operations. This includes—fall arrest and travel restraint systems, horizontal and vertical lifelines, and specialized rope access rigging.

RESCUE SUPPORT SERVICES

Services built on real-world experience, technical precision, and uncompromising standards. Our team of NFPA-Certified Rescue Technicians provide the expertise and guidance needed to control risk, maintain compliance, and respond decisively. We don't offer templates — we deliver operational readiness.

01

SPACE ASSESSMENTS

Our team of confined space experts identify, evaluate and document all confined spaces across your site, delivering a comprehensive report with space classifications and the hazard controls required for safe entry operations.

02

SAFETY PLANS

Project-specific Fall Protection and Confined Space Entry Plans that integrate hazard controls, work procedures, equipment requirements, and OSHA compliance into everyday jobsite operations.

03

RESCUE PLANS

Highly detailed, Confined Space and Fall Protection Rescue Plans that are precision-engineered to address every operational detail—from exact hardware requirements to local emergency response capabilities and timelines.

04

RESCUE TEAM EVALUATIONS

Assess readiness, capability, and response procedures against real-world rescue demands and regulatory standards. Our evaluations deliver actionable recommendations that strengthen performance, close gaps, and ensure teams are fully prepared.

OUR EQUIPMENT

SMC TERRADAPTOR

Monopod | Bipod | Tripod

"Critical anchoring capability for environments with zero infrastructure"

ATMOSPHERIC

MSA Altair 5x Monitor	2
Draeger XM-2800 Monitor	3

Entry Support

10" Blower	2
Portable Generator	1
Manhole Gate	1
Entrant Harness	5

SUPPLIED AIR

SCBA	2
30 Min. Bottle	4
60 Min. Bottle	2
150' Air Line System	2

ANCHORS

Concrete Anchor Kit	16
Anchor Pickets	6
I Beam Clamp	2
Roof Anchor Kits	4
SMC Gin Pole (Mini)	1
Industrial Tripod	1

ROPE (NFPA (G) Rated 12.5 mm)

50' x 6	100' x 4	200' x 3
300' x 3	400' x 3	600' x 2

MA SYSTEMS

RNR Rescue Haul	1
Petzl JAG	1
CMC Prussic Haul	1
CMI Micro Haul	2
Rock Exotica Aztek	5

BELAY DEVICES

Petzl I.D	4
Petzl Rig	2
CMC Clutch	2
CMC MPD	1
Rescue 8	4

PACKAGING DEVICES

Half Sked	Victim Harness
Full Sked	Yates Spec Pak

Trauma Kit | AED | Eye Wash | Burn Dressings | Splints
