ABOUT

APEX RESCUE GROUP

**SAFETY IS NOT A CHECKBOX—IT IS
OUR MISSION, OUR DISCIPLINE, OUR PROMISE...**

Apex Rescue Group, a veteran-owned small business founded in 2022, is a specialized provider of industrial safety services, offering confined space rescue, OSHA compliance training, and on-site safety consulting across the United States. Our team applies military-level discipline and real-world experience to deliver high-quality training, practical safety solutions, and expert support. Committed to maintaining a culture of vigilance, we focus on reducing risk and ensuring every worker goes home safely at the end of each day.

WHO WE SERVE

- INDUSTRIAL
- CONSTRUCTION
- MANUFACTURING
- MUNICIPAL
- ENERGY

Apex Rescue Group supports clients across some of the nation's most demanding industrial environments. We serve construction firms, manufacturing facilities, energy producers, municipal utilities, and other high-risk sectors that require dependable support. Whether working in treatment plants, on large construction projects, inside confined spaces, or within complex industrial systems, we partner with organizations that need seasoned professionals who understand the realities of high-hazard operations. Our mission is to strengthen their readiness, reduce risk, and ensure every worker goes home safely.

Leadership

Charles L. Davis III

As President of Apex Rescue Group, I leverage a strong professional network and extensive experience to consistently deliver services that far exceed industry standards. I am committed to providing dependable quality, expert guidance, and streamlined communication to ensure fast, effective solutions for our clients. Under my leadership, Apex Rescue Group has built a culture that rejects complacency, demands vigilance, and prioritizes the safety and readiness of every workforce we support.

RESCUE

Specialized services led by highly experienced, Professional Firefighters. Our NFPA Certified Technicians—bring real-world expertise, battle-tested readiness, and top-tier equipment to every operation. Using advanced techniques and specialized gear, we deliver fast, effective response in the most demanding environments.

CONFINED SPACE

From pre-entry through completion, we provide expert guidance, monitor and mitigate hazards, assist with documentation, and ensure all confined space operations are conducted safely and in full OSHA compliance.

HIGH ANGLE / FALL PROTECTION

Fall protection safety support from certified rope rescue technicians who will design and manage effective fall protection systems, implement PFAS solutions for workers, and proactively reduce or eliminate unnecessary exposure to fall hazards.

TEAM EVALUATIONS & RESCUE PLANS

Strengthening your readiness by assessing capabilities, identifying critical gaps, and developing OSHA-compliant rescue plans that remain practical under pressure. Our approach sharpens technical proficiency and mentally prepares personnel for the emotional and physiological challenges inherent in real-world rescue operations.

“Our greatest service isn’t rescue— it’s preventing the need to ever use it”
