

Smart-Tecc & TECcare

Mould Control & Antimicrobial Solutions – Smart-Tecc® Range

Our Approach to Mould Control

At **Smart-Tecc**[®], we understand that mould and microbial contamination can compromise indoor environments, damage structures, and impact health. That's why we partner with proven antimicrobial technology platforms – including the world-class solutions developed by **TECcare**[®] – to deliver effective, safe and certified products for mould prevention, cleaning, and disinfection.

Why Smart-Tecc® Uses TECcare Technology

TECcare® antimicrobial products combine advanced chemistry with extensive laboratory testing to ensure broad-spectrum microbial control – including mould, bacteria, viruses and spores. Their formulations are designed to be:

Safe & Non-Toxic

Non-toxic, non-corrosive and safe for people and surfaces, even in sensitive environments.

Clean Formula

Chlorine, alcohol and fragrance-free, reducing irritation and surface damage.

Highly Effective

Effective against difficult microbial growth, with proven rapid contact kill times and prolonged action

These characteristics make the TECcare range ideal for use in homes, commercial buildings, healthcare facilities, schools and other high-risk environments.

Certifications & Performance Testing

TECcare platforms – and therefore Smart-Tecc® products – are backed by ***extensive independent testing*** in accredited laboratories, demonstrating antimicrobial activity across multiple standards, including:

Testing Standards

- **EN Tests:** bactericidal, virucidal, fungicidal, sporicidal efficacy.
- **AOAC microbiological testing:** broad spectrum antimicrobial action.
- Compliance with **CE, REACH, OSHA and other regulatory requirements.**

These certifications ensure your environment benefits from solutions that are not only effective but also compliant with industry safety and quality expectations.

Featured Smart-Tecc® Mould & Antimicrobial Products

Our comprehensive range of products addresses every aspect of mould control and antimicrobial protection, from deep cleaning to daily maintenance.

1. Smart-Tecc **Ultra**

High-Level Sporicidal Disinfectant

Designed to tackle the toughest microbial threats, **Ultra** is a potent sporicidal disinfectant that breaks down into harmless oxygen and water after use. It delivers a high level of microbial kill performance – helping prevent mould and spore formation – while remaining safe and compliant with major regulatory standards.

📌 **Ideal for:** deep cleaning, outbreak prevention, surface sanitation.

2. Smart-Tecc Control

Broad-Spectrum Cleaner & Disinfectant

Control is a versatile, all-in-one cleaning and disinfecting solution that is proven effective against mould, fungi, bacteria and viruses. Its single-step application streamlines processes and reduces product handling.

Key benefits

- Eliminates microbial contamination on contact
- Safe for use on all hard surfaces
- Leaves no residue
- Chlorine and alcohol free

Uses: routine surface sanitation, environmental cleaning, mould-prone areas.

3. Smart-Tecc Eco-Det

VOC-Free Environmental Detergent

A powerful **plant-derived** detergent and degreaser, Eco-Det provides strong cleaning performance without volatile organic compounds (VOCs). This makes it a safer first stage for removing organic material where mould thrives.

📄 **Ideal for:** industrial, commercial and residential cleaning prior to disinfection.

4. Smart-Tecc Efface & 5. Drain Kit

Smart-Tecc Efface

Environmental Cleaning Wipes

Pre-moistened wipes made from **plant fibres** – with no plastic content – for quick, eco-friendly surface cleaning. These wipes bring high-efficiency antimicrobial liquid into an easy-to-use format.

Perfect for: daily wipe-downs in high contact areas.

Smart-Tecc Drain & R-Foam Kit

Specialized Sanitation System

A dedicated system for drain, shower and sanitary ware sanitation. The kit supports deep cleaning and disinfection in hard-to-reach spaces where biofilm and mould can accumulate.

Smart-Tecc® — Trusted Protection Against Mould

Smart-Tecc® brings you antimicrobial solutions you can trust – combining advanced TECcare technology, certified antimicrobial efficacy, and safe, user-friendly formulations. Whether you're dealing with everyday surface contamination or serious mould challenges, our products help you maintain healthier, safer spaces.
