

Environmental Monitoring for Surveyors

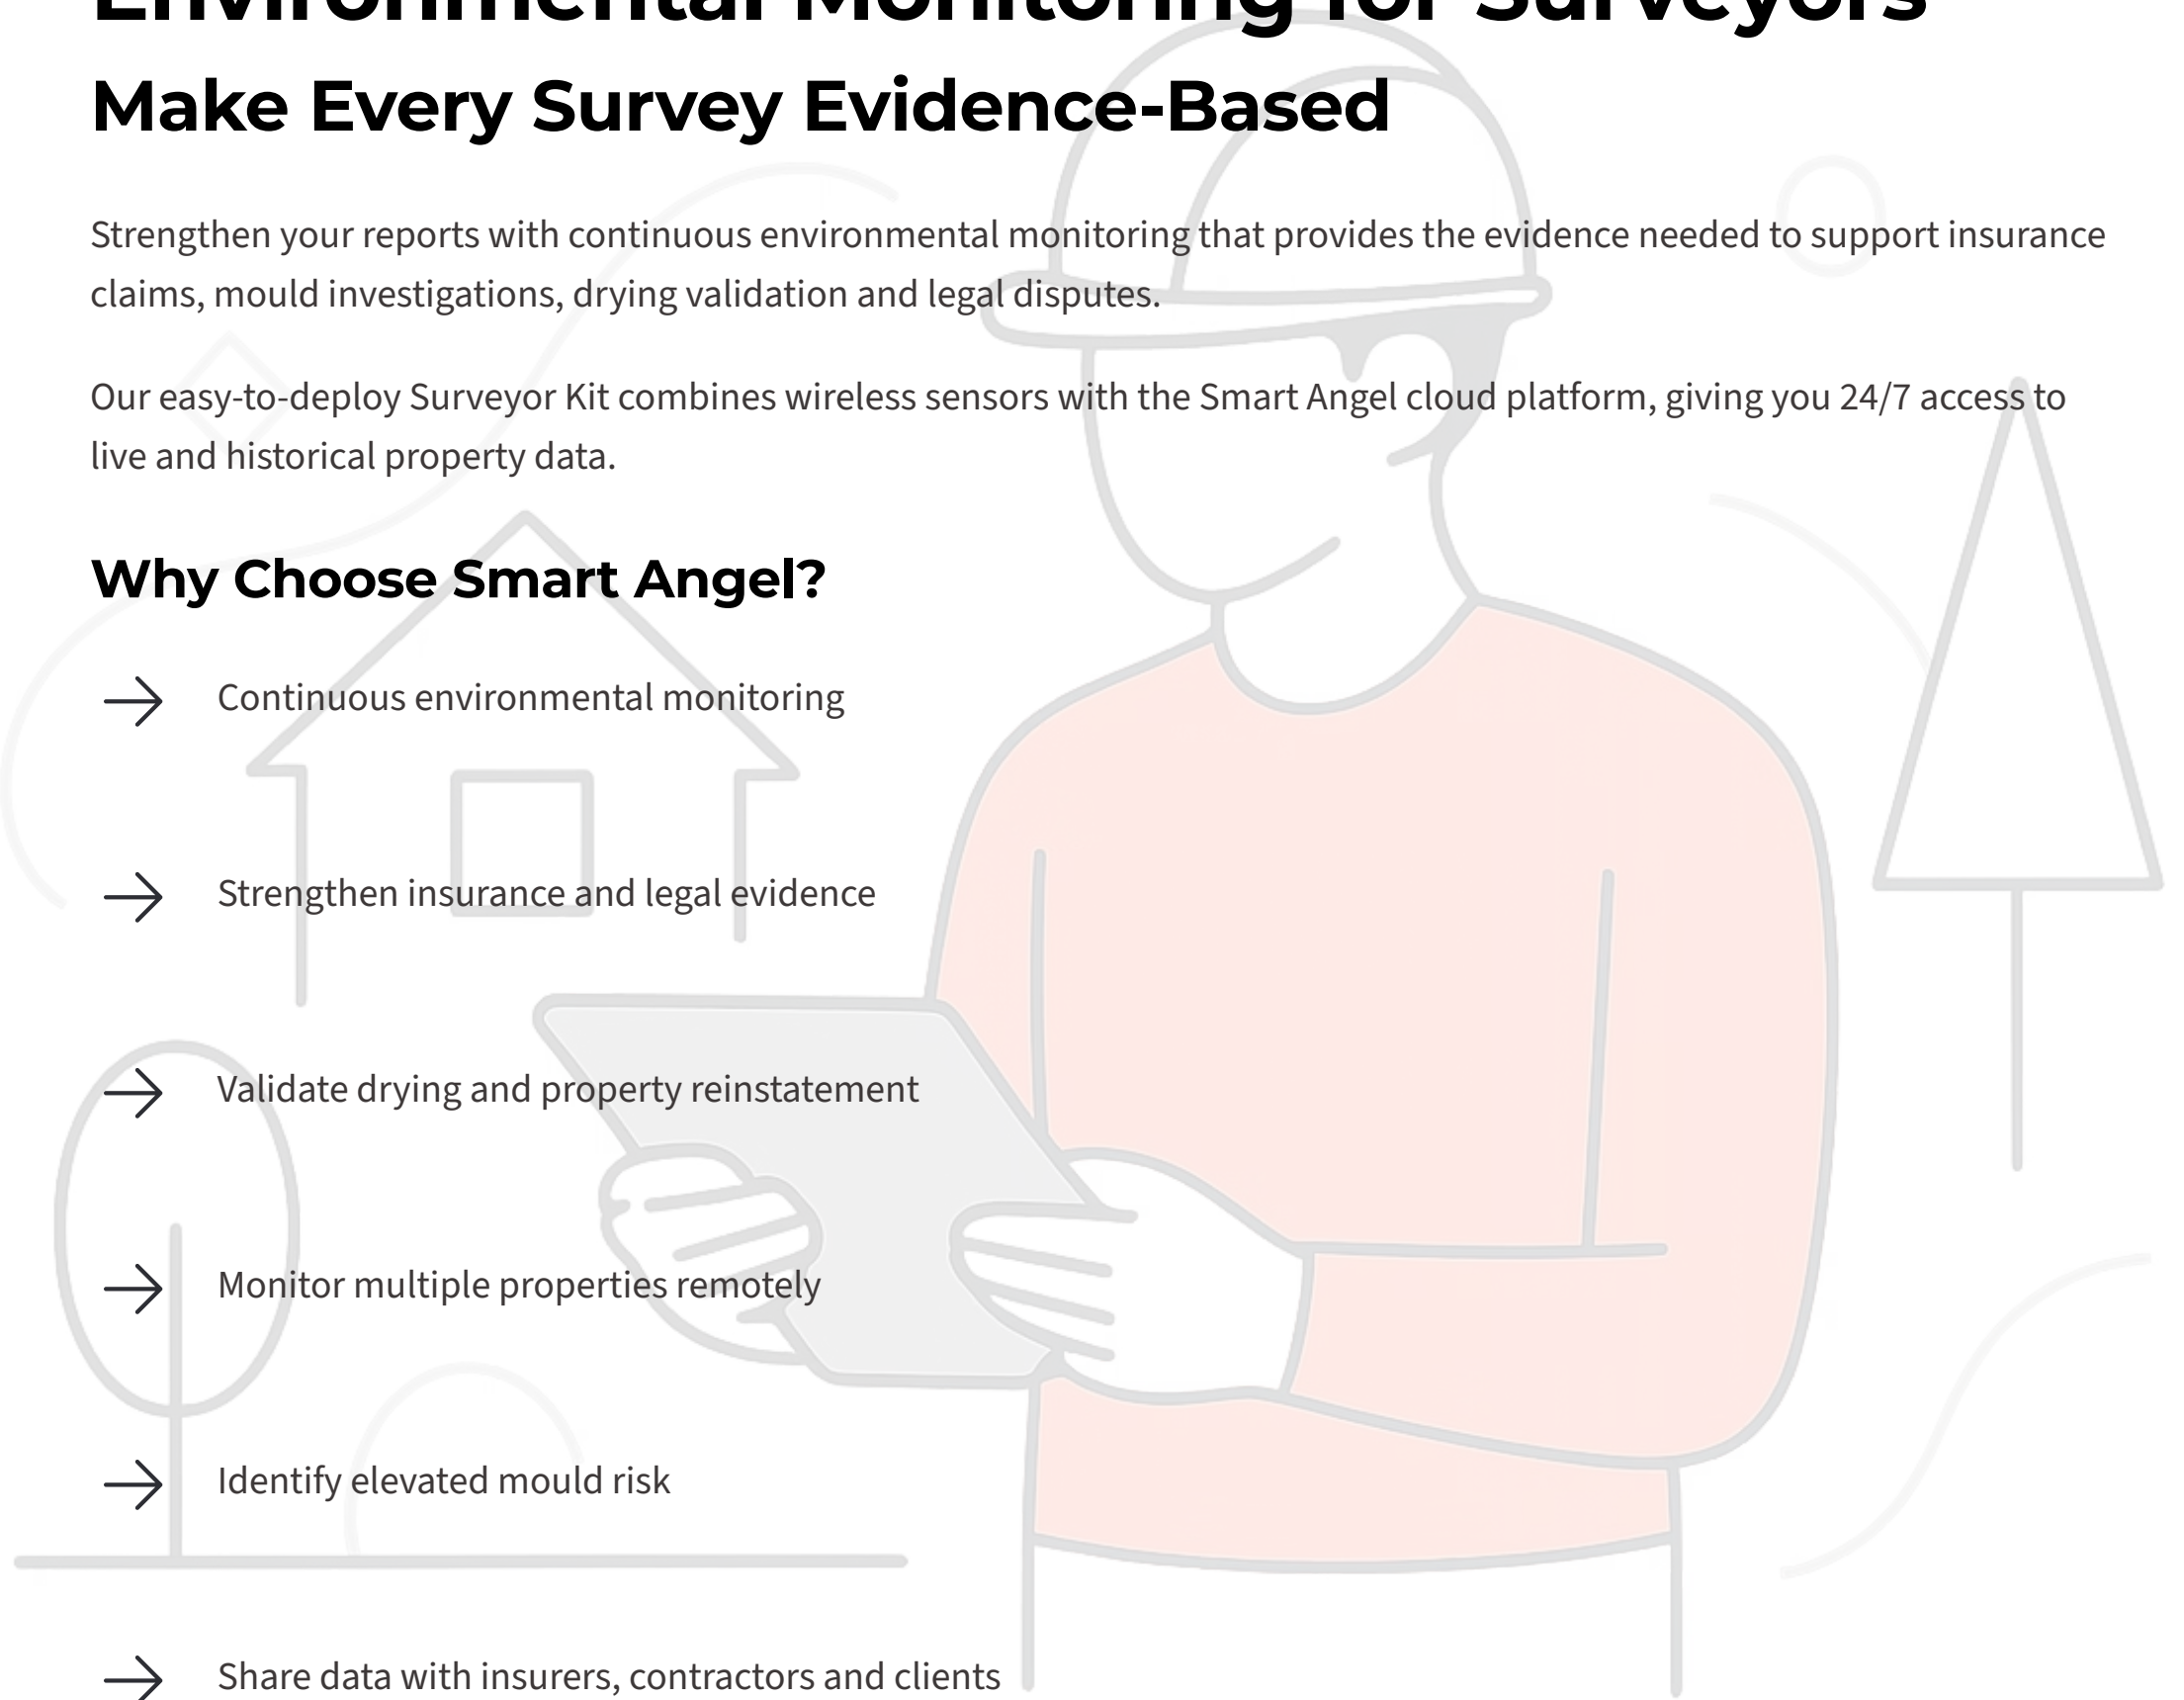

Make Every Survey Evidence-Based

Strengthen your reports with continuous environmental monitoring that provides the evidence needed to support insurance claims, mould investigations, drying validation and legal disputes.

Our easy-to-deploy Surveyor Kit combines wireless sensors with the Smart Angel cloud platform, giving you 24/7 access to live and historical property data.

Why Choose Smart Angel?

- Continuous environmental monitoring
- Strengthen insurance and legal evidence
- Validate drying and property reinstatement
- Monitor multiple properties remotely
- Identify elevated mould risk
- Share data with insurers, contractors and clients

Choose the Right Sensor for Every Investigation or combine them.

Smart ECO
