- Stop ends to be installed at flashing ends.
- Minimum Clearance between the AIR BARRIER and WINDOW JOINERY to be 45mm. Window Joinery should not be permanently fixed until cladding installed.
- 3. Sealant on each ends of the "J" starter board to prevent water going into cavity.
- 4.
- Timber Cavity Batten at 800mm max spacing.

 Secure the AM029 clip with 1 screw for standard use, or 2 screws for added support
